Shelhamer confirmed ag secretary

By DIETER KRIEG
HARRISBURG - Pennsylvania's new secretary of agriculture believes there's virtually no job too tough for an efficient farmer to tackle. That's why he has made a solid farm background one of the prerequisites necessary to work in his department. "The farmer is

very versatile, he had to be," Kent Shelhamer told Lancaster Farming in an interview on Monday. "He is ingenious and diverse, that's what I want to develop in my department."

Shelhamer, who has a strong farm background himself and still operates a farm in Columbia County,

wants the Pennsylvania Department of Agriculture to be more responsive to farmers' needs and he says he will work diligently towards that end. Describing himself as a "mover and a shaker," the 52-year old former legislator says his office will be open to hear

[Continued on Page 17]

Meet Pennsylvania's new secretary of agriculture — Kent Shelhamer, a Columbia County farmer with 12 years of legislative experiences behind him. Professing a practical, grass roots, nuts-and-bolts philosophy, Shelhamer wants his

Department to be responsive to farmers' needs. His reputation as a listener and a "mover and shaker" are well known and respected. The senate confirmed him as secretary of agriculture on Monday by a 47 to 0 vote.

Family farms threatened

HARRISBURG - An Ag-Land Trust investment plan, proposed by two major financial firms, threatens the existence of family farms in America and would lead to higher consumer food prices, the Pennsylvania State Grange warned last week.

In a letter to Pennsylvania congressmen and to the United States and Pennsylvania secretaries of agriculture, J. Luther Snyder, master of the State Grange, declared that the plan would put the production of major field crops - such as corn,

soybeans, wheat and other grains - "under the control of two financial giants."

The Ag-Land Trust idea was developed by the Continental Illinois National Bank and Trust Company and the brokerage firm of

Energy crisis contemplated

By SALLY BAIR
Feature Writer
LANCASTER, Pa. - Agricultural uses of energy have been given priority in all major pieces of legislation dealing with the natural gas crisis, according to Edward Callan, Columbia Gas Transmission Company. Callan answered the question of agricultural usage at a meeting called by

16th District Congressman Robert Walker last week to discuss the area's energy goals and seek possible answers.

Commissioner Robert Bloom said that the Pennsylvania Public Utility Commission "will do what we can" in meeting the needs of Pennsylvania food industries during the crisis. He was unsympathetic to

plants which had not made arrangements for a second "back-up" fuel systems as they have been told to do, but he also said he was reluctant to see milk dumped because of it.

When asked specifically if farmers would be assured of "adequate" supplies to meet their spring needs,

Rising milk production worrisome

By DIETER KRIEG
MOUNT JOY, Pa. -- Dairy industry leaders and Pennsylvania's new secretary of agriculture, Kent Shelhamer, are expressing some concern over the trend of milk production. Inter-State Milk Producers Cooperative, which held a district meeting here on Thursday afternoon, noted

that its January 1977 supply increased by 9½ per cent over a year ago. The energy crisis was partially blamed for the predicament. As far as is known, no milk needed to be dumped, although there were some very close calls.

One situation which hung in the balance in a very precarious position was the future of milk shipped to

Dietrich's Dairy in Reading. The firm turns fluid milk into powder and came close to having its gas supplies shut off. Inter-State convinced the Public Utilities Commission to change the status for Dietrich's and the gas kept flowing. Also instrumental in saving the area's dairymen a king-sized headache was Myers'

Metered Gas Service of Manheim which furnished emergency fuel supplies to the Reading firm. A check with Dietrich's on Thursday afternoon revealed that the crisis is over and that no such serious flare-ups are expected in the immediate future.

The burden of having too much milk on hand remains however. Concern over excessive supplies was

expressed by Dr. James Honan, general manager of Inter-State, and Daniel Martin, Manheim area dairyman who serves as vice-president of the dairy cooperative.

Joining the dairy cooperative leaders in voicing this concern was Pennsylvania Agriculture Secretary Kent Shelhamer, who in an interview with

Lancaster Farming on Monday said:

"I think today we are in an area of having substantial surpluses in milk, and we could see some real serious problems in the milk industry. This could precipitate some new legislation." He added that he hopes he is wrong in his assessment, but that all

PFA works with marketing

By SALLY BAIR
Feature Writer
LANCASTER, Pa. - If you're interested in buying and eating premium Pennsylvania products, the Pennsylvania Farmers' Association has a direct marketing program made to order for you.

Lancaster County Farmers' Association President, Earl Newcomer, Washington Boro RI, explains that PFA's marketing

program is organized to provide fresh, quality produce direct to consumers, both members and non-members. He says, "We pay premium price for the best quality - we don't try to meet anyone's competitive price."

According to Vaughn E. Hunter, sales director for the Pennsylvania Agricultural Cooperative Marketing Association, an arm of PFA, the program started five

years ago as a fruit program, when PFA participated with the Florida Farm Bureau in shipping citrus to Pennsylvania. Eventually, Hunter said, "We developed our own label and started selling apples down there."

From this modest start, the program slowly became involved in marketing hams, mushrooms and grapes, and

THE OLD FARMER'S ALMANAC

FEB. 21-27, 1977

Ice on the river, two feet of snow,
Thirty-mile wind and thirty below.

Pass along your old clothes to the poor Washington's Day Feb 21 (although his birthday is Feb 22) First quarter of the moon Feb 25 Mardi Gras Day Feb 22 Average length of days for the week 11 hours, 1 minute Famous Iwo Jima Marine photo taken Feb 23, 1945 Grand Canyon Park established Feb 26, 1919 Is it progress if a cannibal uses a knife and fork?

you say, "canting," was the reverse. When the wind backed, it usually meant that good weather would not last, but if it hauled especially into a westerly quarter, days of fair weather might be expected. The terms are still used.

Home Hints: To minimize the "bleeding" of a plant when it is cut back, always prune when it is semi-dormant.

OLD FARMER'S WEATHER FORECASTS

New England: Snowy to start, then becoming fair through Wednesday, snow storm with 10" expected Thursday and Friday, week's end fair.

Greater New York-New Jersey: Sunny and chilly through Wednesday, then snow and rain, freezing-rain over weekend.

Middle Atlantic Coastal: Cold with flurries, then Wednesday brings 5-8" snow, clearing by Friday and cold for remainder of week.

Piedmont & Southeast Coastal: Sunny and mild to start, cold snap and snowstorm from midweek on.

ACROSS THE LAND WEX IS WORKING

LET WEX GO TO WORK FOR YOU

Join the thousands of farmers who — on more than ten million acres — have made **WEX** an important part of their complete ag-program. Discover for yourself that — on crop after crop from germination to harvest . . . **WEX** is working.

WEX THE WETTING AGENT

- makes water wetter for greater saturation and penetrating power
- assists in suspension of wettable powders
- reduces foaming of ag-chemicals
- improves compatability of many ag-chemicals
- aids in more uniform chemical coverage

WEX THE NUTRIENT RELEASE AGENT

- contributes to superior root development
- causes more advanced crop development in the early growth stages
- encourages greater formation of secondary hair roots.
- increases real yield at harvest time

SEE THE DIFFERENCE WEX IS MAKING

WEX applied to the wheat on the right produced increased stooling, better developed roots and taller, stronger plants.

Compiled Data On WEX

The compiled data from all randomized, replicated research plots on corn reveals, with 99 percent degree of confidence, that where **WEX** was used at the rate of 16 ounces per acre, **WEX** did increase yields on those corn plots by over 5 percent.

It was much the same for root mass. The results of all our replicated research plots, using **WEX** at 16 ounces per acre we're 99 percent confident that the root mass was increased in excess of 10 percent.

Protecting the best crop

A Centre County dairyman once introduced his five children to me as being his "best crop."

A fellow can hardly disagree. After all, nothing we raise is anywhere near as important as our children.

With that in mind, it seems appropriate to devote some space here regarding the raising of children and how they are often influenced from the outside.

Specifically, the topic is children and violence on television — or for that matter, adults and violence on the tube. It's about time it comes to a stop.

The news last week about the American Medical Association calling for a review of the matter was welcome. They openly state that.

"TV violence is a mental health problem and an environmental issue. If the programming a child is exposed to consists largely of violent content, then his perceptions of the real world may be significantly distorted and his psychological development may be adversely affected."

AMA president Richard Palmer believes this problem is more serious than air pollution and wants those in the TV industry and sponsoring companies to do something about it. It's a step in the right direction.

Palmer says "TV has been quick to raise questions of social responsibility — the American people should be concerned with the types of values and role of models the media is presenting to a vast, youthful audience whose perceptions of society and reality and whose value systems are clearly in early development."

What the AMA says and does on this issue is commendable. Numerous other studies have pointed to the same problem. But let's not let it rest there.

What's needed is pressure from the

grass roots level to let advertisers and broadcasters and advertisers. Petitions are a good way to get the ball rolling.

If your Sunday School class is in need of a project, perhaps a crusade for healthier television should be on the agenda.

Farmers protect their corn and cattle from insects, their equipment from excess wear and rust. The "best crop" needs attention too.

The least we can do is turn the set off. But better yet would be to air our feelings to those who might be in a position to bring about some constructive changes.

For the record, NBC television has been found to be the most violent shows, according to a study undertaken by the National Citizens Committee for Broadcasting.

The top 10 sponsors of violent television, the NCCB survey showed, were Chevrolet, Anacin, American Motors, Kodak, Schlitz beer, Proctor and Gamble, General Foods, Burger King and Frito Lay. Sears and Schlitz have volunteered to review their sponsorships, with a goal in mind to give less support to violent programs.

The companies with the best records for sponsoring the least amount of violence on television are Peter Paul candies, Hallmark cards, Texaco, Whirlpool, Prudential, Jean Nate cosmetics, Shopper Toys, Green Giant, Keebler and Carnation.

The AMA has also concluded that an 18-year old youth has viewed "15,000 hours of television before graduation from high school and witnesses 18,000 murders and countless incidents of robbery, arson, bombing, forgery, beating and smuggling."

It's time to pull the plug on that sort of nonsense — not just for children, but for anyone who respects a good healthy life.

TAKE ME TO YOUR HOUSE

Lesson for February 20, 1977

Background Scripture:
Mark 8:34-38; Luke 19:1-10.

Devotional Reading:
Philippians 3:7-14.

Several years ago I arrived in the city of Jericho late in the afternoon following a long, hot, dusty drive across the Negev desert and along the Dead Sea. The familiar, low skyline of Jericho was a welcome sight to me, for Jericho is actually an oasis in the midst of the barren salt flats surrounding the Dead Sea. I remembered that somewhere in the town center there was a little shop where the man would squeeze big, juicy Jericho oranges into a tall refreshing drink. As I drove down the palm tree-shaded streets of what many regard as the world's oldest inhabited city, it was easy for me to "see" Jesus walking along this same street and short Zacchaeus peering down from a palm tree.

Zacchaeus, come down!

It occurred to me that Zacchaeus probably had to climb the tree, not only because he was short in stature, but also because he wanted to avoid mixing with the crowds. It was no secret to anyone: Zacchaeus was a despised man with whom no one wanted to associate. He was, after all, a tax collector for the Roman and occupation government. There was no vocation more despised than his. Then too, he probably had a reputation for being a cheat as well. Yes, Zacchaeus was up a tree for more than one reason!

Yet though he had been written-off by his fellow citizens of Jericho, Zacchaeus was not dead inside. Hearing of the approach of the much-heralded Nazarene prophet (and, some said, the Messiah), perhaps Zacchaeus felt a small surge of hope for himself. At least he was curious enough to want to see Jesus for himself. Perhaps as the Nazarene healed people of physical ills, he could somehow make his life whole again.

But he got much more than he had bargained for. At most he had hoped for a healing glance or word or maybe a touch from the Master. Imagine his delighted surprise, then, when Jesus looked up and hailed him with: "Zacchaeus, make haste and come down; for I must stay at your house today!" There in front of everyone who despised him, who looked down upon him, Jesus looked up and announced that he

NOW IS THE TIME...

TO RECOGNIZE THE VALUE OF LIME

As common as liming the soil has been in this country, we still have gardeners and farmers suffering from the lack of lime in their soils. The beginning point in any soil improvement program is to have it tested for lime requirement. When this need is satisfied, then it is time to do something else. Many lawn and garden problems are caused by the soil being too sour. Lime is needed to get the most benefit from fertilizers and from chemical weed killers. Many of the herbicides will not do a good job when the soil is sour. Therefore, we repeat that the first thing to do in trying to improve any soil is to provide the lime needed. Dollars spent for lime will make dollars spent for other items go much further.

TO SOW IMPROVED RED CLOVER VARIETIES

The limited supply of clover seed might make this article questionable; however, we suggest that growers of red clover at-

tempt to secure one of the improved varieties that have done well in research plots. We refer to varieties such as Arlington, Redland, or Kenstar. These strains of red clover have out-produced the regular varieties in test plots and will last longer; in the past most kinds of red clover will last only one year after the seeding year. Now we find the improved strains will continue to yield for two or more years. This should be of benefit to all red clover growers. The limited seed supplies this spring might prevent wider use of these red clovers. We urge prompt attention in ordering for those interested.

TO CONTROL JOHNSON GRASS

This is not the month (February) to control Johnson Grass, but it is the time to be making plans for its control later this year. We feel that Johnson Grass is a real threat to much of our crop land and warrants some immediate attention.

[Continued on Page 39]

Elizabethtown Area Young Farmers meeting, 7:45 p.m. at the high school. Subject: Farm machinery.

would honor him by staying in his house!

They all murmured

The people were shocked: "He has gone in to be the guest of a man who is a sinner." Yes, once again Jesus displayed that unpredictable tendency to go to people who needed him, not those who believed they deserved him. We can imagine that there were several people in that crowd who had hoped that Jesus might spend the night with them. Perhaps they were insulted that he chose a disreputable wretch like Zacchaeus.

As I sipped my orange juice in the cool of the shade of a towering palm, I smiled to myself as I put myself in Zacchaeus' place. How excited he must have been as Jesus entered his house. Assured that God loved him despite the hostility of the community, Zacchaeus' heart overflows in grateful commitment: he will return to anyone he has cheated four times what he took from them and he will give half of his wealth to the poor. There will be a new Zacchaeus from this day forward!

Have you considered what might happen if Jesus were to come to your house?

RURAL ROUTE

By Tom Armstrong

ANTHRACNOSE?

Plant Saranac AR alfalfa and forget about it.

When anthracnose hits a field, ordinary alfalfas fold up and fade away. In the same field, Saranac AR keeps coming on strong to produce the kind of yields farmers expect from an alfalfa named Saranac.

And when it comes to bacterial wilt and hard winters, Saranac AR doesn't give up a thing. Highly wilt-resistant. Able to take the toughest winters. It's the strongest growing alfalfa you can plant.

Saranac AR. The right one wherever anthracnose threatens the ordinary alfalfas.

Bred for your kind of land. Bred to meet your seven and eight ton objectives.

For more information on this outstanding alfalfa that resists anthracnose and keeps coming back strong, see your dealer:

Omaha

February 17, 1977
Weekly Cattle 51—
Compared with the previous week's close—closing prices on Slaughter Steers were weak to 25 lower. Heifers closed fully steady. Cows were 1.00-1.50 higher, and Bulls firm to 1.00 higher. Four day receipts 13,400 as compared 14,300 previous week and 14,800 a year ago. The fed cattle trade followed

a pattern much like the past several weeks. Prices were forced downward the fore part of week in reflection of a bearish carcass trade, and then most of the early downturn was regained on a midweek advance as carcass prices strengthened and supplies dwindled. Over the past several weeks, the trade has generally been lacking in any continued aggressiveness and at times on a hand-to-mouth basis. Despite the moderate day-to-day price variations, the past five week period has registered a net change of only 25-50 upward. A large share of the Steer and Heifer supply for the period was of Good to Average-Choice grade. Steers made up approximately 40 of the week's total and heifers 37. Cows comprised 13 and Feeders 6.

STEERS: At midweek, load and part load Choice and Prime 3 1036-1113 lbs. 39.00, several loads same grade 3-4 1145-1224 lbs. during week 38.25-38.75. Choice 2-4 975-1300 lbs. closed 37.75-38.50. Mixed Good and

Choice 2-4 950-1250 lbs. 37.00-37.75. Good 2-3 34.00-37.00. Small lots Standard and Good 2-3 31.50-33.00.

Average of LS 214 detailed quotations, for Choice 900-1100 lb. steers this week 38.00; Choice 1100-1300 lbs. 38.02. average weight steers first three days 1131 lbs. compared 1158 lbs. previous week. Average weight Heifers first three days 980 lbs. as compared 992 lbs. previous week.

HEIFERS: Several loads Choice and Prime 3-4 975-1081 lbs. 37.40-37.50, some same grade 4 1008-1109 lbs. 37.00. Choice 2-4 875-1075 lbs. closed 36.00-37.50. Mixed Good and Choice 2-3 850-1000 lbs. 35.00-36.25. Good 2-3 31.50-34.50. Small lots Standard and Good 2-3 30.50-31.50.

COWS: Utility and Commercial 2-4 23.50-25.00, few 25.50-26.00. Canner and Cutter 21.00-23.50, mixed Cutter and Utility 23.75-24.00.

BULLS: 1-2 1400-1800 lbs. 30.00-33.00, individual 1 34.00-35.00.

**CAN YOU HAVE
PEACE OF MIND
IN A CONCRETE SILO?**

CERTAINLY!

★When you have stored tons of valuable feed in your silo you want to be sure it isn't - spoiling!

**WHAT YOU CAN'T SEE
CAN HURT YOU**

★Star's Energy Pak gives you a permanent, granite-like structure to put your confidence in.

★Compute analyzed pressure test is done in the presence of the owner.

★Eye level breather bag system in the base of your silo monitors the airtightness of the silo.

THAT'S PEACE OF MIND

★Call the Peace of Mind people at Star Silo and add confidence to your crop storage next summer

JEWELER NO. 1 JERSEY BULL FOR

PREDICTED DIFFERENCE MILK AND DOLLAR VALUE

SEPT. 1976 USDA SIRE SUMMARY.

Sire: Milestones Generator 602658 V [87]
Dam: Jewellers Raleigh Betty 2585740 V

JEWELER is an udder bull. His medium sized daughters in Georgia are extremely dairy with superior rear udder attachments. They have great udder quality, correct test size and placement, and strong udder support.

Along with JEWELER's high milk proof we are expecting a very good type breakdown. We just classified 31 of his daughters and they scored an average of 83.0. Generator is gone... but Jeweler is here, your opportunity to continue his great influence in your herd.

For semen or service from JEWELER, contact your local ABS representative.

SHEEP 17. Few Good and Choice 60-70 lbs. woolled slaughter lambs 46.00-50.00.

Join your fellow pork producers in supporting pork promotion and production research to keep hogs a profitable farm enterprise. Tell your market or buyer that you want 10 cents per market hog or 5 cents per feeder pig deducted to support these programs. Most markets and buyers will cooperate fully if you let them know.

The PPPC was formed and is funded and directed by producers. There is no Government Agency involved. For more information, contact:

A FULL SERVICE BANK

AGRI-KING
KEY TO PROFIT

GROSS INCOME — NET PROFIT IS THERE A DIFFERENCE?

Yes, and it is very important to know the difference.

It is not nearly as important to know how much a ton of feed costs as it is to know the profit per cow per day over total feed cost, because that is what you have left to take to the bank.

Many farmers today have been tricked into buying something without even knowing if they need it. There is only one way to get the most profit per head of livestock and that is to test what you feed and feed accordingly. With today's rising feed costs the dairyman cannot afford to feed by guesswork any longer. He must know what is in his silage, hay and grain and make the grain ration according to these tests, properly balancing the protein & energy, calcium & phosphorus, vitamins & trace minerals, so that they meet the requirements of today's cow with high levels of production.

If you would like to know more about the Agri-King way of feeding cows, please contact your nearest serviceman or write to George DeLong, 225w. Woods Drive, Lititz, Pa. 17543.

Dairymen! LET US CHECK YOUR MILKING MACHINE'S PERFORMANCE!

— WITH OUR
DETCO
GRAPH MACHINE

NO CHARGE! NO OBLIGATION!

If you have a problem of teat and udder erosion in your herd—chances are you are milking with unstable vacuum. And, as more and more animal health authorities have been agreeing that many teat and udder injuries—which have contributed to the spread of mastitis—have been caused by unstable milking vacuum—you should have your milking machine's performance checked.

We'll be happy to do this for you with our DETCO Graph Machine. It's a remarkable, new invention that records vacuum readings at the milker units attached to the teats, recording the milking vacuum and pulsating vacuum simultaneously. And tells you in easy-to-understand graph form, as shown in the photo above, if you are milking with unstable vacuum at the teat end.

Increasing the size of your vacuum pump and the size of your air and milk lines are good recommendations. But if you still don't have stable vacuum at the teat ends—investigate our ZERO CONCORD Twin-Vacuum Pipeline Milking System. It's a combination of a revolutionary pipeline milking machine and the ZERO Completely-Automated Vacuum Bulk Milk Cooler. It was designed especially to milk with stable vacuum at the teat ends to prevent teat and udder injuries caused by milking with unstable vacuum. And has many other advantages.

CATTLE 153. Compared with last Wednesday's market, slaughter cows steady, mostly 25 cents higher, spots 50 cents higher. One Good slaughter steer at 33.75, few Standard 31.60-33.25. One Standard slaughter heifer at 30.25, Utility 25.50-29.25. Utility & High Dressing Cutter slaughter cows 26.00-28.35, couple 28.50, Cutters 24.10-26.00, Canners 21.25-24.00.

Yield Grade No. 1 1100-1875 lbs. slaughter bulls 321.00-34.75. Few Good & Choice 500-800 lbs. feeder bulls 28.00-32.00.

CALVES 189. Vealers grading Standard & Good 70-110 lbs. \$1 to \$4 lower. Few Choice vealers 60.00-66.50, Good 44.00-59.50, Standard & Good 110-130 lbs. 34.00-44.00, 90-105 lbs. 30.00-36.00, Standard 70-85 lbs. 24.00-30.00, Utility 60-80 lbs. 15.00-25.00. Farm calves, few holstein bulls 95-120 lbs. 36.50-43.00.

HOGS 310. Barrows & Gilts steady to 50 cents lower. US No. 1-2 200-230 lbs. barrows & gilts 41.60-42.60, No. 1-3 190-240 lbs. 40.50-41.80, few lots

No. 2-3 255-265 lbs. 37.50-38.90, few lots No. 1-3 180-185 lbs. 40.30-40.60. US No. 1-3 300-550 lbs. sows 30.50-37.00. Boars 17.00-21.50.

FEEDER PIGS 371. US No. 1-3 20-35 lbs. feeder pigs 19.00-26.00 per head, No. 1-3 35-50 lbs. 25.00-28.50, No. 1-3 75-100 lbs. 29.50-32.50, Utility 40-80 lbs. 16.50-20.00 per head.

SHEEP 27. Few Choice 70-115 lbs. woolled slaughter lambs 49.00-52.50, few Good 60-80 lbs. 42.00-48.00. Few Slaughter ewes 12.50-15.50.

INTRODUCING THERMA-STOR

Dairy Equipment Company Madison,
Wisconsin has added a new energy
saving Therma-Stor condensing unit to
its Dari-Kool Bulk Milk Cooler Line.

The Therma-Stor is a major improvement in water cooled condensing units. This unit has an all stainless steel heat exchanger combined with a 150 gallon stainless steel storage tank. This unit provides enough 110 degrees water for prepping cows and general use while milking. It also stores 110 degrees water for use between milking. In addition the Therma-Stor produces 50 gallons of 165 degrees for pipeline wash-up after milking. This unit is available with a single or dual condenser.

A NEW WATER COOLED CONDENSER - THERMA-STOR

For years water cooled condensing units have been used not only for bulk milk coolers, but refrigeration units of all types. The main reason water was used, was to lower the condensing temperature of the refrigerant. This increased the efficiency of the condensing unit.

Large quantities of 70 degrees - 80 degrees water was the useless by-product of these units. Because of the high original investment and maintenance cost, this style unit is not commonly sold on milk coolers today.

Then things changed. Energy costs have doubled on most farms in the last few years, 165 degrees F water now costs a dairyman ½ cent, to 2 cents per gallon. The average dairy uses two gallons of hot water per cow, per day for udder washing, sanitizing, washing equipment, feeding calves and general clean up. This means an average cost of \$2-day or \$700-year for a 100 cow dairy. This revived the water cooled condenser concept for dairy farmers. A modern dairy used 110 degrees water for equipment sanitizing, udder washing, rinse cycles on the pipeline and the bulk cooler, calf feeding and hand washing. Only the wash cycle of pipeline and the milk cooler require an elevated water temperature of 165 degrees F. The profile of usage on an average 100 cow dairy is 400 gallons of 110 degrees water and 70 gallons of 165 degrees water.

A water cooled condenser can deliver 165 degrees water, but the condensing temperature would be very high. The results would be poor efficiency and short compressor life. The lower the condensing temperatures, the higher the efficiency and the longer the compressor life.

One of the innovations on the market today generates a gallon of 100 degrees water for every gallon of milk cooled. It also generated 50 gallons of 165 degrees at each milking. This unit combines an insulated 150 gallon stainless steel storage tank and a stainless steel heat exchanger into one. The condensing temperature in this unit is determined by the 110 degrees water. The 165 degrees water is generated by desuperheating the refrigerant. Storage of the 110 degrees and 165 degrees water is necessary for usage at times other than milking.

A small backup 165 degrees water heater is recommended. There is no need for a backup on the 110 degrees water because excess is usually generated. The refrigeration system is very conventional regarding controls, valves and compressors. The condenser storage tank is the only special piece of equipment required. This condenser storage tank can be added to most refrigeration systems.

The investment of this equipment is returned by the savings in electrical energy in a year or two on the average dairy.

With the addition of Therma-Stor to an existing air cooled condenser refrigeration system your milk house can be partially heated and there is no water wasted. Average investment for a stanchion barn or small milking parlor will be in the \$1300. area.

Energy crisis

[Continued from Page 1]
especially concerning the manufacture of fertilizer, he would not commit himself. He said the PUC has

hearings regularly to rearrange priorities on natural gas needs, and that agriculture would be given

consideration as the need arises.

The tone of the meeting was dismal as one official after another drove home the fact that the country is in a real crisis situation. Speakers also made it clear that a few days of pleasant weather will not put an end to the problem.

Bloom, speaking for the PUC, said, "The problem won't go away after today." He predicted that in the 1980's "we will be back with electricity and the same problems."

Bloom said he doesn't believe conservation will solve the problem. He said,

"We must provide the economic incentive for these industries to solve the problems, and that means profit. We must pay for what we get." He said further that he was not for "de-regulation" of natural gas, but for "enlightened" regulation. He called the situation desperate.

Joseph LaSala, Philadelphia area administrator for the Federal Energy Administration, said the country is "in a period of resource shortage." He said, "Things are measurably worse now than they were three years ago during the Arab oil embargo. The impact of natural gas on our lives in the last six weeks is worse than the oil embargo. Production is in a state of dramatic decline and consumption is up. We must get at natural resources."

LaSala says there is a real need for conservation, to treat our resources with care. He foresees a mandatory conservation act, because "voluntary efforts won't work. They didn't with the oil embargo."

Speaking for the governor's Energy Council, William Harral said, "The crisis will not be done and gone with. Although this severe winter precipitated the crisis, it will be with us for several years to come." He explained Governor Shapp's proposal to revitalize the coal industry, as well as to embark quite heavily on extreme conservation in the state government.

William Howard, a West Virginia spokesman for the Columbia Gas Transmission Company blamed the crisis on apathy on nearly every level of government. He said, "The keystone of solving the future energy problem is through the use of coal." He said gas-fired electric power generating stations must be converted because "we can't waste the gas."

He called for strict mandatory conservation measures, but he said the biggest difficulty will be the constant battle with "would-be environmentalists." He said environmental considerations cost a lot of time and money.

Columbia Gas spokesmen were very pessimistic about the possibility of getting more natural gas for industry before April 1, even though arrangements are continuing to contract for gas from the west coast. And unless emergency purchases can be made, some cutoffs could continue into summer

Lancaster Farming, Saturday, Feb. 19, 1977—15

Congressman Bob Walker

so that reserves can be built up for next winter.

Several electric utility spokesmen concurred that there is no escape from the very serious problem. Many said they had foreseen the problem and had tried to warn of the potential crisis.

According to Congressman Walker, up until now Congress has not given energy proposals any priority, and have been

unwilling to accept solutions which might be politically unpopular.

Speakers at the meeting seemed to agree that Congress must act now and act quickly and firmly to start to correct what are long-range energy problems.

But it was made quite clear that even though we may get through this winter, there will be many cold winters in the future.

SHIVERS CIRCU-LATOR

Circu-Lator transforms your drying bin into a totally automated Continuous Flow System with drying capacities of 1,600 to 6,000 bushels of corn per day (25 percent - 15 percent) depending upon bin and fan size. It dries high moisture grain (30 percent and above) with ease, and operates around the clock without babysitting.

With the Circu-Lator, your entire bin becomes a surge tank—fill it as fast as you harvest. When adjacent storage bins are full, the Circu-Lator becomes a high capacity Recirculating Batch Dryer which may be rapidly filled to the eaves.

Check into the Circu-Lator. See why the Best Continuous Flow System is Also the simplest and least expensive.

Family farms

[Continued from Page 1]

Merrill, Lynch, Pierce, Fenner and Smith, Inc.

The plan, already under fire from several members of Congress, proposes to use mutual funds to buy working row crop farms and operate them under a system of leases and sharecropping agreements. It has been described as a new investment vehicle to be marketed to trustees of pension funds and other tax-exempt institutions.

The Internal Revenue Service has been asked to rule on the tax-free status of the operation. In his letter to

Congressmen, Snyder asked: "If this type of farming operation is tax exempt, should not the same exemption be extended to every farmer in the nation?"

John W. Scott, master of the National Grange, has called for Congressional investigative hearings on the plan.

"This raid on productive agriculture land is outrageous and must be stopped," Scott said. "The long range effects could be devastating to both our family farm system and thousands of small

businesses in rural communities."

The National Grange has asked the Internal Revenue Service to delay its ruling on the tax exempt status of the plan until Congressional hearings can be held. "Tax exemptions for a land grab of this kind are totally unfair to every tax paying citizen," Scott declared, "and the

Grange is prepared to take the matter to court if necessary."

Shelhamer

[Continued from Page 1]

complaints and suggestions from Pennsylvania's agricultural interests.

The new secretary of agriculture does not want to run his office single-

handedly, however. While accepting responsibility for final decisions, he says he will not make them without consulting others who can inform him on possible effects of a decision. "It'll be a

team and coach or cabinet type of affair," he explained. "Four, six or 12 heads are better than one," he continued, continually stressing his desire to do the best he can for Pennsylvania agriculture.

Shelhamer was confirmed to the top ag post on Monday afternoon by a vote of 47 to 0. The legislative action gave the state its first permanent secretary of agriculture in more than a year, bringing to an end the controversial issue surrounding former ag secretary James McHale, who was replaced a year ago by Acting Secretary of Agriculture Raymond Kerstetter. Kerstetter resigned on Jan. 14. A day later Governor Milton Shapp appointed Shelhamer acting secretary of agriculture. The senate approved the appointment on Monday and thus closed an unusual chapter in the history of the state's agriculture department.

Shelhamer professes a solid faith in farm people. As an example of that, he described one of his personally recruited and trained aids - Neil Buss, a

former Lehigh County agent, who comes from a farm, earned his Ph.D. and "never really got both feet out of the barnyard," according to Shelhamer. On the latter, he emphasized "I think that's a plus, not a minus."

The new ag secretary does not personally believe that a formal education is necessary to serve in his department. "Too much precedent has been put on that sometimes," he stated. "It doesn't hurt to have a Ph.D.," he added, "but I'm not necessarily dazzled by it."

Showing his identity with a down-to-earth philosophy some more, Shelhamer said: "The problem with too much professional education is that those kind of people sometimes forget how farmers do things. There's too much theory. There's a time when you must take your dreams and theories and come down to reality and practicality."

Applying his philosophy to a broader spectrum, Shelhamer opinionized that "probably every department in government would benefit

Lancaster Farming, Saturday, Feb. 19, 1977-17

from this type of 'medical check-up'."

In this month's issue of the *Agriculture News Bulletin*, published by the Department of Agriculture in Harrisburg, the new secretary is introduced in the following words:

Shelhamer is the first Pennsylvania Agriculture Secretary to come from the ranks of the legislature with long-term service, and he feels his experience in the House will help him in his job at Agriculture.

"I am in a unique position," Shelhamer said, "to tell the farmers story and to take the necessary steps to dignify our farmers and improve their economic condition. I want to make the public aware of the common interests between our farmers and consumers. When we realize that we are all partners in progress, we will begin to see some action which will benefit all of us, not just special interests."

Shelhamer said he hoped that under his direction, the Department would "expand our services to the public even beyond our already well-established regulatory efforts."

While proud of his farm background and considering it a strong asset, Shelhamer also values the 12 years of experiences he has had in the legislature. And he admits to being a politician. Although "officially" a Democrat, he says he'll run his office on a bipartisan basis. "I don't want the Department of Agriculture to be bogged down with partisan issues," he told *Lancaster Farming*.

"I'm conservative for a Democrat, and most farmers are conservative," Shelhamer remarked. "Some would think I'm more Republican than Democrat," he continued, stressing that the "right kind of registration" will have very little to do with job qualifications in his department. Summarizing his views on that subject, Shelhamer said "I'm a politician, I know the system and I respect the system."

As secretary of agriculture, Shelhamer has two top priority projects. The first is to promote area marketing by farmers themselves. As a fruit grower, Shelhamer has had considerable experience along that line. "I was born and raised by a Dutch father," the farmer-legislator-ag secretary said. "We were taught to always strive for quality. After you've grown it (your product) you have to convert it to cash. Marketing has been strongly overlooked in the past. Pennsylvania is an unusual state, with many medium and small-sized operations. We're diversified. If we're going to

PFA

[Continued from Page 1]

now there are eleven products on their order sheet. Hunter says, "Nobody ever pictured how it would grow."

All products are packaged under the Penn Best label, the exclusive name for PFA, Newcomer said. He explained that a committee decides which products should be included, but that the products must be easily packaged, must be in demand and must be something which it pays to handle.

Hunter explained that it was a policy decision of the board of directors to emphasize quality. "We try to get the best of what's available at the time. We run quality control."

Newcomer said the buying of products is done by the state Association which also ships the orders to local vendors where consumers can pick up their produce. In Lancaster County, Kreiders' Dairy, Manheim, has been the only vendor, but Groff Orchards, Kirkwood, will begin as a vendor with the March order.

Newcomer said, "We would like to get three or four vendors, and we pay the vendors for their work." However, he pointed out that vendors must be willing to provide the work as a service until the volume is built up to make it worthwhile.

Newcomer said, "Right now we're looking at milk jugs and other farm owned retail businesses as vendors, because it helps the public get acquainted and hopefully increases their sales." He said they hope to get vendors spread around the county so that potential participants in the program do not need to drive so far to pick up their orders.

Mrs. Newcomer, who had come with her husband to pick up their order from Kreiders', said, "We are very satisfied with the products. We gave some of the fruit as Christmas presents, and received excellent comments on it. And the ham we had was delicious."

While expressing concern that the program "is not going over like we would like it to," Newcomer said, he is optimistic about the future. "There are a lot of possibilities. A lot of people

are looking to buy products direct."

Hunter agrees, "I think we can tap into the general trend towards direct marketing."

Newcomer said he feels that once information gets around, the program will begin to take hold. He expressed hope that more members will take advantage of it, and said they would like to have order blanks distributed to service clubs, factories and other interested groups.

As for local grocers who might feel threatened, Newcomer said none has complained yet. He added that he doesn't think they will because the program will not take the place of other markets. He said that PFA will not handle a product if the same quality is available just as cheap elsewhere.

Hunter said, "This program is a baby. We are real enthusiastic about the potential. We feel most consumers are willing to pay a fair price for products. It is not designed to compete with other food outlets or provide a cheap food."

But, he added, "The success will depend on the desire and the attitude and the willingness of members

Dick Shellenberger, Kreider's Dairy manager, and Earl Newcomer load some PennBest apples into Newcomer's car. Newcomer is

president of the Lancaster County Farmers Association, which is active in promoting sales of farmers' products.

to make it work. We believe it can and it will work."

He emphasized that this program is different from anything that has been attempted before, because it involves the farmer from producer to consumer. Currently, 42 counties participate.

In Lancaster, anyone interested in receiving order blanks can contact Newcomer at 872-2646, Kreiders' Dairy, 665-4311 or Groff's Orchards, 529-2249. The next orders are due on March 7 and will be delivered the week of March 28. Vendors notify con-

sumers as to specific date, and consumer pay cash when they pick up the order.

In Chester County, contact Kolb's Farm Store, Kolb Road, Spring City; Goshenview Farms, West Chester; or Richard Bar-

717-299-2541

BANVEL®+LASSO®*

pre-emergence herbicide

A giant step toward total weed control in corn.

EFFECTIVE CONTROL OF BROADLEAF AND GRASSY WEEDS WITHOUT CARRYOVER PROBLEMS

What degree of weed control will you settle for in your corn? Most of the thousands of growers we've talked with on the Banvel® "Hot Line" seem to expect at least 90 percent control. And, most of them have been getting it with the pre-emergence, post-plant application of Banvel® + Lasso® tank-mix.

An important advantage of this combination which growers appreciate is freedom from worry about carry-over, particularly following a year of droughty conditions.

*LASSO® is a registered trademark of Monsanto Company. The Banvel® + Lasso® tank-mix is cleared for use in Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, New York, North Dakota, Ohio, Pennsylvania, South Dakota and Wisconsin.

HOW TO ACHIEVE 90% OR BETTER CONTROL ON LABELED WEEDS

Here are the most important steps to successful results with Banvel® + Lasso® tank-mix:

- Apply Banvel® + Lasso® strictly according to soil type and percent of organic matter. The Banvel® + Lasso® label spells it out for you.
- Incorporation is not only unnecessary, it is undesirable other than under extreme drought conditions; even then, incorporation should be no more than ½-inch.
- If you apply Banvel® + Lasso® with liquid fertilizer, check compatibility of the liquids first by mixing proper proportions in a small container.
- Use the right kind of nozzles and screens. The label is specific on this point.
- This combination should not be used on any sandy textured soils.

Note: Before using any pesticide, read the label.

THE BANVEL® TOLL-FREE "HOT LINE" IS FOR YOU

Questions about Banvel® or its uses? Call the Banvel toll-free "Hot Line" 800-621-4129. Illinois callers 800-972-8381. Call between 9 a.m. and 4 p.m., Monday thru Friday. Calls placed outside of these hours will be automatically recorded and answered within 48 hours by phone or mail.

Success 'crept up' on Hershey Equipment Co.

By JOANNE SPAHR
CENTERVILLE, Pa. - Twelve years ago they wouldn't have believed it - even four years ago they may have been a slight bit skeptical if a fortune-teller had looked into her crystal ball and foretold, "By 1977 you will have tripled your present (1973) business, doubled your staff of employees, and moved to a new location with three times the warehouse space."

"No," these pleasant, down-to-earth people would have said, "You must have us mixed up with somebody else." But, not so. Hershey Equipment Co., Inc., 255 Plane Tree Drive, Lancaster, has had all these changes happen in recent months, and is moving even further ahead with a new line of egg processing equipment.

The "Hershey" part of "Hershey Equipment Co., Inc.," refers to the proprietors, Donald and Joyce Hershey, Millersville R1. They are a husband and wife team who head up this family operated business.

The "Equipment" part of the title refers to the poultry and livestock equipment which they sell, install, and service. By the time Summer and the hot month of July roll around, they will have been selling Big Dutchman equipment for four years. And, this year marks the 12th anniversary of their installation business.

The reason for the discrepancy between the years of distribution and the years of installation is that in this fast-paced, get-ahead, step-over-everybody-else-to-

be-on-top world, success, in a sense, crept up on the Hersheys. They began as poultry farmers about 12 years ago, with Don installing poultry equipment as a part-time job.

"He and another man would install, and I'd gather the evening eggs," smiles Mrs. Hershey, a warm, gracious woman. "Sometimes they'd work until 10 or 11 at night."

At that time the Hersheys worked out of their home with Mrs. Hershey doing the bookkeeping.

It turned out that their service was so good, and they filled such a need in the poultry and livestock industry, that their business mushroomed even without the aid of advertising until the farming end of their livelihood had to become part-time, and the business of equipment installation became the major focus.

Then, in 1973, the Hersheys decided to take on the dealership of Big Dutchman equipment and they moved their place of business from inside their home to New Holland.

Back then, they had 20 employees and 10,000 square feet of office and warehouse space, and today they have 45 employees and 30,000 square feet of space. This was necessitated by the tripling of their business. Of their employees, 35 are on the installation crew.

And, now, instead of just servicing their local area, the Hershey Equipment Co. covers the three states of Pennsylvania, New Jersey,

Virginia, and a small amount of Maryland and West Virginia.

Mrs. Hershey, who has grown along with the business and is now secretary-treasurer of the organization, modestly but proudly attributes the company's recent growth spurt to the fact that they started out as a service-oriented organization which handled a reliable line of equipment, and that they could build their distributorship on an established name. She also says that the key to the business is service.

"In this type of business, you have to back your product, because if something goes wrong with the automation, the

[Continued on Page 33]

Mrs. Joyce Hershey did all the interior decorating at the new headquarters of Hershey Equipment. This light and floral arrangement was her choice for beautifying the receptionist's area.

"Kick" up corn profits with Unipel® Starter Special 13-34-10.

This is the "corn-popper" special...the most imitated pop-up fertilizer on the market. As part of a Unipel corn fertility program, it suits perfectly the young corn plant's immediate craving for nutrients to develop a good root system, the starting point for top yields.

Yet, it's also a complete fertilizer with these key nutrients available in each Unipel pellet:

- * quick-acting, non-volatile nitrate Nitrogen that starts working immediately, even in cool, wet, early-season soils;
- * slow-acting ammoniac Nitrogen that provides continued feeding through the growing season;
- * both quick and slow acting Phosphorus to resist fixation, team with Nitrogen to become more efficient and feed plants for solid growth, help develop strong root systems;
- * vital Potash to furnish young plants with building blocks for strong roots, tough and hardy stalks to resist weather and stress of pests and disease.

We can recommend to you the program details for a sound Unipel fertility program —which, on Starter alone, has returned over \$30 an acre above fertilizer investment more than blend "bargain" programs.

nard, Kennett Square. In Lebanon County, Ja-Mar Dairy, Annville is the vendor and in York County contact Perrydell Farms, Indian Rock Dam Road, York; Wolf Farms, Stewartstown; or Ashcombe Dover Diry, Dover.

Milk production both statewide and nationally is up considerably, as a report on page 59 of this newspaper explains in greater detail.

One of the reasons for the surplus situation is the generally favorable price situation dairymen have had during the past year or so.

This is no time to increase milk prices, some industry leaders are saying in view of the surplus situation. Chances for higher prices are very real, however, since USDA has authorized a revision of the floor price,

effective April 1. The revision would readjust milk prices to 80 per cent of parity and could mean a 30 to 40 cent rise in prices per hundredweight. The concern over that happening is rooted in the fact that right now, supplies are significantly greater than demand, and with the trend continuing to push in that direction, a burdensome situation could develop.

Inter-State's general manager, Honan, told District 7 members here on Thursday that "we have more milk than we need. This Spring would be a good time with which to live with your present base."

To help alleviate the problem of moving milk, Inter-State and Maryland Cooperative Milk Producers of Baltimore are going ahead with plans to build a dairy manufacturing plant near Mount Holly Springs in southern Cumberland County. Inter-State and MCMP officials have studied the proposed plans for a plan thoroughly and see no reason not to build it.

Due to Pennsylvania having such a surplus of milk, it's possible that Inter-

State may have to ship some of its supplies to Ohio over upcoming holiday periods, Honan remarked. Defending the move to build a manufacturing plant of their own, Honan said "We have to take care of ourselves." Independent studies of the venture have come out looking even better than those done by the dairy cooperatives themselves.

In other activities at the District 7 meeting, the following were elected to offices or delegate positions:

In the Donegal local, Donald Hershey will serve as president; Ray Sauder, vice president; Paul Garber, secretary-treasurer; Delegates are John Wenger, Galen Benner and Harold Brubaker. The alternate slots were filled by Leroy Rutt, M. Clair Hollinger, and Earl Landis.

Ray Bollinger will serve as president of the Lititz local, with Lester Good as vice-president; and Dan Martin as secretary-treasurer. Delegates are Galen Crouse and Earl Stauffer. Alternates are Clyde Buchen and Noah Kreider, Jr.

Lebanon County local officers are Donald Hoffer, president; J. Melvin Brandt, vice president, and Howard Kapp, secretary-treasurer. Arthur Brandt and Ellwood Zell will serve as delegate and alternate delegate, respectively.

Lancaster Farming, Saturday, Feb. 19, 1977—23

Dairy breeding slated topic

for upcoming meeting

LANCASTER, Pa. — Dr. Larry Hutchinson, Penn State University Extension veterinarian, and Harvey Shaffer, P.S.U. dairy specialist will be the featured speakers at the first of two Extension sponsored meetings to be held for dairy farmers in Lancaster on the subject of dairy cattle breeding. This program will be held at the Farm and Home Center at 7:30 p.m. on February 21, 1977.

According to N. Alan Bair, Extension dairy agent in Lancaster, the topics to be presented at this meeting will include the relationship of reproductive efficiency to

feeding, general health and management, as well as the importance of using breeding tools such as proper timing of service.

Dr. Robert Gutzwiller will be featured at the second meeting in the series held March 7, 1977. Dr. Gutzwiller will address the subject of breeding from the viewpoint of a practicing veterinarian specializing in bovine reproduction.

Hoffman is 'Man of Year'

UNIVERSITY PARK, Pa. — John C. Hoffman, of 209 Summit Avenue, Quarryville, a salesman for the Lancaster Bone and Fertilizer Corporation, has been named 1976 "Man of the Year" by the Pennsylvania Plant Food and Protectant Educational Society.

Hoffman received the award, a plaque, at the society's recent annual meeting on the Pennsylvania State University Campus.

According to Professor Robert F. Fletcher, Extension vegetable crops specialist at Penn State, awards committee chairman, Hoffman, former owner of the Lancaster Bone and Fertilizer Corporation, was cited for his con-

tributions to the state's plant food industry.

A 1934 graduate of Danville High School, he then enrolled at Penn State, receiving a bachelor of science degree in horticulture in 1938.

In 1939 he began his employment with the Lancaster firm, purchasing the business from the original owner, H.H. Huffnagle, several years later. In February 1975 he sold the corporation to Jack Dantine but continues to serve as a salesman and consultant.

Active in the Pennsylvania Plant Food and Protectant Educational Society, Mr. Hoffman served the organization as president, vice president,

and a member of the board of directors.

Hoffman is a member of the St. Paul's Church of Christ Choir; Masons; Lions International; Southern Lancaster Sportsman's Organization; and served as a school board member.

Hoffman also distinguished himself in the southern Lancaster County area as a philanthropist. The recently expanded facilities at the Solanco Fairgrounds were largely made possible as a result of his donations and efforts. The new Community Building was erected as a result of his monetary contribution to the Solanco Fair and is named for his late wife, Sara Fuhrmann Hoffman.

John C. Hoffman, left, a representative of the Lancaster Bone and Fertilizer Corporation, receives 1976 "Man of the Year" Award from Professor Robert F. Fletcher, Penn State Extension vegetable crops specialist.

Shelhamer

[Continued from Page 17]
salvage the family farm, we'll have to put more emphasis on marketing."

Shelhamer had high praise for the family farm, telling of how he and his wife raised five children on their Columbia County farm near Berwick. "The family farm is the salvation of the country if we could have enough of them," he remarked.

The second project dear to Shelhamer's heart is to improve the rural scene as a whole. Upgrading transportation is one example he cited. "If no one else will develop these programs, then we'll at least point them out," he said. "But we don't have the money. We have the capacity to tell other

responsible agencies what help is available to improve rural Pennsylvania.

Not one to sit still or rest on his laurels - of which he has quite a few (his most prized award is the Honorary County Agent Award which he proudly displays behind his desk) Shelhamer spends 10 hours daily on his job. "I do what's equivalent to a Sears Roebuck catalog every morning," he said. Every Monday he holds a conference with people in the department who can advise him and offer diversified opinions. "I do not want to be an isolated secretary," he said.

In concluding the visit by this reporter, Shelhamer said he wants farmers to feel

that his door is open. "Write a letter, give me a call," he said.

Along that line, Shelhamer has also made himself available to numerous speaking engagements across the state. On Feb. 25 he will be guest speaker for the Elizabethtown Young Farmers. On March 17 he addresses the Lancaster

County Conservation District's annual banquet in Smoketown.

"Bring us your problems and we'll see what we can do," Pennsylvania's new agriculture chief concluded.

FUTURE FARMERS

Being aware of hard times coming soon and suddenly, and probably our turn of drought, we try to help the farmers to prepare their soil for water holding capacity with fertilizers, minerals and enzymes that mellow the soil and last longer than chemicals to tide you over a bad year. Our products do both, and our Shur-Gro all natural fertilizer, from the largest organic fertilizer company in the U. S., equals chemical yields. That is good news because it also builds and loosens the soil and doesn't kill earthworms and bacteria.

A SHUR-GRO company sponsored MEETING

PLACE - Blue Ball Fire Hall. On Route 322, one block east of Route 23 intersection.

Time - Wednesday, March 2, 1977

Free dinner served, then a second session after dinner. There is much to say. Main speaker is Philip A. Wheeler, a soil consultant from Nature's Way farm in Michigan. He handles a No. 10 complete soil test with the cation exchange capacity. Wait to order your fertilizer till you hear him.

The Organic Center

381-A East Jackson Street
New Holland, Pa. 17557

Phone 717-354-7064
(Open Monday thru Friday only)

We have extraordinary minerals-Nat-ur-min (M42 G) from a natural deposit. Very good for all livestock and poultry. Stop pig cannibalism, chicken picking, wood chewing, etc. but especially good for brood mares, sows, cows and poultry breeding flocks. For testimonials write which one you are interested in. Same mineral is excellent on the soil in small amounts for making quality, disease free crops, taking less fertilizer and softening the soil.

HUGE ORGANIC VEGETABLE MARKETS are opening up to us, if we have quantity at our warehouse, and quality like our products produce. More growers needed. Many children can't tolerate chemicalized food, so Beechnut Baby Food is going organic. They will probably capture the market, then other processors will take the hint like they did with Granola cereal. Some vegetables for canning companies can be harvested by machine, so prepare your soil now. More good information and products in following ads. Maybe a mineral and enzyme meeting the same day as above. Watch next week's ad.

Dealers wanted for these products in other counties and states.

Four Pennsylvania tomato growing champions were present at the annual Vegetable Conference at The Pennsylvania State University to receive awards for high yields. From left: Charles R. Schade, of Gratz, accepting the award for his

father, Allen; John E. Mason, of Golden Glow Farms, Lake City; Robert Schwartz, of Lykens; and Dio Shetler, of Turbotville. At right is Professor Robert F. Fletcher, Extension vegetable crops specialist.

Average Pennsylvania yield third in nation

Top tomato farmers recognized

UNIVERSITY PARK, Pa. — Six Pennsylvania tomato growing operations that produced outstanding yields for processing during 1976 received State Tomato Growers Awards in machine and hand harvest divisions.

They received inscribed plaques at ceremonies during the annual Vegetable Conference February 9 on The Pennsylvania State University Campus.

Winners in the machine harvest division were Allen

L. Schade, of Gratz, 18.01 tons of usable tomatoes per acre on 175 acres; Golden Glow Farms, of Lake City, R1, 20.43 tons per acre on 60 acres; and Robert W. Schwartz, of Lykens, 23.10 tons per acre on 40 acres.

In the hand harvest division, Wehry Brothers, of Dornsife, R1, produced 31.08 tons of usable tomatoes per acre on 86 acres; Dio Shetler, of Turbotville, R1, 29.03 tons per acre on 46.6 acres; and Daniel Stauffer,

of Port Trevorton, R1 36.18 tons per acre on 6.39 acres.

The State Champion Tomato Growers Club, which annually recognizes those persons who produce outstanding yields for processing, is sponsored by the Penn State Cooperative Extension Service and Pennsylvania tomato processors.

Robert F. Fletcher, Penn State Extension vegetable crops specialist, who presented the awards, said

that Pennsylvania's average tomato yield in 1976 was 20.4 tons per acre, third highest in the nation.

This year's production set a new record, breaking the 19.87 tons per acre grown in 1970. The 1976 crop value was \$7.7 million, also a record.

Professor Fletcher points out that the state's growers harvested 6,200 acres for processing last year. This acreage produced 126,500 tons.

They shine in Lancaster County's FFA program

By JOANNESPAHR
LANCASTER, Pa. — Hollywood celebrities they're not, but in the field of agriculture they are stars in their own rights. Last week Jeff Aungst, the son of Mr. and Mrs. Hiram Aungst, Elizabethtown R1, and Marty Hoover, the son of Mr. and Mrs. Harry Hoover, Stevens R1, were chosen as the outstanding Lancaster County FFA members in farming and agri-business. Jeff is a Star Red Rose Farmer, and Marty is Star Red Rose Agribusinessman.

This week Lancaster Farming made visits to their homes to see what made them shine a little brighter than the other Red Rose Chapter recipients in the county, and came away with a few answers.

JEFF AUNST

Jeff is a senior this year at Elizabethtown High School and has been in the Diver-

sified Opportunities Education at his school for two years now. This is a set-up where he goes to school in the mornings and is free to work on his father's farm from noon on. So, the farm has become the major concentration of his energies, which is evidenced from the modernization and improvements which Jeff and his father are either doing now or have recently finished.

Last July they began work on a 60 x 120 manure pit which they've since completed; in '74 they built a free stall heifer barn; two summers ago they added 20 feet onto their bulk feeder and at the same time installed an automatic feeder system; last summer they built a new garage; and now they are in the process of completing a wind break on one side of their dry cow pen

to stop the North wind and to catch the sun.

The Aungsts are almost all involved in the farm. Jeff's mother, Erma, loves working with their 53 animals, as do Jeff and his father.

Jeff also has two sisters, one of which, Joy, is particularly interested in the 4-H and other ag-related activities.

To stay abreast of things,

[Continued on Page 29]

Jeff's cow Irene has the chance of being named a Gold Medal cow depending on how her heifers produce in the next few years.

Marty Hoover earned the Star Red Rose Agribusinessman award for his work at Hollingers Farm Market in Ephrata.

They shine

[Continued from Page 28]

the Aungsts read about and study progressive farming techniques and keep tabs on the new procedures coming out of Penn State research. Their calf system is a model of that which Penn State employs, and the Aungsts feel it is one of the best around.

They separate the calves from the mother three days after they are born and house them in a separate calf barn which has the capacity for 15 calves. Here the animals are kept in small stalls and fed sour colostrum until they go onto solid food. The Aungsts keep all the milk they get from the fresh

cows for the first three or four days and store it in large plastic garbage containers.

"Sour colostrum is good for the calves because it supplies a bacteria they need in their stomachs to digest fibers," Jeff explained. Saving all the colostrum milk that the cow gives rather than dumping it is quite an economical move since one cow gives enough of this special substance to feed a calf for weeks.

The calves at the Aungst farm are kept in this environment for up to two months, at which time they are moved to open pens located in another building. Just before they are moved,

they are dehorned and vaccinated.

"We think this is one of the best systems you can have for calves," states Jeff. "We have no problem with sucking now that we're using this method." Previous to their present system, they had had the problem of blind quarters.

The calf barn that the Aungsts use had at one time been a chicken house which they converted to meet their purposes when they decided to change to this method of handling the calves.

The open pen the calves are taken to after two months hold calves of specific age groups. One pen is for two to four month olds, another for four to six month olds, and a third for six to nine months olds. In the two

to four month old pen, the animals are fed baby timothy on which they do really well.

At about nine months they are again moved—this time to the recently built free stall heifer barn. The Aungsts use no bedding in this barn which has 38 stanchions and a sunken walkway in the center separating the two rows of stalls. Instead of bedding, they have rubber mats which Jeff says is easier on the animals' knees. All of the animals eat at the bulk feeder. The main advantage to this freestall barn is the savings on bedding and also, that it acclimates the heifer to stalls.

Two to three weeks before these heifers freshen, they are taken out of the freestall barn and put in with the first dry group. In this group they are treated with special care to ease them into adjusting to being with other cows and standing in the stanchion barn.

The milking operation the Aungsts have is pipeline.

Jeff and his family are particular about the breeding of their animals, as well. They own a cow that was recently named a Gold Medal cow by the Holstein Friesian Association. Her milk record is fastly approaching 200,000 for a lifetime. And, one of Jeff's two Holsteins has the chance of classifying for a Gold Medal also, if her three heifers average a mature equivalent of 16,000 pounds of milk, 600 pounds of fat, and classify 83. Their programs are paying off, also, because their DHIA tests are always in the top percentages of those taking part.

MARTY HOOVER

Marty Hoover, Star Red Rose Agribusinessman, has a quite different operation from Jeff. Marty raises trees and ducks for retailing.

In total, he has approximately 610 Norway Spruce, Colorado Blue Spruce, Austrian Pine, and White Pine. He got into the business because his father, who has always had an interest in nursery work, made the bank above their home available to Marty for whatever he chose to grow. So, Marty and a friend decided to plant the plot in trees.

According to Marty, trees take very little work and

Jeff Aungst has the responsibility, along with his mother, of taking care of the calves in the calf barn.

They shine

(Continued from Page 29)

have a high return of profit on a minimal investment. As far as work is concerned, Marty mowed around them three times the first year, and last year, he mowed around them twice. He will continue working with them in this manner until he is ready to retail them.

He had considered selling them as Christmas trees, but now has decided to sell them to a nursery for shrubs beginning this Spring.

Marty also raises Muscovys. He had 30 in his FFA project book this year, but totalled about 50 on the farm. So far in his business, Marty has butchered them and sold them to friends and neighbors who heard about his enterprise by word of mouth.

In the near future he has hopes of expanding to 20 turkeys, 20 ducks, and about 25 capons. And, he has started selling his products to a meat stand at Hollingers Farm Market in Ephrata where he works.

Another one of Marty's FFA projects is swine. At the present time he owns three

sows—all Landrace. This young agri-businessman

feels that a cross between a Duroc and a Landrace is a good cross as you'll get if you are sending your animals to packing house. The shape might not be as perfect as with other breeds, but Marty says you will get a good price for the animals, regardless. Landraces are known for their large broods and for good feed conversion.

Marty's goal for the future combines the two areas in

which he has expertise. He wants to own his own farm and go into swine on a full time basis. He then wants to retail the meat on his own. For the present, he and his father have planned to cement the tobacco cellar on their farm for swine finishing, which should be the start of bigger and better things for this Star Red Rose Agribusinessman.

Know Where the Activities Will Be?
Read the Farm Women Calendar.

Chapters gear up for FFA week

Beginning February 20-26 over 500,000 Future Farmers of America across the United States will be celebrating National FFA Week. During that time, Pennsylvania's 214 FFA Chapters are planning activities to support the theme, "FFA is Agriculture's Classroom."

A survey of Lancaster County FFA chapters shows that several different types of projects will be carried around the county to make the public aware of the organization and what it is

doing. These projects range from television and radio spots to sending FFA placemats to local restaurants. To educate individuals inside the schools, nearly everyone of Lancaster County's chapters will be making an-

nouncements over the public address system on the topic of FFA and its goals and objectives. Window exhibits and displays have also been erected in school lobbies and halls.

According to York County FFA president, Mark

Mummert, Dover, the York County FFA is also planning several activities such as a county banquet and a skating party. York County, as well as other counties in Lancaster Farming's coverage area will also be making radio spots.

Woodbine Ivanhoe Mollie, owned and bred by George M. Knight, Air-

ville, is the 13th Holstein to be classified 97.

Holstein classifies 97

AIRVILLE, PA. - A York County registered Holstein cow has become the 13th animal of the breed to achieve the near-perfect classification score of 97 points.

Woodbine Ivanhoe Mollie (3E-97), is bred and owned by George M. Knight, Jr., Woodbine Farms, Airville R2. The nationally-known daughter of Osborndale Ivanhoe scored at 14 years and five months of age.

Her current official DHI lifetime production credits stand at 251,615 pounds of milk and 9243 pounds of fat in 3410 days. Mollie's top record was made at six years, one month when she produced 31,824 pounds of milk and 1132 pounds of fat in 342 days.

A show cow as well as a high production individual, Mollie was a member of the 1969 All-American Get of Sire and was named Honorable Mention All-American Aged Cow in 1970.

She has several sons in breeding organizations, including one in Italy and one in Ontario, Canada. Mollie freshened on December 6 with another son by Pawnee Farms Arlinda Chief.

During the 1976 show season, she won the 100,000 lb. Cow Class at both the Pennsylvania Holstein Show and the Maryland State Fair.

The Knight family also bred Mollie's dam, Woodbine Mollie, classified 84, with lifetime credits of 192,949 pounds of milk and 6431 pounds of fat.

Manure management imperative in Winter

LANCASTER, Pa. — "Management of animal waste or manure is becoming more important," notes Warren M. Archibald, district conservationist, Soil Conservation Service, Lancaster, "and Winter is the most critical management period."

Management is crucial during the Winter for two reasons. First, every effort should be made to have as much of the plant food value put into the soil for better crop production. Proper storage and application are the key factors.

Second, animal waste improperly applied on frozen ground can wash off in snow melts or rainstorms

resulting in stream pollution. This problem can be solved by a combination of methods.

Animal waste can be stored until the ground is thawed and tillage is about to begin.

Soil and water conserving practices reduce surface water runoff and keep the animal waste from getting into streams. Such practices include contour strip-cropping, minimum tillage, diversions, terraces, and grass waterways.

Other factors to be considered in a waste management program are cover on the land, slope, and soil type.

The Soil Conservation Service, U.S. Department of Agriculture, can provide technical assistance in the development of a waste management system. This system should be a part of the conservation plan for the entire farm operation.

DHIA workshop

BLUEBALL, Pa. - The Eastern Lancaster County School District in cooperation with the Lancaster County Extension Service, the DHIA program and DHIA supervisors will be conducting a DHIA workshop on Thursday evening, Feb. 24, at 7:30 p.m. at the Blue Ball Elementary School.

Alan Bair, Extension agent for dairy, and the DHIA supervisors will be on hand to discuss the use of DHIA Records in dairy cattle management. The use of the records in feeding, breeding, culling, etc. will be discussed.

This program is designed to be a meaningful, working program on DHIA. It will be necessary that dairymen bring DHIA records to this meeting. These records should cover the period of time from January 1976 to January 1977. The meeting is

open to all persons on the DHIA program, and others interested in the program, who would like to know more about DHIA and see the advantages of DHIA. The

meeting date is Thursday evening, February 24, at 7:30 p.m. at the Blue Ball Elementary School. The school is located on Ewell Road which connects Route 322 and Route 23 just East of Blue Ball.

ZIMMERMAN'S FARM SERVICE

BETHEL, PA
[717] 933-4114

Success

[Continued from Page 22]

customer depends on you," she amiably explains.

So, in keeping with this philosophy, the Hersheys

supply 24-hour emergency service, seven days a week with six servicemen ready to go out any time of the day or night.

"On weekends, it's nothing unusual to have servicemen out working," she notes with a grin. Being a farm wife she

knows that on a farm most emergencies seem to happen on weekends when it's sometimes hard to get help.

The Hersheys themselves run a 50,000 bird poultry operation, which is a great asset for them. They also have a farrowing house in partnership with Harold Barley, Millersville, in which they have 150 sows.

"We like to try out new products in our own house," she says, "so, you could say we have a type of experimental house." This helps the Hersheys in two ways. First of all, they can judge the effectiveness of what they sell, and they can

gain a knowledge of the product that exceeds what they can find out through reading.

"For instance, we put different sized cages in our house," she says, "so, now we can see the differences of nine birds in a cage versus four in a cage."

With the rapid rate of change going on in the poultry equipment business, this type of first-hand knowledge can become invaluable.

"I think that the poultry industry is one of the fastest changing of all the livestock equipment areas," says Mrs. Hershey.

Lancaster Farming, Saturday, Feb. 19, 1977—33

To keep up with this change, the Hersheys recently began handling a new line of poultry equipment - Staalkat of America.

Staalkat is egg processing equipment. One item in the line is an egg packer that packs 30 egg flats at the rate of 50 cases an hour. This is the packer the Hersheys have on their farm, and they have found that it will pack the eggs from their 50,000 chickens in three hours.

The Staalkat line at Hershey Equipment employs four people who sell

this product over the entire United States and Canada.

"We started this business only a year ago, and in the past three months it has grown fantastically," Mrs. Hershey says with a sparkle in her eye. The staff consists of one salesman, one service manager, and two technicians.

Another facet of the business which was just added in the past month is one in which the company

Donald Hershey does more than sit at his desk, but this is where Lancaster Farming found him when it was time for a picture.

Success

[Continued from Page 33]

coordinates the building with the equipment.

"We almost have to do this," says Mrs. Hershey, "because the construction for some of our equipment has to be done just so, or it is useless."

So, the Hersheys have hired a building coordinator. At present they are subcontracting and having a carpenter do their work for them, but in the future they have a projected aim of

constructing their own building.

"Oh, it seems that there is something new and exciting every day," claims Mrs. Hershey who enjoys her family's livelihood.

So, as evidenced, Hershey Equipment Co., Inc., is a rapidly expanding business. And, beginning February 21 through the 25 the new facilities at Sycamore Industrial Park will be open for daily plant tours.

For more information, refer to the advertisement in this week's paper.

New Spring wheat resists rust problems

ST. PAUL, Minn. - New spring wheat lines are a source of general resistance to both stem and leaf rusts.

The general resistance is effective against all races of rust fungi, says Roy Wilcoxson, plant pathologist at the University of Minnesota. In the past, varieties have had resistance only to a portion of the races present in nature.

"If this generalized resistance can be exploited we should be able to reduce the losses of rust to approximately 10 or 15 per cent during a severe epidemic. Varieties without generalized resistance can suffer extensive losses of 50 to 90 per cent.

"Use of these general resistant genes helps keep wheat healthy and compares to man maintaining his health through immunization against potentially harmful diseases."

This type of resistance will first have to be adapted into varieties for Minnesota production before being distributed to farmers, says Wilcoxson.

"We don't know how much general resistance our present varieties have, but 50 years' research shows some of the parents used for present varieties have exhibited significant general resistance to stem rust."

These sources of resistance can contribute to solving international wheat rust problems. Leaf rust is the most serious threat to wheat production in underdeveloped countries. "In

India the disease is reducing yields by 25 per cent. These sources of resistance could cut this loss in half, which translates to a 10 bushel per acre saving," says Wilcoxson.

John Deere 70-hp 2640

Its performance proves its heritage

Make, move, shred, and feed 4-ton haystacks, load up to 1 1/4 tons and lift it 10 feet high, drill postholes, plow, plant, cultivate, or you choose the job — and let this 2640 take charge. The 2640 — this is a full-crop full-season performer. The 2640's towering performance proves its heritage — John Deere

A "live" PTO, draft-sensing 3-point hitch, powerful closed-center hydraulics — these and more qualify this 70-hp performer for most any job

The 2640 is also big in comfort — you get deep-cushioned armchair comfort, logically placed and color-coded controls, full instrumentation in a flat-black, no-glare dash, and much more you'll find only when you climb aboard the 2640 and see it yourself

Stop in today and see this powerful John Deere 70-hp 2640 — its performance is good proof of its family name

210 LEVEL-ACTION™ DISK Width to 14 feet with 70 to 85 pounds per blade

Get disking results you can see — a level field surface, nearly level disk floor, and uniform soil mixing with 210 Level-Action Disks

Working weight of 70 to 85 pounds on every blade lets these 11 1/2 to 14 foot disks even out the soil that other disks throw up into ridges

These Level-Action disks feature overlapping front gangs that do away with middlebreakers while cutting out the center ridge most disks leave behind

Other features include a self leveling line of draft hitch that keeps the frame level and puts up to 100 percent working weight on every disk blade at full disking depth

Clear 15-inch obstructions with this Spring-Reset Plow. See us...

With this Spring-Reset Plow you get two types of reset action Bottoms can (1) rise vertically to slide over sloping rocks, or (2) trip back and

up as much as 15 inches if point catches on an obstruction. In 4- to 7-bottom sizes. See us soon for more information

DISC BLADES

New Heat Treated Disc Harrow Blades

Made of heavy gauge high carbon alloy steel heat treated for long trouble free service. The special forging process used gives the blades a finer grain in the steel and makes it tougher and much more able to withstand rough usage. The cutting edges are hardened to hold their edge longer yet are not brittle and will not easily break or split when striking stones or other hard objects. All fit square axle unless indicated.

Rock ShareBROKEN SHARES
REPLACED FREE!

As Long As Share Is Not Worn Out.

Applies only to Rock Shares

The extra heavy duty long-wearing share is made of top quality spring steel, thus having the best wearing material used in plow shares. The manufacturing upsetting process beeps up the nose of the blade to double the regular thickness thus making the share wear twice as long or more. By adding the extra amount of material in the nose it makes the share extra strong to eliminate breakage. This special upsetting process makes our extra heavy duty plow share wear as long as any other share on the market. Order bolts separately from listing as blade price does not include bolts. Front hole uses 1 1/2" long bolt STOP IN AND SAVE AT OUR LOW, LOW PRICES

These Southern Lancaster County dairymen were honored for the high production by their DHIA-tested herds, at the Atlantic Breeders' membership meeting in Quarryville Thursday night. Left to right are Henry B. Leaman, Windy Hill Rd., Lancaster (32 cows, 16,956M and 677F, 100 percent ABC-sired); Glenn Book, Strasburg Pike, Lancaster (33 cows, 16,234M and 628F, 100 percent ABC); J. Mowery Frey, Jr., Beaver Valley Pike, Lancaster (83 cows, 15,847M and 632F, 77 percent ABC); John Harnish, Beaver Valley Pike, Lancaster (124 cows, 16,866M and 626F, 81 percent ABC); Donald Ranck, R-1, Paradise (50 cows, 17,430M and 638F, 95 percent ABC); Aaron E. Beiler, R-1, Paradise (24 cows, 15,156M and 631F, 70 percent ABC); and Gary Akers (son of Curtis), R-1, Quarryville (59 cows, 18,131M and 711F, 90 percent ABC).

Mr. and Mrs. Robert Schaffer of Elizabethtown share the honors in receiving the Atlantic Breeders' Certificate of Merit for Superior Production award at Halifax last Wednesday night. Their herd of 51 Holsteins averaged 16,422 pounds of milk and 654 pounds of fat on DHIA test last year, and is 75 percent Atlantic-sired.

Atlantic honors area dairymen

LANCASTER — Dairymen in Franklin, Cumberland, Adams, York, Northern Dauphin, and Southern Lancaster Counties were honored this past week by Atlantic Breeders Cooperative at their annual District membership meetings. A total of 42 dairymen received Certificates of Merit for Superior Production for having herd averages this past year that were at least 15 per cent above the state DHIA level for milk or fat, while two-thirds or more of the cows in these herds are progeny of Atlantic sires.

At each county meeting, reports by the District director and management representative informed members that 1976 was a very successful business year for Atlantic. Service

Technicians provided over 300,000 services, and semen sales reached an all-time high. The Cooperative's sires maintained their rating among the nation's best for transmitting profitable traits.

A 25-minute movie was shown to help members see the beneficial type characteristics being sired by several of Atlantic's bulls. It included progeny of current sires in the herds of members throughout the service area.

Members present voted for District representatives for the coming year. Election results will be announced in the March issue of the Cooperative's newsletter, since more than one meeting is held in most of Atlantic's 16 Districts.

FARM CREDIT HELPS GROWING FARM FAMILIES

The needs of your family are never-ending. Equipment. Home appliances. Feed and seed and fertilizer. Doctor bills. College educations. Trucks and tractors. Remodeling the house.

The people at your Production Credit Association understand farm families and their special needs. After all they've been working with families like yours for nearly 40 years. They work with you to help you reach your goals. And it's good to know that you believe in constructive credit . . . the kind that helps you get further ahead instead of deeper in debt.

So the two of you don't have to go it alone. Not when there's a PCA man who's a real professional when it comes to helping farm families like yours.

WE SALUTE THE FUTURE FARMERS OF AMERICA

Mail referendum slated on tobacco quotas

WASHINGTON, D.C. — The U.S. Department of Agriculture has proclaimed marketing quotas for the 1977, 1978 and 1979 crops of Maryland and cigar-filler, type 41 (Pennsylvania) tobaccos. A grower mail referendum will be held February 22-25.

The national acreage allotment for the 1977 crop of Maryland tobacco was

announced as 33,479 acres and the allotment for Pennsylvania cigar-filler (type 41) tobacco was announced as 16,047 acres. This compares with 23,000 acres of Maryland tobacco and 12,500 acres of cigar-filler tobacco actually grown during 1976.

In the referendum, growers will decide whether marketing quotas will be in

effect for the 1977, 1978 and 1979 crops.

A "yes" vote by two-thirds of the producers voting will provide price support for the crop, but will limit acreage for each farm.

A "no" vote will provide unlimited planting and harvesting of type 41 cigar filler and Maryland type tobaccos. No price support

will be provided for the crop in 1977, 1978 and 1979.

Individual farm tobacco allotments and referendum instructions will soon be mailed to all farms having a tobacco allotment by County Agricultural Stabilization and Conservation Service offices of USDA. Tobacco producers who do not have a farm allotment may receive a ballot for voting in the

referendum from the county ASCS office in the county in which the tobacco was produced.

Pennsylvania tobacco growers have never approved quotas for type 41 cigar filler tobacco. Quotas for Maryland type tobacco were last in effect in the 1965 crop year.

The 598 adjustable-width-of-cut plow from White®... the plow people.

With White's 598 adjustable plow, you can infinitely adjust cutting widths from 14 to 22 inches...hydraulically...from the tractor seat. Allowing you to match plowing width to tractor horsepower...or to differing ground conditions. Use a narrow setting to plow deep and break hard pan. Use a wider setting for spring plowing, bean stubble or to bury heavy corn stalks. Sound like your kind of engineering? See us today...we know what you need.

Now is the time

(Continued from Page 10)

This grass appears like sorghum and will grow six to eight feet high and crowd out most other crops. We urge that farmers with this problem get on the planning table and figure out the practices to be done this summer for control. The use of Eradicane worked into the soil before planting, the growing of a crop, and the possible use of Roundup later in the summer is suggested. We urge farmers to become acquainted with the suggested control methods and get ready to eliminate this serious weed.

TO MOVE SILAGE

A number of livestock and dairy producers have had extra silage in temporary

structures during the Winter months. No doubt it has been frozen since Christmas time. However, if it is to be moved into the upright silo for mechanical feeding, we suggest that it be done soon before warm weather arrives. There is no need to add anything to this silage but it should be moved during cool weather and as rapidly as possible. In warm weather it has more of a chance to heat and result in lower quality silage. Also, rodents may be in the temporary storage and this silage will keep better in the upright silo during the Spring and Summer months. If the silage is to remain in the temporary storage, the sealing cover or material should be kept down tight against the silage surface at all times.

Yes You Can

You can pay for a Harvestore with the money that Harvestore saves you.

Admit it — you don't have anything against the money you could make with a Harvestore. It's the thought of paying for a Harvestore that turns you off.

Yet, there's a good chance you're already paying for a Harvestore. Paying for it with the field and storage losses. Paying for it with the sweet and strain it takes to lug, buck and feed baled hay. Paying for it with the poor results you get from feeding lower quality forages. And paying for it with the high cost of store

bought protein. The truth is, you may be paying for a Harvestore — you just don't have one. Give your Harvestore dealer a call. He'll give you names of dairymen near you who decided since they were paying for a Harvestore — they'd like having one.

Dairymen!

Try WAYNE's new Maxine computer service,
and get a Wayne stocking cap - free!!

Wayne has just announced a new innovation for dairymen. It's Maxine - Wayne's new Maximizer Computer Program.

Let us introduce Maxine to your dairy operation, and we'll give you a free stocking cap. We want to show you how Maximizer calculations can now be done with computer speed and accuracy. The Wayne Dairy Maximizer calculates proper balance of protein, energy, fiber, calcium, phosphorus and magnesium for each dairy herd on an individual

basis. The process, which formerly required hours of hand calculations, is computed and printed within seconds by Maxine.

The result is an easily-read, easily understood printed report - clear, useful and relevant information for dairymen.

It's simple, and if you'll let us show you how it works, we'll provide you with a warm, winter cap for those cold, winter days. Just contact any of the Wayne Feeds dealers listed below.

Maxine - from the Innovators.

Your Wayne Feeds dealers also bring you the best in dog and horse feed nutrition.

WAYNE DRY DOG FOOD

Used and recommended by professionals, who love and know dogs best.

WAYNE FORTI-O'S

Formulated to be equal to oats in energy value fortified with vitamins and minerals.

Aggie Arnold-Norman shows a vinyl duffel bag she made.

Aggie Arnold-Norman made this hen on a basket to be given as a gift. As an idea of what to do with these baskets, Aggie put sewing items on the inside, which made the gift perfect for a seamstress. A bun warmer was another idea given for the possible use of the hen project.

Homestead Notes

This is a prequilted project featuring a faced zipper with exposed teeth.

The various steps in zipper application for a faced zipper with exposed teeth are shown above.

Brighten up Winter with crafts from prequilted fabrics

By SUSAN KAUFFMAN

Dreary days in February and March in this part of our country seem drearier since the passing of the quilting parties that used to perk up the bluest spirits which traditionally occur this time of year. The holidays are long over and Spring is too far away for much enthusiasm in cleaning closets or polishing windows. It is too cold to think about sewing warm weather fashions and too late to get much wear out of Winter garments sewn now. The garden seeds are already ordered and have arrived to await warmer earth. What is there to do to fill in these long, dreary days of late Winter?

While stories are also making the shift from cold weather to warm, they are providing one possible outlet for the woman who wants something different to occupy part of her time. Rather than making a quilt, why not work with pre-quilted materials now at drastic clearance prices in most fabric stores which still have them in stock.

"Although pre-quilted fabrics are popular for garments with the oriental look in vogue, they also make interesting accessories, gifts, and bazaar items," states a worksheet prepared by Lancaster County Extension Service. Agnes Arnold-Norman recently instructed a class in pre-quilted fabric crafts and gave basic information for sewing these material along with patterns for making a number of craft items.

CRAFT IDEAS

If you can not afford to repaper the kitchen after paying taxes, try perking up your spirits and your kitchen's appearance with new, brightly colored appliance covers.

If your family is weary of the same vegetables from the freezer and shelf and the same menus week after week, try sparking up mealtime with new placemats made from pre-quilted fabric and decorative bias tape trim.

Cheer up a daughter who also finds this in-between-everything time of year more bearable by stitching a pretty and practical shoulder bag or backpack with pre-quilted fabric and zanny zipper applications.

Sew a tote bag in which to carry the many casseroles prepared for covered dish dinners which abound in Winter.

Make a duffel bag or a cosmetic case or a tennis racket cover for the college student who would appreciate a mid-semester pick-me-up.

All these items and many more can be made with pre-quilted fabric by following basic guidelines.

SEWING HINTS

Sewing and cutting techniques have to be modified in some instances when working with pre-quilted fabrics. This is necessary in order to compensate for the extra thickness of the material and the quilting threads.

Some basics to remember when cutting pre-quilted fabric are to cut one layer at a time; do not cut fabric with the pattern placed on a fold; use weights or long pins to hold patterns in place; use sharp scissors for cutting; and handle cut pieces carefully to prevent quilting stitches from coming unstitched.

When sewing seams, some type of treatment of the seam allowance will avoid fraying and separation of the layers. One treatment is an overcast stitch and a straight done in one operation by some sewing machines. The use of one row of straight stitches and a second row of zigzag stitches or two rows of straight stitches about 1/4 of an inch apart is another alternative. Binding edges with bias tape by sewing through all thicknesses at one or attaching one edge of the tape to one side of the allowance, folding over and stitching the other side of the tape down on the other side of the allowance provides a good finish. To avoid puckering the tape be sure to stitch both stitchings in the same direction. The seam binding can be decorative if the project is sewn wrong-sides together and the binding is placed over the right side of the material exposed in the seam allowance.

Closings on pre-quilted items can be fashioned from velcro strips, snaps, buttons, draw strings or zippers placed in seams or faced for a decorative look. With a faced zipper, the teeth are exposed rather than hidden under a flap of material as in conventional sewing techniques.

Agnes Arnold-Norman explained how to apply a faced zipper by cutting a piece of unquilted fabric from a pattern made by drawing a box on a piece of paper the size of the area for zipper placement. On the piece of paper, draw a rectangle around the area of the exposed zipper teeth. Overcast the edges of the facing fabric if the material seems to ravel. Place the facing fabric onto the pre-quilted fabric with right sides

together where the zipper is to be placed. Place the paper with the zipper teeth box on top of the facing. With small stitches, sew around the box made for the zipper teeth. Tear paper away. Cut open the box; turn and press facing to wrong side. Position the zipper under the opening and secure it with pins or tape. Top stitch the zipper in place.

Another important sewing technique when making pre-quilted fabric items is strap application. A triple fold strap is the strongest method to make a strap since a strip of fabric the length desired by three times its finished width is folded in thirds. Straps with a double thickness are easy to construct by folding the strap material so that the width overlaps 1/4 of an inch down the center of the underside of the strap. Use a zigzag stitch or overcast stitch over the exposed edge. Add stitching along both sides for extra strength.

Straps can be fastened by enclosing them in a seam, in a hem at the top of a bag or by folding one or two inches of the end of the strap under itself and top stitching it to the bag with two rows of stitching or any other decorative pattern such as a cross or box. Make the strap long enough to encircle the bag and top stitch down one side, across the bottom and up the other side for more strength.

To show how simple pre-quilted crafts can be, a few easy projects follow.

SMALL COSMETIC BAG

Cut a piece of pre-quilted fabric 8 inches wide and 11 inches long.

Fold right sides together.

Sew side seams.

Turn down hems at top.

Attach snaps or velcro to close top.

By folding at one-third the length, create a purse with a flap at the top.

TOTE BAG

1/2 yard will make a 19 inch by 15 inch tote.

Cut two rectangles 15 inches wide and 19 inches long.

Cut two rectangles 3 inches wide and 28 inches long.

(One of these straps will have to be pieced.)

Apply pockets as desired.

Sew bottoms and sides of the bag.

Line up right sides of side seam and bottom seam on each end of the bottom. Sew across the base of the triangles formed so that a 4 inch wide bottom results.

Hem top.

Make and attach straps.

PLACEMATS

1-1/4 yards will make six placemats (13 inches by 19 inches) and six to 10 coasters.

10-1/2 yards of bias for binding.

Face with a suitable material or use double-faced pre-quilted fabric (if you want reversible ones)

Cut out 13 inches by 19 inches ovals and apply desired bindings or ruffles.

HOT MITTS

Trace a pattern by using your hand and allowing ease and seam allowances.

Cut four to six layers depending on the thickness of the material.

Layer so that right sides will show inside and out.

Sew edges together, except wrist section.

Hem wrist area or apply bias tape.

Attach hanging loop.

APPLIANCE COVERS

To make appliance covers, measure the width and height of the front of the appliance and allow for seam allowances. Measure depth as for a toaster and the length up one side, across the top and down the other side. Cut two pieces (one front and one back) and one of the long pieces called a gusset which provides depth.

Sew front piece to gusset, easing at corners.

Sew back piece to gusset, easing at corners.

Hem unfinished edges.

Sew all pieces wrong side together and apply bias tape over seam allowances for decorative touch.

To make a cover for a crock pot or some similar round or oval shaped object, measure height and provide seam allowances at top and bottom.

Then measure distance around appliance allowing seam to join ends of this long piece together. Cut a circular or oval piece from a pattern drawn by inscribing around circumference of appliance.

Allow for extra width to cover attached handles.

For more specific instructions of construction and for many more instructions for other projects request pre-quilted crafts worksheets from Lancaster County Extension Service, Farm and Home Center, 1333 Arcadia Road, Lancaster, Pa. 17604.

Broilers up

HARRISBURG - Pennsylvania's poultrymen continued the trend of higher production in broilers during the week ending February 5, 1977, according to the Pennsylvania Crop Reporting Service.

Total placements were 24 per cent higher than production during the same week in 1976.

Placements were 1,653,000, a figure three per cent below the previous week.

Average placements during the past ten weeks were 29 per cent above a year earlier.

In the 21 key poultry producing states, placements were 64,195,000, about the same as the previous week, but five per cent higher than the corresponding week a year ago.

Average placements in the 21 states during the past ten weeks were five per cent above a year ago.

You're paying record high prices for items at the supermarket

HARRISBURG, Pa. - Pennsylvania's average retail "shopping bag" price rose sharply again in January after a 31 cent increase in December, according to the monthly supermarket survey report released today by the Pennsylvania Department of Agriculture.

The average retail cost of 15 "shopping bag" items sampled throughout the Commonwealth in January was \$10.40, a 19 cent increase from the December cost of \$10.21. The average retail price of the items in November was \$9.90.

The survey results show

that prices are at the highest point since the survey was initiated in August of 1974. It is only the second time in the history of the study that all shopping bag averages by region exceeded the \$10.00 mark.

According to the survey prepared by the Department's Bureau of Rural Affairs, the average retail price for January was highest in the northeastern part of the state at \$10.61, an increase of 14 cents from the previous month. Lowest prices were recorded in the northwestern part of the state at \$10.14, where prices

declined 13 cents from December figures.

Five of the six regions sampled reported an increase in shopping bag averages during the month of January. The most dramatic increase in prices was registered in the southeast central part of the state, a 57 cent jump from \$10.03 to \$10.60.

The survey also showed the gap between prices in urban stores and rural stores remained at about five per cent in January. The average price in urban supermarkets for the shopping bag items rose 14 cents to \$10.19, while rural stores showed an 18 cent increase, to \$10.71.

Items increasing in price were potatoes, 10 to 13 cents a pound; cabbage, 18 to 23 cents a pound; and coffee, \$2.30 to \$2.43 a pound.

Items decreasing in price were bread, 38 to 37 cents a pound loaf; chicken, 52 to 51 cents a pound; eggs, \$1.01 to 97 cents a dozen large eggs; and toilet paper, 83 to 82 cents a four roll package.

Canned peaches, fresh pears, canned corn, sugar, shortening, cornflakes, ground beef and American cheese all registered minor upward price movements, but remained about the same in retail price.

T.B. tests set for March 1

LANCASTER, Pa. - The monthly testing program sponsored by the Lancaster County Lung Association, will be conducted at the Association office, 630 Janet Avenue, Lancaster, on Tuesday, March 1, 1977.

Tuberculin testing will be done from 10 a.m. to noon and 1 to 5 p.m. Cost is \$1. Persons having this test will return for a report on Thursday, March 3, 1977.

Diabetes screening, conducted by the Lancaster

County Diabetes Association, will be done from 10 to noon and 1 to 4 p.m. Cost is \$1. A normal meal should be eaten two hours before having the test.

The American Heart Association will be checking blood pressure from 10 a.m. to noon and 1 to 5 p.m.

Free educational materials are available about all lung diseases as well as smoking in the Lancaster County Lung Association office.

Sign language classes offered

LANCASTER, Pa. - The counseling service for the Deaf, Inc., will be offering sign language classes to all interested persons beginning Wednesday, February 23, 1977. The classes are held at the Community Center, 630 Janet Ave., Lancaster, from 7 to 9 p.m. for a period of 10 weeks, in the Blair Room. Individuals may register on

February 23. The fee for this course is \$25 and the books being used may be available to purchase at class. There will also be family rates for the immediate family. Only those who are interested in family rates contact the office at 397-7138. Applications can be received by calling the counseling service.

The Range

The recipe files for "Home on the Range" don't offer many recipes with continuity this week. So, in order to give the files a rest so that they can slowly build up again with all the new Spring themes in mind (check the calendar of recipe themes published in this section of Lancaster Farming in case you missed last week's announcement), we will publish a variety of pork recipes sent into us in pamphlets and cookbooks from the National Livestock and Meat Board, Pork Committee.

Pork Producers tell us that

this meat is higher in the "nerve vitamin", Thiamin, than any other known source of food, and that is as high in protein as any other red meat. They also stress that with today's "new pork", (which is leaner and meatier and has more protein and fewer calories than ever before) pork is a great weight watcher's food. One ounce of lean cooked meat has about 70 calories in it, which is a cheerful thought for dieters.

So, considering this, why not try out some of this week's pork recipes on your family.

And, as a second reminder, don't forget that with our new system of weekly recipe themes, we will need all recipes about 10 days in advance of publication. The theme calendar, which will be printed every week from now on as a reminder of what's coming up, will also carry the deadline date so you are sure to get your recipes in on time.

Also, we will be carrying a "Recipe Swap" column as the demand warrants, for those recipes that you would like someone to furnish, or a special recipe that you really enjoy and would like to share but which doesn't follow the recipe theme for the week. Right now for "Recipe

Swap," we are receiving answers to the pleas for snow ice cream, Swedish Meatballs, and several other requests we have published in the past weeks. If you have any requests, send them into Lancaster Farming under "Recipe Swap" and we will see that those requests get printed as well as the recipes.

Golden Pork Nuggets

2 pounds ground pork
1 1/2 teaspoons salt
1/8 teaspoon pepper
6 medium-sized hard-cooked eggs
2 tablespoons butter or margarine
2 tablespoons flour
3/4 teaspoon salt

ground pork. Place egg in each nest and press the meat around each egg to close nest and evenly cover egg. Place on rack in roasting pan and bake in moderate oven (375 degrees F.) for 35 to 40 minutes. For sauce, melt butter or margarine; stir in flour, 3/4 teaspoon salt and mace. Gradually add milk and cook, stirring constantly until thickened. Cook five minutes, stir in parsley and serve with pork nuggets. Six servings.

PORK SAUSAGE REUBEN SANDWICHES

1 pound pork sausage
2 tablespoons water
4 slices rye bread with caraway seeds
1/4 cup Thousand Island dressing, if desired
1/2 cup sauerkraut, well drained
2 slices (2 ounces) Swiss cheese, cut diagonally to make 4 triangles
Shape sausage into four oval patties, 1/2 inch thick. Place in a cold frying-pan, add water, cover and cook slowly, five minutes. Pour off drippings. Cook patties slowly with one tablespoon dressing, if desired. Top each with two tablespoons sauerkraut, a cooked sausage patty and a triangle of cheese. Broil three inches from heat until cheese melts. Yield: four sandwiches.
If closed sandwiches are desired, toast four additional slices of rye bread and use to top sandwiches when removed from broiler.

xxx

and pepper. Pour mixture over spareribs, cover and marinate in refrigerator 10 to 12 hours, turning 3 or 4 times. Place ribs, rib ends down, on a rack in a baking pan. Cover tightly and cook in a moderate oven (350 degrees F.) one hour. Remove cover, turn spareribs and spoon half of the marinade over ribs. Return to oven, cook 15 minutes, turn spareribs, spoon remaining marinade over ribs and continue cooking 15 minutes or until browned. Makes four to six servings.

xxx

PORK TENDERLOIN ROYALE

1 1/2 pounds pork tenderloin, cut into 6 patties
3 tablespoons lard or drippings
3/4 teaspoon salt
1/2 teaspoon pepper
1/4 teaspoon garlic salt
2 cups cooked rice
1 cup chopped cashew nuts
1/4 cup finely chopped onion
1/2 cup chopped celery
3 tablespoons soy sauce
1/4 teaspoon ginger

Brown patties in lard or drippings. Season with salt, pepper and garlic salt. Grease a 12 x 8-inch baking dish. Combine rice, nuts, onion, celery, soy sauce and ginger. Pour into baking dish. Arrange patties on top. Cover tightly and bake in a moderate oven (350 degrees F.) 45 minutes or until done. Makes four to six servings.

xxx

PORK STEAKS AND APPLE KRAUT

4 pork shoulder steaks, cut 1/2 inch thick

Home on the Range

(Continued from Page 45)

2 tablespoons lard or drippings
1 teaspoon salt
½ teaspoon pepper
1 tablespoon prepared mustard
1 tablespoon prepared horseradish
1 can (1 pound 13 ounces) sauerkraut, drained
2 medium apples, chopped
½ cup chopped onion
1 teaspoon caraway seeds
Brown steaks in lard or drippings. Pour off drippings. Season steaks with salt and pepper. Combine mustard and horseradish and spread over steaks. Combine sauerkraut, apples, onion and caraway seeds. Place in a 2-quart baking dish. Arrange steaks on top of mixture. Cover tightly and bake in a moderate oven (350 degrees F.) 30 minutes. Uncover and continue baking 30 minutes. Makes four servings.

xxx

**Roly-Poly
Pork Loaves**

(Bake One—Freeze One for future)
3 pounds ground pork
1 can (8 ounces) tomato sauce
1 egg
¼ cup finely chopped green pepper
2 teaspoons salt

2 teaspoons chili powder
½ teaspoon pepper
Corn bread stuffing
2 tablespoons catsup
Combine pork, tomato sauce, egg, green pepper and seasonings. Pat out ½ of mixture on waxed paper into a 10x8-inch rectangle. Place ½ of stuffing in layer over meat, pressing lightly. Roll up from short end (jelly roll fashion) to form a loaf. Seal ends; place seam side down on rack in roasting pan. Bake in moderate oven (350 degree F.) one hour 15 minutes. Spread with catsup and bake five to ten minutes. Prepare second loaf; freeze, wrap and store at 0 degrees F. or below for two to three weeks. To cook frozen loaf, bake as directed, increasing original time to 1½ to 1¾ hours. Makes two loaves, six to eight servings each.

xxx

**Pork Balls—
Stroganoff Sauce**

2 pounds ground pork
1½ teaspoons salt
½ teaspoon pepper
2 eggs
1½ cups fine soft bread crumbs
1 medium onion, chopped
1 can (13 ounces) evaporated milk
2 tablespoons prepared mustard
One-third cup flour
2 tablespoons lard or drippings
¼ cup water
1 can (4 ounces) mushrooms, stems and pieces, drained
¼ cup water
2 tablespoons flour

¼ teaspoon salt
¼ teaspoon nutmeg
1 tablespoon chopped pimiento
Sprinkle 1½ teaspoons salt and the pepper over meat. Add eggs, bread crumbs, onion, ¼ cup evaporated milk and mustard. Mix lightly but thoroughly. Divide mixture into 16 equal portions (one-third cup each) and shape into balls. Roll balls in one-third cup flour and lightly brown (half at a time) in lard in large frying-pan. Pour off drippings. Add ¼ cup water, cover tightly and cook slowly 30 minutes. Remove balls to warm platter. Drain mushrooms; reserve liquid; add water to make ½ cup and blend with two tablespoons flour. Pour off all but one tablespoon pan drippings and add flour mixture to pan. Stir in

remaining evaporated milk, ¼ teaspoon salt and nutmeg. Cook, stirring constantly until thickened. Stir in mushrooms and pimiento and heat through. Serve sauce with pork balls. Makes eight servings of two balls each.

**PORK CHOP—
GREEN BEAN
CASSEROLE**

6 pork rib or loin chops, cut ¾ inch thick
1 tablespoon lard or drippings
1 teaspoon salt
½ teaspoon pepper
2 packages (10 ounces each) frozen cut green beans, defrosted

1 can (10½ ounces) condensed celery soup
¼ teaspoon dill seed
One-third cup milk
¼ teaspoon salt
Brown chops in lard or drippings. Season with one teaspoon salt and pepper. Mix together beans, soup, dill seed, milk and ¼ teaspoon salt. Pour mixture into a 2-quart baking dish. Arrange chops on top. Cover tightly and bake in a moderate oven (350 degrees F.) 45 minutes to one hour or until meat is done. Makes six servings.

xxx

**PORK CHOP
HARMONY**

6 pork rib or loin chops, cut ½ to ¾ inch thick
2 tablespoons lard or drippings
1 teaspoon salt
½ teaspoon pepper
¼ teaspoon garlic salt

2 packages (10 ounces each) frozen peas
1 can (10½ ounces) condensed mushroom soup
½ cup thinly sliced celery
2 green onions with tops, thinly sliced
¼ teaspoon marjoram
¼ teaspoon rosemary
Brown chops in lard or drippings. Season with salt, pepper and garlic salt. Break peas apart and combine with mushroom soup, celery, onions, marjoram and rosemary. Spoon mixture into a 2-quart baking dish. Arrange chops on top. Cover tightly and bake in a moderate oven (350 degrees F.) 45 minutes. Uncover, continue baking 15 minutes or until meat is done. Makes six servings.

xxx

Junior Cooking Edition

This week's "Junior Cooking Edition" files are slightly depleted, so to let them fill up again, we are featuring recipes made with the junior cook in mind. In this time of cold weather,

hearty lunches are in order on Saturday and Sunday afternoons. So, featured this week are chili con carne, barbecued frankfurters, and three sandwich fillings which should fill you up.

Or, if you want, these sandwich recipes can make good snacks when friends come over after school. Some tips to making attractive sandwiches are to A.) match the slices of bread so that the sandwich will be neat. B.) Spread bread thinly with butter, margarine, or mayonnaise before adding filling. This keeps the bread from getting soggy. C.) Spread the filling all the way to the edges. This insures good taste to the last bite. D.) When your friends make their own sandwiches, the spread should be soft enough so that it is easy to spread.

For lunch, sandwiches can be served with raw vegetables and fruit and a beverage such as milk.

A quick tip for the chili con carne is that you can make it a couple of weeks in advance and then store it in the freezer. To heat, place the frozen chili on top of a double boiler.

CHILI CON CARNE

Ingredients
1 onion, diced
1 pound hamburger
2 cups canned tomatoes
2 cups red kidney beans, canned
½ teaspoon chili powder
1 teaspoon salt

Equipment
Skillet
Cutting Board
Sharp knife
Spatula
Mixing spoons
Measuring cup (liquid ingredients)
Measuring spoons

Cut up onion using knife and cutting board. Place hamburger in cold skillet and begin to heat with medium heat. When meat is beginning to brown, add onions. Stir meat and onions until well browned. Add tomatoes, beans, and seasonings. Cover and turn heat to simmer. Cook for 20 minutes. Add water if chili seems too thick. Chili should look like a very thick soup. Serve it in bowls.

xxx

BARBEQUED FRANKFURTERS

Ingredients
1 medium onion
8 frankfurters
½ cup catsup
½ cup water
¼ teaspoon chili powder
½ teaspoon salt
1 teaspoon sugar
1-½ teaspoons Worcestershire Sauce
8 frankfurter rolls

Equipment
Cutting board
Large skillet
Measuring cups (liquid ingredients)
Measuring spoons
Mixing spoon
Large knife

Chop onion fine. Place frankfurters and chopped onion in skillet and cook over medium heat until lightly browned. Turn to brown evenly. Combine catsup, water, chili powder, salt, sugar, and Worcestershire sauce. Mix well. Pour barbecue sauce over frankfurters. Cover skillet and simmer 20 minutes. Split frankfurter rolls and, if desired, roast in hot oven for few minutes. Serve frankfurters hot with sauce in rolls.

xxx

EGG SALAD WITH DRIED BEEF FILLING
Ingredients
5 eggs
2 ounces dried beef
One-third cup salad dressing
Equipment needed
Saucepan with lid
Mixing bowl
Paring knife
Small cutting board
Measuring cup (dry ingredients)
Fork

Hard cook eggs. To do this, put eggs in saucepan with enough cold water to cover. Put lid on saucepan and bring water to a boil. Remove from heat and let stand for 20 minutes. At end of 20 minutes, chill eggs thoroughly in cold water and remove the shells. Then, chop the eggs and pull the dried beef apart with your fingers. Combine the eggs, dried beef, and salad dressing. Mix well. Makes six sandwiches.

xxx

CHOPPED LIVER WITH BACON FILLING

Ingredients
¼ pound liver, fried and chopped fine
2 slices bacon, fried and chopped fine
½ teaspoon salt
2 tablespoons pickle relish
2 tablespoons mayonnaise
Equipment needed
Frying pan
Spatula
Paper towels
Mixing bowl
Measuring spoons
Cutting board
Knife

Fry bacon until it is crisp, using medium heat. Remove from frying pan and place on paper towels. These towels absorb the fat on the bacon and make it more crisp. Next, pour most of the fat out of the pan. Place liver in the pan and put on the heat. After three to six minutes, turn the liver and allow it to brown on the second side. When both sides are brown, the liver is done. (Calves'

liver takes less time to cook than pork liver.) Let the liver cool before cutting it. Cut the liver and bacon in mixing bowl and add salt, pickle relish, and mayonnaise. Stir until thoroughly mixed. Makes eight sandwiches.

xxx

TUNA AND APPLE FILLING

Ingredients
1 can (7 ounces) tuna, grated style
¼ apple, chopped fine with skin left on
1 tablespoon lemon juice
2 tablespoons mayonnaise
Equipment
Can opener
Juicer
Measuring spoons
Mixing bowl
Mixing spoon
Cutting board
Knife

Open the can of tuna and pour off any oil. Place the tuna in a bowl and break it up with a spoon until it is in small pieces. Quarter the apple and cut out the core. Chop into small pieces using a cutting board and knife. Add chopped apple to the tuna. Squeeze ½ the lemon and measure one tablespoon of juice. Add to tuna and apple. Add mayonnaise and mix thoroughly. Makes four to six sandwiches.

"One For The Road"

Many early fountain pens were filled with eyedroppers. Some, as big as fat cigars, proved popular during Prohibition with Americans who found them a convenient way to carry "one for the road."

Badger
FARMING IS BETTER WITH BADGER

Pollution-Free Manure Disposal

Badger Liquid Manure Injector Eliminates Runoff, Minimizes Odor

This is the modern way to apply liquid manure to your fields. Three injectors mounted on heavy duty shanks put manure where it is most beneficial—in the soil. Wire wound 3" plastic hoses connect injectors to tank. Use on any field including sod, stubble and row crops. Unloading time is same as normal top spreading. Capacity is 1 to 5 gallons per running foot depending on ground speed and soil type. Injector adapts to all new and existing Badger Liquid Manure Tanks. See your Badger dealer or write for more information.

On being a farm wife - and other hazards

By Joyce Bupp

We ran away from home last weekend.

At least once each Winter, our family finds some handy farm-business related reason to make a trip to the central mountains of the state. When warm weather reports held through last Saturday morning, we threw sleeping bags, a change of clothing, and boots for everyone in the car trunk and headed north.

The business was dispensed with in short order. Then we could head for the hidden purpose of the running away - a quick weekend stay at the hunting cabin.

It sits in the shelter of two tall mountain ranges, just off a well-maintained paved road, but neatly hidden by thick, tall pines. The children and I had never been there when snow blanketed the ground and ice silenced the usual noisy mountain stream just outside the back walls of the camp.

Snow brightens the winter woods landscape and makes

finding wildlife signs much easier. Deer tracks led in all directions, crossed occasionally by the trail of a wandering wild turkey. A camp-maintained feeder beyond the stream was as busy as a supermarket. Although we saw no deer come to feed, the small woods creatures were having a feast. Busybody squirrels - large, bushy-tailed grays and the outlaw small red ones - raced up and down the oak trees like so many trucks wheeling down the Interstates. Blue jays decorated the pines almost as thickly as starlings at the barn bunk feeders, screaming at one another as they fought over the golden grains.

Interior decorated in early second-hand, the cabin boasts few of the luxuries of home. Electricity does give us light for reading, playing games and refrigeration, although a snow bank is just as handy. The absence of blaring TV commercials and a constantly ringing telephone are welcomed, to

be replaced by the cozy sounds of wood crackling in the two stoves.

We have running water, of course. It runs constantly, piped from a spring high in the mountains. All you have to do is go outside and bring it in with a bucket. Placed in a huge old pot and kept on the back of the kitchen cookstove, it's even ready at a moment's notice for those who don't like to wash their hands in cold water. The "comfort facilities" are handy - just a short jog through the fresh air to the other side of the lawn. (Somehow in the middle of Winter, "comfort" does not seem quite an accurate description.)

What do we do in the hunting cabin? Nothing - and that's the joy we find in running away for a recharge on life occasionally.

COPE & WEAVER CO.
NEW PROVIDENCE, PA

Home on the Range

[Continued from Page 46]

- 1 can (13 ounces) or 1 and two-thirds cups evaporated milk
- 3 cups water
- 1½ cups yellow corn meal
- ½ teaspoon salt
- ¼ teaspoon pepper
- 2 cups crushed corn flakes
- 2 eggs
- 3 to 4 tablespoons lard or drippings

Brown sausage and pour off drippings. Combine milk and water. Measure four cups of liquid and add to sausage. Reserve remaining liquid for dipping scrapple. Heat sausage mixture to boiling and slowly stir in corn meal and seasonings. Cook five minutes, stirring constantly. Pour into a greased 9 x 5-inch loaf pan and chill until firm. Unmold and cut into ½-inch slices. Dip into corn flakes. Combine eggs and remaining

liquid and dip slices in this mixture, then in corn flakes again. Brown in lard or drippings on both sides and serve hot with syrup. Makes eight servings.

NOTE: Scrapple may also be browned in oven. Arrange slices in a greased baking pan and bake in a hot oven (400 degrees F.) 15 to 20 minutes or until scrapple is golden brown.

XXX PORKLET PIZZA SANDWICHES

- 6 porklets
- 1 can (8 ounces) tomato sauce
- ½ cup grated Parmesan cheese
- 2 tsp. instant minced onion
- ½ tsp. basil
- ¼ tsp. garlic powder
- 2 tbsp. lard or drippings
- 3 English muffins

TRY A
CLASSIFIED

6 slices Mozzarella cheese
½ tsp. oregano
6 large stuffed green olives, sliced
Combine tomato sauce, Parmesan cheese, onion, basil and garlic powder. Simmer five minutes, split and toast English muffins. Cook porklets on both sides in lard or drippings over moderate heat, until done, 10 to 18 minutes. Place each browned porklet on English muffin half. Spread two tablespoons tomato sauce mixture on top of each porklet. Cover with slice of Mozzarella cheese. Sprinkle oregano on each cheese slice. Arrange slices of stuffed green olives on tops. Place under broiler three inches from heat until cheese melts, approximately five minutes. Makes six servings.

This week to start off the "Recipe Swap" column, Lancaster Farming received two requests for recipes. One is from a person in Hancock, Md., who expresses the hope that someone can pass along a good Lebanon Bologna recipe to him.

Another person says, "I'm sure there is someone out there that reads these columns and has a recipe they could share with me for split pea and ham soup."

If you can help these people, send your replies to Lancaster Farming Newspaper, "Recipe Swap", Box 266, Lititz, Pa. 17543. Don't forget to include your name, address, and phone number.

Ladies Have You Heard?

By Doris Thomas

Lancaster Home Economist

HOW TO REMOVE CRAYON AND INK STAINS

If you have children in school, crayon and ballpoint ink stains on their clothing may be a laundry problem. Treat these stains before washing because the heat from wash water and hot air in a dryer often sets them permanently. However, the kind of fabric and type of stain.

For washable fabrics stained with crayon, dampen the stain and rub in soap or detergent to form thick suds. Then rinse well and repeat if needed. Use a grease solvent for non-washable fabrics. If the grease solvent does not work, then try the water and detergent method.

Ballpoint ink stains need a little different treatment. Rubbing alcohol is useful for most fabrics. Place the stain face down on a blotter or paper towel and sponge the area with alcohol until the blotter absorbs the stain. Rinse the area with water to remove the alcohol.

Bleaching may also be necessary if the stain is an old one. Use a mild solution of chlorine bleach and water to soak bleachable items. Use an oxygen bleach solution for items that can't be bleached with chlorine bleach.

Be sure you first test the stain remover on a sample piece of the garment on a hidden area, because sometimes the stain removal

method can discolor or fade the fabric.

ABOUT SAFER CLOTHING FOR ALL AGES

Blue jeans and wool sweaters are not only fashionable attire but probably one of the safest outfits to be wearing in the event you're caught in a fire.

Wool and some synthetics tend to be fire resistant. A tightly woven, heavy weight fabric like denim will not burn as fast as a loose weave, fluffy pile or napped fabric. Also, loose, floppy clothing such as nightgowns and robes will burn more quickly because air can circulate faster through them.

There's no flame proof fiber or fabric available for clothing but great strides have taken place recently in developing flame retardant fabrics. The first age group to benefit was children for whom flame retardant sleepwear was developed. In fact, the federal government requires all children's sleepwear to be flame retardant.

Some major retail-catalog chain stores, spurred on by the benefits of flame retardant sleepwear for children are now expanding their inventory to include flame retardant dresses, blouses and other adult wear. The price for these garments is increased anywhere from 50 cents to \$2.00 depending on garment

Doris Thomas

size and amount of fabric used.

Flame retardant garments look like ordinary garments and the problem with smell and feel, associated with the first flame retardant garments, have been almost eliminated. Generally, flame retardant garments can be laundered in ordinary phosphate detergent or a heavyduty, liquid detergent. Chlorine bleach and some fabric softeners can reduce flame retardant characteristics. To be sure of proper laundry techniques, follow garment label instructions.

Flame retardant garments do provide life-saving protection but can burn. It just takes longer to ignite them. They will self-extinguish once the heat source is removed. The only sure protection is to avoid catching on fire in the first place by practicing good safety habits.

Ida's Notebook

Ida Risser

Recently, I've had the opportunity to look through a very old leather-bound book which my Grandfather, Benjamin R. Landis, used to keep the accounts of his hired people. After pouring over the book for hours, I almost feel as though I can reconstruct some of the way of life in the 1890's.

The various men were hired for \$5 per month, \$8 per month, or even \$11 per month with washing and mending included. Now what really makes interesting reading is what this money was spent for. Apparently, my grandfather acted as banker because every two or three days all through the year he doled out money to them. On a Saturday evening they would get .75 cents or \$1 and walk to the nearby village of Oregon.

Sometimes they bought coal at Lititz for \$3 a ton or went to a doctor in Lancaster for \$5. For a trip to Atlantic City they got an advance of \$1 and for two quarts of whiskey \$1. Naturally food items were inexpensive compared to today's prices. Examples are: watermelon .10, bushel potatoes .30 one

pound lard .10, one pound coffee .10, five pound sugar .45, one crock apple butter .30, 1/2 peck cornmeal .10, and one pound butter .18.

Here is an example of the spelling used in the book. "Hawled wood to Mount

Gredne and saw horse rasses with Claty." Or, "Paied my tax .75 and sold mutin .10 lb., fethers .32 lb. and 7 lb. meet at .08 lb." Then, "Bought huckelburys, dinamite and oisters at Nessvill."

Each day off for the hired men was also carefully noted as follows: 1 day at Circus, 1 day at Campmeeting, 1/2 day at fox chase, 1/2 day fishing, 1 day had poison, 1 day grind broad axe and pick apples and 1 day "don't know where you were."

I must tell you a bit about the women. A "Susie" worked for \$3 per month and an "Emma", the wife of Jacob Livering, sometimes managed to get part of her husband's pay. She spent .50 at a public sale and another .50 went to the baker. I don't think I envy them one bit.

All air-cooled engines are NOT created equal

It's easier to call an engine "heavy duty" than it is to build it that way. Many carburated "heavy duty" industrial engines simply don't deserve the title. They consume expensive fuel at an alarming rate: they are prone to break down or overheat and their life expectancy is measured in hundreds of hours. If any engine in the world qualifies as heavy duty, it's Deutz. Deutz engines are often chosen to power equipment with unit price tags over half a million dollars—that's heavy duty.

When it comes to cooling efficiency, the Deutz precision-engineered axial-flow cooling air blowers have no equal. This direct approach to cooling [without coolants, additives, cavitation] means our engines need only about 60% of the air volume liquid cooled engines require. Combustion efficiency is greatly improved by higher head temperatures and engine life is extended by cooler oil temperatures.

If you think air-cooled engines are prone to overheat, talk to Deutz users in the scorching heat of the Imperial or San Joaquin valleys. There, Deutz engines deliver more than 20,000 hours of trouble free service before a major overhaul.

There are lots of things that separate Deutz engines from water-cooled and other air-cooled engines. Things like blower design, big lube oil coolers, oil-cooled pistons, special alloy cylinder heads, a research and development team of more than 1,000 engineers. These are all important advantages. Still we say: If you can find an engine that uses less fuel than a Deutz—buy it.

PFA's sweethearts charm their legislators

By JOANNE SPAHR
HARRISBURG, Pa. - Pennsylvania's legislators got a surprise Valentine's Day gift in the form of approximately 150 sweethearts from the Pennsylvania Farmers' Association when that group organized a two-day legislative conference for its female members last Tuesday and Wednesday at the Penn Harris Motor Inn, here. Designed to educate the women on legislative procedure, policy development, and policy implementation, the conference also featured a meeting with legislators on Capitol Hill as well as a dinner with them. For the majority of the women present, the meeting on the Hill and at dinner presented an opportune time to become personally acquainted with their representatives and to discuss key issues.

Marlin Miller, director of Field Services for PFA, pointed out that this conference was the first of its kind, in that just women, alone, have never been encouraged to come to Harrisburg to meet with the individuals in government. "We do have annual state legislative tours in March," he explained, but noted that

this particular conference was set up to encourage more women to become active in policy development.

"We hope these women will go home and get others involved," Miller commented. He also pointed out that it is of great importance to have both the partners in a family farm operation involved and concerned with legislation. Many times home discussions foster ideas that lead to policy development.

"I hate to admit it, but women can do a better job at this," he also remarked. That statement was mirrored by many of the men coordinating this two-day event. Chester Heim, public affairs director for PFA, noted that when the women in the organization get involved in a project, there is usually a high rate of success. The majority of women attending the conference believed that this comes about because of the extra time which they have to devote to their activities.

Miller also noted that this sweethearts legislative conference is not intended to become a yearly event. It is simple part of an ongoing

education program for the members of PFA.

"We're growing at such a rapid pace," he stated, "that we have a definite need for education of the members." As a result, next year the focus of the conference will be on another facet of the organization such as marketing, public relations, etc.

The highlight of Tuesday's schedule of events was a meeting with representatives at the Capitol. Prior to the visitation, a legislative briefing was held and 11 key issues were stressed after which the women boarded a bus and went to the Hill.

Later in the evening approximately 55 or 60 legislators dined with the ladies at the Penn Harris. For this particular event, approximately 190 women were present to meet and greet their representatives.

Kent Shelhamer, newly confirmed Secretary of Agriculture, was the guest speaker for the evening. His topic was an educational one on the roles and responsibilities of the Secretary of Agriculture.

He explained to the group that the Department of Agriculture is comprised of approximately 700 in-

Pennsylvania Secretary of Agriculture Kent D. Shelhamer speaks with Helen Wivell, vice chairman of the Pennsylvania Farmers' Association women's committee.

dividuals with a secretary, two deputy secretaries, and eight bureau chiefs. The bureau chiefs are heads of several areas.

Of these areas the most controversial, according to the Secretary, is the dog law. "We get more complaints in this area than in any other," Secretary Shelhamer explained.

Other departments governed by the Department of Agriculture are plant industries, markets, animal industries, foods and chemistry wage and rural affairs.

Immediately following Secretary Shelhamer's speech, the conference adjourned for the day.

Wednesday's events included a panel discussion on key PFA legislative issues such as marketing and bargaining, land use planning, and taxes. Following a question and answer period,

the group broke up into workshops to study policy development, implementation, and the legislative process.

During the afternoon

session, Senator Stapleton, chairman of the Senate Agriculture Committee, addressed the group.

Shiremanstown, Pa 17091

Farm Women Societies

Berks Co. Society 1

The February meeting of the Berks County Society of Farm Women Group 1 was held at the home of Mrs. Naomi Howard, Oley R2, with 19 members attending.

The entertainment for the meeting was Mrs. Grace John, New Berlinville, who showed and shared with the members different quilting techniques. Several of our own members brought quilts along that they had quilted.

The annual project of making homemade Easter candy will start on February 14.

On April 23 the county will be holding a hoe-down at the Hamburg Field House. The proceeds from this event will be given to the Hamburg Center.

The volunteer tea at Berks Heim will be held on May 11, and their open house will be held on June 12.

The annual Spring Rally will be on May 11 at the York Fairgrounds, York, Pa.

The March meeting will be held at the home of Mrs. Linda Levan, Oley R1 on March 9 at 8 p.m.

Berks Co. Society 7

The installation of officers for Berks Co. Farm Women Society 7 rang in the new year for the Society recently when they held their first meeting at the home of Mrs. Wilbur Stricker, Robesonia R1. Eleven members were present as well as four guests.

Doing the installing was county president, Helen Ebling. This year's group officers are: Mrs. Scott Rowe, president; Mrs. Wilbur Stricker, vice president; Mrs. Clark Beidler, recording secretary; Mrs. Charles Kissling, corresponding secretary; and Mrs. Don McKinney, treasurer.

The February meeting will be held at the home of Mrs. Scott Rowe, and will be on creative stitchery.

Berks Co. Society 9

The monthly meeting of Berks County Society of Farm Women Group 9 was held in the home of Mrs. Sue Hendricks in Amityville on February 3. Thirteen members were present, including Mrs. Winnifred Hajik, a new member who was taken into the group.

The program centered on child abuse. James Harnish from the Berks County Children's Services, showed two films and discussed the causes and reasons for abuse of children. He also spoke on what the county is doing to aid victims and to help prevent future cases of abuse.

The March meeting, which will be a celebration of every member's birthday, will be held on March 2 at the Ben Franklin Inn near Douglassville.

Dauphin Co. Society 1

The Dauphin County Society of Farm Women Group 1 held its monthly meeting at 7:30 p.m. at the home of Jean Janssen. Co-hostesses for the evening were Ruth Oberholtzer and Bertha Kennedy. Fourteen members attended.

A short business meeting was conducted by the president, Bertha Kennedy. She read the group two letters from Gordan Mintz from the State Hospital thanking the group for the Christmas Party for the

patients and also for a monetary donation.

It was decided that since February is Heart Month, the group will make a donation to the Heart Fund.

At the end of the business meeting Ruth Oberholtzer reviewed the Farm Women Society by-laws.

Following the business meeting, novel entertainment was provided. The group was met at the door of "Cupid's Hospital," by Cupid's Nurse, Ruth

Oberholtzer, who admitted each member to this fun, light-hearted hospital. Each member - patient was taken to "the emergency room," "the accident ward," and "the operating room." In each of these rooms the patients were asked to complete various operations. This ranged from throwing cardboard hearts into a basket, sewing a heart-shaped puzzle together and cutting hearts from paper, to the final operation which

was making a many words as possible from the words "Lost hearts."

Prizes were awarded to those patients with the highest scores. Upon accomplishing all of the prescribed operations the group entered the "Convalescing room," which was where the refreshments were served. These refreshments were in keeping with

Lancaster Co. Society 2

The Lancaster County Society of Farm Women 2 held their February meeting at the home of hostess Kathryn Shreiner of Penryn. Co-hostess for the February meeting was Elsie Witmer. The meeting was on Safety and the guest speaker was Trooper Joseph R. Althoff of Troop J, the Lancaster State Police barracks. Trooper Althoff showed the women a film pertaining to "The Bunco Artist". The victims of bunco artists and resulting crimes are of no age or occupation limits; however, the principal victim is the elderly and the housewife. "Bunco" is a general term

covering a variety of fraud, deception, and theft-by-trick type crimes. Listed are a few safeguards to protect oneself when dealing with a bunco artist: practice the ancient law, "Buyer Beware" principle, and deal only with reputable, known business people, not a sales person who states he-she will be in the area for only a few days; when approached about your personal bank business, telephone your local banker, one that you personally know, and discuss with him-her your concern. Never discuss your savings or checking account numbers with a stranger.

If you think you have been a victim of a bunco artist, immediately telephone the police.

The State Trooper also

reminded never to reveal the fact that you live alone; never indicate the fact that you're in your home alone; and in case of a signature to be written to a contract, request the contract remain with you until your husband, or family member reads the contract before your name is signed to it.

The March meeting will be a dinner meeting which will be held at Ruhl's United Methodist Church in Manheim. Ladies of Society 2 will entertain their husbands at that time.

Lancaster Co. Society 14

Lancaster County Society 14 met at the home of Mrs. Benjamin Landis, Paradise R1, on Wednesday, February 9. Roll call was answered with a Bible verse having the word "heart" in it.

Speaker was Mrs. Eva Mills, a guest at Calvary Homes. Mrs. Mills is a retired missionary from Brazil. She spoke on her experiences there.

Hostesses in addition to Mrs. Landis were Mrs. Howard Combs, Mrs. Arthur Groff, and Mrs. Charles Mely.

The March meeting will be held at the home of Mrs. F. Edwin Rohrer, Paradise R1, on Wednesday, March 9 at 1 p.m. Speaker will be Jolande Bensenk, an exchange student from Holland.

Lancaster Co. Society 19

The Lancaster County Society of Farm Women 19

met at the Landisville Church of God on February 13. Twenty-eight women shared in the sewing of cancer pads and pressure cushions. Those present also shared in a pot-luck luncheon. The final activity of the day was an auction of items brought by the members.

Plans were made to make a financial contribution to the Welsh Mountain Medical Center. The United Cerebral Palsy volunteers also plan to help stuff envelopes for Easter Seals and to sew at the Lancaster General Hospital on March 10.

York Co. Society 12

Miss Linda Ebaugh, Delta R2, who has had eight years of 4-H experience, spoke about the goals, projects, and programs of the 4-H groups to the Friendly Society of Farm Women Group 12. She showed slides of her trip to the National 4-H Congress held at Chicago, Ill. She represented Pennsylvania as the state winner in achievement.

Group 12 met at the home of Mrs. Chester Craley, and approved donations of \$15 to the March of Dimes and \$10 to the conservation of York County.

Nineteen members answered to roll call. Two guests attended.

President Mrs. Carl S. Bacon presided and Mrs. Helena Stover had charge of devotions.

Farm Women Societies

(Continued from Page 53)

meeting there was a report by the treasurer Mrs. Charles Gable that \$165 was donated during the year 1976 to the following charities: March of Dimes, Conservation Society of York County, Heart Fund, Guatemala Earthquake Cause, Cancer Fund, Easter Seal Society of York County, Arthritis Fund, Sheltered Workshop for York County, Care, South Central Pennsylvania Lung Association, and Multiple Sclerosis Society.

It was announced that plans are being formulated for the 25th anniversary of the Society, April 26, at 12:30 p.m. at Avalong Farms Restaurant, York.

Next meeting, February 22, at 1:30 p.m. at the home of Mrs. John Massa will include a health and safety program.

York Co. Society 20

David D. Weston, police chief of Shrewsbury Borough, will speak on "Police Safety," at 1 p.m. March 8 meeting of Society of Farm Women, group 20, at the home of Mrs. Clara Shaffer, Shrewsbury.

Each member is asked to take a kitchen item for the Robert Strickler family, whose Stewartstown R2 home was destroyed by fire New Year's Day. Mrs. Rosalie Winters is in charge of the program.

The group has sent gifts to the Harrisburg State Hospital Volunteer Resources, York County Mental Health Association, and York Day Nursery and Kindergarten.

Following adjournment of the Society's March meeting, members will visit the nursery and tour the replica of York County Court House.

Plans for a bus trip will be finalized at the March meeting. Suggestions of sites to be visited may be submitted to Mrs. Sarah

Richardson or Mrs. A. H. Shaub.

Members wishing to assist with the York Hospital Fete, Mary 20-21, at York Fair grounds, are asked to contact Mrs. Richardson by April 1.

Mrs. Richardson said the county officers will sponsor a bus trip to the northeastern states, through the New York area and Twin Mountains in New Hampshire, July 9 to 18. Reservations can be made with Mrs. Sherrill Trimpey.

Mrs. Lula Rennoll and Claudia Bailey are in charge of arrangements to entertain Group 5 from York, the date will be announced. Mason-Dixon, Group 22, is planning to entertain the local society.

The group is contributing \$5 for prizes at the county spring rally May 11 at Fawn Grove.

York Co. Society 26

The February meeting of the Etters, Green Valley Society Farm Women Group 26 of York County was held at the home of Mrs. Richard Beard, York Haven R1 at

12:30 p.m. A valentine luncheon was served by the hostess to the 15 members and two guests attending.

The Society signed "Get Well" cards to shut-in members. An auditors report as well as a report of the state convention were made. New year books were passed out.

The Society approved a donation of \$25 for the American Heart Association.

Members observing January and February birthdays are Mrs. Kohler, Mary E. Hake, Barbara Sanger, Ruth Kann, Ethel Wilt, and Mrs. Amanda Weirman.

Group 26 will entertain the Dover Society of Farm Women Group 4 in April. It was also announced that the state Farm Women Spring Rally will be held at Memorial Hall, York Fair Grounds, Wednesday, May 11, 1977. A group bus tour is also being planned.

The March meeting will be held at the home of Mrs. Donald Muth, Etters R2. The date is Tuesday, March 8, and the time is 7:30 p.m. At this time, the Society will discuss and make plans for the group's Spring events.

Conservation officers met

ATLANTA, Ga. - More than 2,000 conservation leaders from across the nation met here recently to discuss issues affecting the condition and future of the nation's natural resources.

Lebanon Countians attending the 31st annual convention of the National Association of Conservation Districts February 6-10 were George Wolff of Myerstown; Donald Bollinger of Kleinfeltersville; and Clair Gerberich of Jonestown.

Senator Herman E. Talmadge, chairman of the Senate Committee on Agriculture and Forestry, keyed the session. He commented on the successful 40-year history of soil and water conservation districts in voluntary conservation programs and their emerging role in non-point pollution control.

Talmadge noted that conservation districts,

through the Soil Conservation Service, have offered the nation's farmers "40 years of friendly advice and tremendous technical service helping them with their conservation problems." He encouraged districts to maintain their leadership role in providing local guidance in soil and water conservation.

George R. Bagley, president of the National Association of Conservation Districts discussed the growth of stature of conservation districts, and their increasing participation in all facets of resource management. He advised districts to extend the opportunities for the public to participate in their important programs.

Bagley emphasized the need for common sense in implementing water quality plans by "marrying the traditional goals of conservation with those of water

Garden Spot observes FFA Week

NEW HOLLAND, Pa. - Members of the Grassland Chapter join with over 500,000 other FFA members in the United States in celebrating National FFA WEEK which starts today, Feb. 19.

Throughout the week the state's more than 300 chapters are planning activities to support the theme, "Agriculture's New Generation."

The 49-year traditions of FFA have held strong and produced a mighty work force for food and fiber to meet the needs of our nation and the world. Successful agricultural leaders of today are the testimony.

"Agriculture's New Generation" is in the making. They're FFA members today.

National FFA Week always includes George Washington's birthday in observance of his leadership in promoting scientific farming practices. Washington is considered the patron saint of the FFA and has come to symbolize the FFA Treasurer.

According to President Linford Weaver, East Earl, the Grassland Chapter will wear their FFA jackets on Wednesday, there will be a display in the showcase of

the main lobby at Garden Spot High School, newspaper articles in local newspapers, spot announcements on local radio stations, FFA placements given to local restaurants, brochures given to two agribusinesses, and on Friday FFA napkins will be provided in the cafeteria of the Garden Spot High School.

Organized in 1928, the FFA

promotes leadership, cooperation and citizenship among high school vocational agricultural students. The FFA Foundation awards program provides chapter, state and national recognition for supervised programs of agricultural production, marketing, processing and service.

Businesswoman urges others to get involved

By JOANNE SPAHR
LANCASTER, Pa. - Mrs. Joyce Hershey learned two things about poultry farming as a small child - you can't get much work done trying to feed a range of hens with empty buckets, and even though it is fun to watch chickens fall over when you hit them on the back of the head with a stick, they don't get up again after they fall over - which has had repercussions for you when the family finds out.

Mrs. Hershey was guest speaker for "Ladies Night" at the Pennsylvania Egg Marketing Association meeting which took place on February 11 at the Sheraton Conestoga near Lancaster. She is the secretary-treasurer of Hershey Equipment Company, Inc., Lancaster, as well as half of the husband and wife team that own the operation. Speaking on "A Woman's Role in Business," Mrs. Hershey made reference to

her beginnings in the poultry business, using this as a gauge to show her growth in knowledge of the industry. From her meager beginnings as a chicken feeder and a gatherer of eggs, Mrs. Hershey has moved forward to selling poultry equipment as complicated as an egg packer which packs 30-egg flats at the rate of 50 cases an hour. At present, she and her husband Don run a poultry and livestock equipment

business that is known for its installation and service of its products. At Friday's meeting, however, she explained that this wasn't always their business. Originally, she had been a city girl who married a poultry farmer who installed poultry equipment as a sideline. While he was out working at night, she gathered the eggs for him. The business eventually grew to the point where they went to full time in-

Mrs. Hershey

respect you and your ideas more than you might think." She especially encouraged the women present to become active in the promotion of eggs.

"Because we entertain and get together with our homemaker friends, we have so many avenues open to us to promote our product," she explained. To illustrate her point, she gave some examples of what she and other women are doing to help advertise their commodity.

"We can use eggs in our hors d'oeuvres at parties," she noted. And, she told the story of one friend who uses eggs as a snack food for her children when they come home from school. She also brought to light the example of a business she visited recently where the employees have large bowls of hard boiled eggs available to them to eat along with their coffee breaks in the morning.

"At the time I visited, the eggs could be purchased for five cents a piece," she commented. "Now, where can you get a breakfast snack for that low amount of money with all the nutrients as well?"

The egg marketing meeting and dinner was a good example of the case she cited. For the first time since the group has begun assembling for their monthly meeting, they displayed an edible egg centerpiece at Friday's meeting. They are trying to get more restaurants interested in the idea.

Another suggestion Mrs. Hershey offered was that women should share their recipes with each other.

Icy weather cut U.S. crops

HARRISBURG - The cold wave which enveloped the United States in January will continue to affect the production of such winter crops as oranges, potatoes and winter wheat throughout the coming months, according to the Pennsylvania Crop Reporting Service.

The United States winter wheat crop was put under stress during January by the subnormal temperatures and dry soils. Snow blanketed most of the major winter wheat producing areas during the early part of the month, but later the snow line receded northward and exposed the crop in the Southern and Central Great Plains. In the Northern Great Plains and North

Central States, snow protected the winter wheat throughout the month. Very little wheat acreage was damaged by winds.

The cold wave of January 18-20 brought temperatures into the low to mid-20's for several hours throughout all Florida citrus producing districts. A sample survey conducted the morning of January 20 showed some ice in nearly all oranges sampled. Cool weather during the balance of January was beneficial in minimizing losses through droppage and deterioration, and harvest of the early and mid-season orange crop has proceeded at a record rate since the freeze.

A total embargo was

placed on all shipments of Florida citrus fruit for fresh market for the period January 24 to February 2, in order to prevent the shipment of freeze-damaged fruit. A fruit damage survey as of February 1 found 35 per cent of oranges and 68 per cent of grapefruit with no damage. At that same date 14 per cent of the sampled oranges and five per cent of the sampled grapefruit trees showed serious to very serious leaf damage.

Long term effects to citrus trees cannot yet be fully evaluated, although damage is much lighter than for the 1962-63 freeze. Fruit damage will again be surveyed at mid-February to assess further freeze damage.

Citrus crop losses due to the freeze will be closely related to weather during the remainder of the harvest season. Temperatures above 65 to 70 degrees will promote fruit droppage and deterioration which have been light so far. The forecasts as of February 1 reflect significant fruit losses from the freeze, resulting from an expected heavier fruit droppage and from fruit weight losses

already evident in lower per-box juice yields.

Production of winter crop potatoes in California and Florida is now forecast at 2.4 million per hundredweight, 17 per cent below the January 1 forecast and 21 per cent below the 1975 crop. Cold weather, water shortages and continued dry weather have kept potato growth below normal. Expected yields in California are down 20 per hundredweight per acre from last month to 210 per hundredweight per acre. About a fourth of the crop has been harvested and size is running small.

The Florida crop is now forecast at 1.4 million per hundredweight, 22 per cent below the January 1 forecast and 23 per cent below the 1976 crop. Very little if any loss of acreage is expected, but again reduced yields are expected on more than half of the total acreage planted. Expected yields are down sharply from 200 per hundredweight per acre on January 1 to 155 per hundredweight per acre February 1.

Walker revives town meetings

WASHINGTON, D.C., February 14 - Congressman Bob Walker on Tuesday announced that his first "Old Fashioned Town Meeting" will be held in the Elizabethtown area on Saturday, February 19.

The "Old Fashioned Town Meeting" is scheduled from 10:00 a.m. until 11:30 a.m. in Room 127 of Nicarry Hall at Elizabethtown College.

Noting that recent polls

have indicated the American people feel distant from their government and that Congress in particular is held in low esteem, Walker said that the town meeting is an effort to help change those feelings.

Walker will be holding "Old Fashioned Town Meetings" throughout the 16th Congressional District on a monthly basis beginning this Saturday in the Elizabethtown area.

LANCASTER FARMING FOR FULL MARKET REPORTS

Businesswoman

(Continued from Page 55)

They can also pass egg recipes along through recipe columns in the various newspapers to which they subscribe.

In her closing thoughts, Mrs. Hershey offered what she thought were the three key ingredients for women in business.

"First you must have a willingness to learn," she enumerated. Then, she said, each individual must learn all that he or she can, and third, each person must actively promote the product which they represent.

"If you have and do all these things, then I think you have a 'full bucket,'" she said, referring to her opening remarks on her childhood. And, she explained, you always get more done with a full bucket than with an empty one.

Prior to Mrs. Hershey's speech, the members of the organization carried on a few points of business. John Hoffman, executive director of the Pennsylvania Poultry Association, spoke of a new egg promotion plan in which the egg industry will work directly with restaurants in Pennsylvania to promote the commodity. The egg industry is planning evening seminars to educate the restaurant owners and operators on new ways to prepare and promote the egg. According to Hoffman, this may be the first time the egg industry and the restaurants have worked closely together on a project of this type. He underlined the importance of the move by pointing out that 45 per cent of all eggs consumed are served in restaurants.

You are cordially invited to John Deere Farming Frontiers '77. It is the year's most outstanding farm-oriented film program. The movies were filmed on location in many areas of the U.S. and Canada. Drawings will be held for four door prizes, you could be a winner.

My Thoughts

By JOANNE SPAHR

I stood there scowling as the slowly approaching evening surrounded me. Why is it, I thought to myself, that everywhere I go, I have to take my entire life's possessions with me?

I was standing, slump shouldered, hands in my pockets to keep them warm, in front of the Penn Harris Motor Inn last week contemplating my camera bag, typewriter case, tape recorder, and overnight bag. I'd come to do a story on the Pennsylvania Farmers' Association Sweetheart Legislative Conference, and I'd come prepared—too prepared.

Isn't it bad enough, I continued in conversation with myself, that everywhere I go I have to lug around a portable U-Haul in the form of a camera bag-purse in which I stuff a 35 millimeter camera, three changes of lenses, an electronic flash, 29 pens, six pencils, two erasers, two notepads, kleenex, four extra rolls of film, and an ink stained, ripped dollar bill (which may or may not be legal tender at this point.) No, that must not be bad enough, I decided, because this time I had brought along a cassette tape recorder and a 35 pound portable electric typewriter, plus a change of clothes, hair dryer, and other miscellaneous items in an overnight bag.

How, I kept lamenting to myself, was I going to carry all that heavy luggage into the motel? (I, of course, would never think of making two trips because that would be too much trouble.)

Well, the only thing to do was give it a whirl.

So, I tried all sorts of arrangements and ended up with my overnight bag hanging around my neck with the bag in the back, knapsack style; my camera case on my one shoulder; my tape recorder in one free hand; and my typewriter in the other.

Aha, I thought. I did it. Only I didn't, because I didn't get more than a few steps before the overnight bag started choking me, the camera case slipped down into my elbow with a jolt, and I nearly dropped my typewriter because of the weight. Like a well-planned domino game, my sojourn to the motel room was over in a second.

Another plan of attack was in order. As I was mulling it over, however, I noticed a petite young woman hurrying toward me.

"Here, let me help you," twinkled the size five sophisticate. Decked out in a sleek brown leather coat, suede boots, matching gloves, and flowing, contrasting scarf, the stylish 5'2" little lady willingly held out her hands to take my lead weights.

Lumberjack-type individual that I am, I looked

at the helpful, tiny person and thought simultaneously, "Gee, how nice," and "I bet you never lifted anything heavier than your pet poodle in your life." What I said was, "Thank you very much, but I believe these things may be too heavy for you."

"Oh, nonsense," she retorted, "You ought to lift tobacco bales like I do — then you'd know what's heavy."

With these words, she was off like the bionic woman with my typewriter, camera bag, and overnight bag — leaving me with the measly little tape recorder. Sheepishly, I followed her in with my miniscule load. When we got to the room she introduced herself as a farm wife from Lancaster County who was at the Penn Harris to help with the legislative conference. Suddenly the whole image I had of her changed, and, once more I was reminded of a fact which never ceases to amaze me — farm women have the talent of combining attractiveness, grace, and poise with great physical stamina — a rare combination, and one to be admired.

Base milk price \$10.28 for January

ALEXANDRIA, Va. - Middle Atlantic Order Market Administrator Joseph D. Shine last week announced a January 1977 base milk price of \$10.28 per hundred-weight and an excess milk price of \$8.17. The weighted average January price is \$9.98 and the butterfat differential for the month is 10.4 cents for each tenth of a pound of fat. The January base milk price is up one cent from December 1976 but is 68

cents below last January. Order No. 4 prices are announced for 3.5 per cent milk f.o.b. plant location within 55 miles of Philadelphia, Pa. and also within 75 miles from the nearer of Washington, Dc. or Baltimore, Md. There is a six-cent direct-delivery differential applicable to producer milk received at plants located within 55 miles of Philadelphia. Shine stated that producer receipts totaled 465 million pounds during January, an

increase of 0.7 per cent from the previous month and almost eight per cent above the comparable figure a year ago. Class I producer milk totaled 286.6 million pounds and accounted for 61.64 per cent of total January milk receipts, compared to 62.78 per cent in December and 68.25 per cent last January. Base milk accounted for 85.90 per cent of total producer milk receipts in January, down from 89.48 per cent a year ago. There were 7,979 producers supplying Order No. 4 handlers during the month and the average daily delivery per producer was 1,880 pounds. Middle Atlantic Order pool handlers reported Class I in-area milk sales of 243.0 million pounds during January, a contra-seasonal

drop of 2.4 per cent from December 1976.

Maryland Holstein group will travel

CHESTERTOWN, Md. - A peripatetic (traveling) classroom on herd management practices and type classification for dairy farmers has been scheduled at four locations in two days during National FFA Week by the Maryland Holstein-Friesian Association.

Program assistance was provided by the Cooperative Extension Service at the University of Maryland in College Park.

The traveling classroom will make stops at the farms of selected Holstein breeders across the state on Thursday and Friday (Feb. 24 and 25).

It will start Thursday afternoon in the flatlands of the upper Eastern Shore; skirt around the Chesapeake Bay; head across the northern tier of counties comprising the rolling Piedmont area; and end up 24 hours later near the mountains in the Middletown Valley of western Frederick county.

Each stop will consist of a two-hour session, with two guest speakers and informal reports on herd management by the individual farm owners. Participants will have a chance to inspect the host herds.

Details of the schedule are as follows:

Thursday, Feb. 24
Church Hill (Queen Annes County) - 1:30 p.m. at Kinglea Farm southwest of Church Hill, or 10 miles southeast of Chestertown, off highway 213. Speakers will be Phillip C. Garrett, V.M.D., of Ringoes, N.J.

(Hunterdon County), and Ray Kuehl of Madison, Wis.

To find the meeting site, turn west on Clabber Hill road off highway 213 at the Route 213 Drive-In movie theatre just south of Church Hill. Farm is 1½ miles west, on left-hand side. For further information, contact the farm owner, John L. ("Jack") King, Jr.; phone: (301) 556-6421.

Bel Air (Harford County) - 7 p.m. at Schenning Brothers, 2816 Calvary road (highway 136), southeast of Bel Air. Speakers will be Philip C. Garrett, and Ray Kuehl.

The meeting site is located one-fourth mile north of Interstate highway 95 but there is no traffic interchange at the point where highway 136 crosses over I-95.

To find the farm, get off I-95 at Exit 4 and head south one mile on highway 24 toward Edgewood. Then turn east and proceed three miles on Highway 7 (Philadelphia road). Finally, turn north on highway 136 (Calvary Road); cross over I-95 and proceed one-fourth of a mile, just past Hookers Mill Road.

For further information, contact John E. Schenning or his son; phone: (301) 836-2785.

Friday, Feb. 25
Hampstead - 10 a.m. at Claybottom Farms east of Hampstead on Lower Beckleysville road at the Baltimore-Carroll county line. Speakers will be Ray Kuehl, and Dr. John H. Nicolai, Jr., of Ellicott City, Md. (Howard County).

To find the meeting site, follow Highway 30 to the south edge of Hampstead in eastern Carroll County. Then turn east on highway 88 (Black Rock road) and jog into Lower Beckleysville Road. Proceed three-tenths of a mile east to the farm.

Coming down Interstate Highway 83, turn west on highway 137 (Mount Carmel-Hereford Road) at Exit 27 near Hereford in northern Baltimore county. Proceed seven miles, across Falls Road, to the junction with Lower Beckleysville Road at Armacost. Then turn left two miles to the farm.

For further information, contact the farm owners - Kenneth Wm. Rhoten, phone: (301) 374-2831, or his son, Kenneth E. Rhoten, phone: (301) 374-9795.

Middletown (Frederick County) - 1:30 p.m. at Brook Lodge Farms south of Middletown on Sumantown road. Speakers will be Ray Kuehl and Dr. John H. Nicolai, Jr.

To find the meeting site, go west from Frederick on U.S. Highway 15 and 340, three miles past their intersection with Interstate Highway 70. Then turn north on Mount Zion Road one-half mile. Turn west on Jefferson Pike (Highway 180) and go two miles to Old Middletown Road at the west edge of Jefferson. From this point, proceed two miles north to Sumantown Road and go

one-half mile northwest to the farm, just short of the intersection with Carroll Boyer Road.

For further information, contact the owners, C. Renn Remsberg and Sons; phone: (301) 371-6786.

SOYBEAN ROASTING ON YOUR FARM

For peak feeding value have your soybeans roasted.
(To kill toxic enzymes in raw soybeans.)

1. Roasted soybean (not just cooked), increases digestibility by 15 percent.
2. Increases weight gain for beef & hogs.
3. Increases butterfat in milk & egg production.
4. Improves animal health, reduces vet bill.
5. Eliminates hauling to the mill & back to farm
6. Feed your own grown grain (Not exchanged with others).
7. Beans remain whole. Store for months without losing any feeding value

Construction to begin on animal import center

FLEMING KEY, Fla. - A \$5.5 million contract for construction of a new off-shore animal import center on Fleming Key, Fla., has been awarded by the U.S. Department of Agriculture.

The new center will be operated by USDA's Animal and Plant Health Inspection Service (APHIS) as a high-security import facility. When completed in January 1979, the center will permit safe importation of breeding cattle and other animals from countries currently prohibited from shipping to the United States because they are considered to be infected with foot-and-mouth disease (FMD), rinderpest, or other destructive foreign livestock diseases.

Construction, scheduled to begin in early February, will be in accordance with APHIS specifications for the housing, care and feeding of 500 cattle that must be isolated for five months under maximum security and sanitation conditions. Plans include facilities for veterinary examinations, laboratory testing, dipping, daily cleaning, a desalinization water supply system, and environmentally safe waste disposal.

Building of an offshore import center was authorized in 1970 by a federal law which, for the first time since 1930, permits direct imports of ruminants and swine from FMD-infected countries. The law requires strict security and testing to make sure no foreign livestock disease can be introduced into the United States.

Fleming Key was selected in 1971 from a number of possible sites primarily because of its location at the tip of the Florida Keys, more than 100 miles from the mainland. In addition, the 16-acre site is within the Key West Naval Base and thus inside a security area not normally accessible to the public.

Livestock will be carefully screened abroad in a pre-

export isolation facility approved by USDA on the basis of security and isolation standards similar to those required at Fleming Key. After pre-export clearance abroad, up to 400 cattle at a time will be brought by ship to Fleming Key to undergo the five-month isolation and testing period at the center. In addition, some 100 U.S. cattle will be kept with the imported animals to act as "sentinels" against any foreign diseases that might not have been discovered before shipment.

Livestock breeders have

long sought such a facility so they could import exotic breeds and improve their herds. Currently they can import ruminants and swine only if they are from nations considered by USDA to be free of FMD or rinderpest, two highly destructive livestock diseases that could seriously cripple American livestock production. Neither disease is a threat to human health.

APHIS officials said the new animal import center will employ 48 persons, 34 of whom will be hired locally.

Milk output record high

HARRISBURG - Both annual milk production and production per cow set new records for Pennsylvania dairymen according to the Pennsylvania Crop Reporting Service.

Annual milk production during 1976 totaled 7,507,000 pounds, a new record for production, up five per cent from the 1975 total of 7,140,000 pounds. Production per cow in 1976 was also a record, 10,633 pounds, an increase of 416 pounds from 1975. The annual average number of milk cows, at 706,000 head, was one per cent above the 1975 average.

Milk production in Pennsylvania during January 1977 totaled 620 million pounds, up six per cent from a year earlier. Production per cow during January averaged 880 pounds, up seven per cent from last year's figures at the same time. The number of milk cows in the Commonwealth during January was 705,000 head, down 4,000 or one per cent from a year earlier.

U.S. milk production during 1976 totaled 120.4 billion pounds, the highest since 1965, and four per cent above the 1975 estimate of 115.3 billion pounds. Output per cow was a record high 10,893 pounds in 1976, up 541 pounds from 1975 production. The annual average number of milk cows at 11,049,000 head was nearly one per cent below the 1975 average of 11,140,000 head.

U.S. milk production during January 1977 totaled 9,910 million pounds, up three per cent from a year ago. Production per cow averaged 899 pounds during the same period, an increase of four per cent from a year earlier. Milk cows on farms totaled 11,023,000 head, down one per cent from January 1976.

Coccidiosis topic of Young Farmers meeting

Outgoing president of the Solanco Young Farmers, Charles Craig, III, Nottingham, passes the gavel to the

new president, Jay Ranck, Quarryville R2. Ranck was elected at the last meeting of the group.

By SUSAN KAUFFMAN
QUARRYVILLE, Pa. — "Although cattlemen and dairymen are aware of the profit losses due to outright sickness or resulting death from diseases with obvious symptoms, they are not as conscious of the tremendous losses due to two invisible diseases of worms and coccidiosis," said C. E. McDougall, a representative of Merck and Co., Inc., a chemical company based at Rahway, New Jersey.

Explaining his concept by way of two films, a slide presentation, and discussion period at a recent meeting of the Solanco Young Farmers, McDougall provided basic information on these two health problems in large animals.

Although dairymen and cattlemen are realizing the profit drain produced by worm infestations, only recently have they become aware of the hidden losses

resulting from coccidia. "Long recognized in fowl, the coccidia have become a real problem in that they cut the efficiency of perfectly healthy looking animals," McDougall explained.

"By the time an animal shows the obvious signs of coccidiosis, bloody scours, the disease is at least three weeks old, has spread to other animals, and has begun to cut into performance of healthy looking animals," he added.

Coccidia eggs are ingested on plants eaten by the animal. According to McDougall, the eggs hatch inside the animal and develop through several life stages during which they damage the digestive tract causing it to bleed and cut absorption of nutrients into the body cells. Malnutrition and dehydration result in poor weight gain or even death.

"The coccidia have a 21-

day life cycle. "When the symptoms of a rough coat, bloody scours, straining or dehydration appear, the infestation is three weeks old and already cutting into performance," stated McDougall.

Coccidiosis hits cattle of all ages but is most common and damaging in calves up to a year old. Animals in confinement are especially susceptible according to Merck information. Coccidiosis in calves results in slow weight gain, general unthriftiness, susceptibility to pneumonia or death. The animal may recover from coccidiosis but never quite catch up with unfested animals, said McDougall.

Crowded loafing sheds and pastures for beef and dairy animals, alike, create ideal conditions for spreading coccidiosis and worms as well, emphasized McDougall. Avoid over-

crowding, and isolate and treat sick animals promptly; then give the rest of the herd preventive medications, he advised.

To emphasize the importance of treating cattle for worms, McDougall cited a study done at the University of Florida on the effects of parasitism on cattle. According to published material from that study, cattleman lose an estimated 100 million dollars a year to cattle worms. "It is safer to assume that cattle are infected with worms than to assume that they are not, since even apparently healthy cattle can suffer from worms," the study findings stated.

A study conducted by the University of Wisconsin department of parasitology found animals which do not look sick but have confirmed cases of worms are nonetheless inefficient feed converters. According to DHIA production records kept in 1972 and 1973 on 12 commercial herds containing a total of 488 cows, the profit gained from treating dry cows for worms resulted in \$35 per cow.

"Although the farmer can

never get rid of worms, he can control them," said McDougall. He recommended young animals be treated in the Spring and Fall and older animals be treated while dry.

Preventive plans, whether using boluses, pellets, soluble powders, or drenches, or the newer pastes, will control these often silent diseases and

keep them from invisibly robbing profits, concluded McDougall.

Previous to McDougall's presentation on parasitism in large animals, the Solanco Young Farmers elected officers for the coming two years. They are: Jay Ranck, president; Clarence Neff, vice-president; Carl Herr, treasurer and Jim Huber, secretary.

BALANCED NUTRITION vs. HIGH SUPPLEMENT COSTS

We got  em licked.

Everyone wants to be sure of balanced nutrition. After all, it's the performance of your herd that means profits for you. With Mol-Mix® liquid supplements, your supplement dollar not only helps guarantee your cattle's performance, but also helps guarantee your net profits. Mol-Mix guarantees the moistures and sugars in our standard formulations and ingredients like corn distiller's solubles, condensed fermented corn extractives, phosphoric acid, ammonium polyphosphate and our unique "buffered release" formula provide the balanced nutrition so essential for top milk production. And you know what that means for your profits.

Even today, with so many supplements compromising quality for cost, Mol-Mix still includes the very ingredients that continue to keep us "The Liquid Leader." With Mol-Mix, your supplement costs are

a good investment toward the performance and profits you will receive in the future. This spring, make Mol-Mix liquid supplements a part of your feeding program. We're not talking about something that will only add to your feeding costs . . . we're talking about the bottom line.

Zero - PIONEER OF FARM BULK MILK COOLERS

Farmers facing tough winter

By LAUREL SCHAEFFER
SINKING SPRING, Pa. The coldest winter in ages has hit us this year and everyone can't help but be aware of it, especially farmers. Farmers not only have had to deal with the high heating costs, natural gas shortage, and school closings, but they have had other problems besides.

As Edward G. Hartman put it, "The hardest thing for me to do was to get out of the door in the morning." The Hartman Brothers operate some feedlots and a dairy outside of Reading. The cold weather has taken its toll on them since they have five different places where they have to go to feed. If they didn't run into problems

while feeding the livestock, they ran into road problems trying to get there.

"The cold weather has made even the little chores major operations," Hartman told Lancaster Farming. It was nothing to feed the cats - all I would have to do was give them some milk, but with this cold spell I have had to take extra pains to keep the milk from freezing before it gets to them.

Hartman has also had to carry a five gallon bucket of hot water on his truck to mix with the calves' milk and has had to keep checking water spigots. All of this extra work has doubled his feeding time. But Hartman also added, "Having the schools closed for a few days gave me an extra helper which came in handy."

Another area farmer said he had problems with frozen water lines and keeping his lane open. The snow didn't get a chance to melt and the wind kept blowing it back into the lane.

Dennis Manbeck of Robesonia said the unusually cold weather has

caused some problems on his dairy operation as well. He has had problems with frozen water pipes and handling frozen manure. Manbeck told Lancaster Farming, "we are set up to handle liquid manure and when it freezes we have problems." Manbeck mentioned another problem which many people are facing. With the severe cold, farmers aren't getting much of their maintenance work done.

Starting tractors and other machinery tend to be another set-back. Hartman said he would have to put a heat lamp on a frozen conveyor to get it working every morning because the oil in the motor would get too stiff to let it run.

Frozen silage has been another problem facing some area farmers. Hartman told of the contents in one silo being frozen so hard, they had to go up and chop it loose with an ax. It would come out like chopped ice at first and the unloader would stick, Hartman said. "In the severest cold the cattle were

Lancaster Farming, Saturday, Feb. 19, 1977-61

eating less also." They would have to go outside to get the feed and the barnyards were frozen and rough which made walking very difficult for them," the Berks County Farmer added.

If these problems weren't enough the warm weather which followed brought another one, but no one really complained. There was a large snow drift in the drainage ditch at one of the farms and the water backed up into the cattle stable. Hartman said, "we worked until after nine o'clock one

evening to clean the water and manure out of the barnyard. We had to load it on to a truck and dump it in a field to be spread later, because the ground was too soft to spread it at the time."

The gas shortage has also hit farmers again. "Last week we got a notice to cut back our milk production 15 per cent" one farmer told Lancaster Farming. "The gas supplies to the dairies must have been cut back and they can't handle all the milk. If this lasts we may have to dump some of it."

Expansion has been name of game

Enlarged and even new barns, along with clusters of silos tell the story of many a farm in America. The Wilbur Laudenslager farm in Dauphin County is an example of how growth and new agricultural technologies have taken a

foothold. The Laudenslagers look upon their progress favorably and expect the future of dairying to remain bright.

By DIETER KRIEG
HALIFAX, Pa. - In 35 years of farming, Mr. and Mrs. Wilbur Laudenslager have increased their dairy herd from seven cows to nearly 100. It's not at all an unusual trend, but it is worthy to note that the family has taken progress in stride and is continuing to look at dairy farming as having a solid and healthy future.

"It's the best business to be in," Laudenslager commented, without the slightest trace of a hint that he didn't mean just exactly that. His 23-year old son, Karl, agreed, commenting that dairying is the best choice as far as farm businesses go. "The future looks pretty good; there's ups and downs, but not like there are with hogs and chickens etc.," the father and son team agreed.

The Laudenslagers farm a total of 530 rolling acres east

of here in northern Dauphin County. Of that they own 235, while the rest of the ground is rented. Corn and hay are the predominant crops, with milk being the primary source of income. Last year the 95 cows in the Laudenslager's relatively new free-stall barn produced an average of 14,394 pounds of milk with a 4.0 per cent test and 577 pounds of butterfat per head. It was only their second year in the DHIA program. Karl, who is most closely associated with the herd, continues to look ahead and strives for improvement in all management areas.

"You've got to manage it," commented his father, who started in the dairy business in 1942 when he and his wife, Jean, milked seven cows by hand. The Laudenslager farm was formerly owned by Mrs. Laudenslager's

Winter "Buy for Less Sale"

Stormor, Inc.

Fremont, Nebraska

Mr. and Mrs. Wilbur Laudenslager have increased their dairy herd from seven cows to 95 and raised a family

of eight children. Remodeling and growth have been a part of their lives since they began farming in 1942.

Expansion

(Continued from Page 62)

parents. All along it has been a family operation. Mrs. Laudenslager is in charge of raising calves, attending to that chore twice a day. "One year," said her husband proudly, "she lost just one or two out of 50." In addition to her barn responsibilities, Mrs. Laudenslager keeps the farm records and is the mother of eight children.

A primary reason the farming operation has expanded is that two of the Laudenslager boys have definite plans to enter the

dairy business. Aside from Karl, there's 17-year old Murray, who is presently finishing up his last year in high school.

"We bought one farm and then another," commented Mrs. Laudenslager with an easy smile. "Our first bulk tank held 200 gallons - boy, that seemed big," she continued. Now they have a 1200-gallon tank in a spacious milk house which adjoins a double-three milking parlor with side-opening stalls. It takes about two hours to milk the herd.

"Every step we took was a

big one, at least it seemed that way," remarked Laudenslager, confiding that his new barn "on the hill" is just about paid for. It was constructed in 1971. Since then the Dauphin County farm family has also put up several silos and a liquid manure handling system.

The latter was decided upon to save time and labor. It's also a convenience to not have to haul manure in bad weather. The value of the manure as fertilizer was also taken into consideration. "It saves nitrogen fertilizer," Karl emphasized, who along with his father agreed that the system they chose had more to offer than other manure storage facilities.

The Slurrystore holds 300,000 gallons, or 200

What's new

Known as StratoTherm, the unit consists of a dome-shaped fan housing attached to a flexible plastic duct, six inches in diameter. The device is suspended from the ceiling of a building and is powered by 110-120 V AC current. The plastic duct should reach to about 12 inches from the floor. When operating, the fan continually forces air down the tube at the rate of 120 cubic feet per minute.

According to Doug Rusth, president of the firm, the StratoTherm takes advantage of the basic phenomenon that hot air rises. "Most buildings suffer from heat stratification," he pointed out. "Users can save up to 24 per cent or more on their heating costs; normally the units pay for themselves in heat savings within one year," he said.

Through simple air convection, the StratoTherm devices will raise floor temperatures from 7 degrees to 15 degrees, while actually lowering heating costs.

One StratoTherm unit will de-stratify an area of up to 1,500 square feet. In multiple installations, each unit will de-stratify 2,000 square feet of floor area. Obstructions to the room's air movement, such as area dividers, may require closer spacing of units.

Rusth also emphasized the fact that the units don't have to be permanently installed. Not only can the sleeve be pushed aside out of the way, but the whole unit easily can be taken down and put in storage, for use only in cold weather, for instance.

The StratoTherm name has been registered as a trademark, and the device has been submitted for U.S. Patent Office approval.

For further information on StratoTherm, including distributor or representative arrangements, write Rusth Industries, P. O. Box 1519, Beaverton, Ore. 97005.

DRUM DE-HEADERS

Weil drum de-headers offer a simple, time-saving way to open drums of every size and gauge with no more hand and finger injuries from chiseling, no more fires from torching. Leaves the drum edge completely smooth - drums can now be recycled as re-usable, all-purpose containers.

Lightweight and easy to use, Weil drum de-headers are constructed of forged steel. The steel alloy blade will last indefinitely, and can be easily replaced.

Nesseth piston pumps

Nesseth Piston Pumps are now available in a variety of complimentary sizes and power units to meet your specific manure handling needs. Our two new hoppers can be equipped with any of the three drive unit options and either an eight or ten inch square piston. Nesseth pumps are self-contained for easy and economical installation - assemble the hopper, hang it in place and cement it in. There are no complicated cement forms or expensive basements to build.

If you are now planning to put in liquid manure storage, (either a lagoon or an above ground storage tank) find out the advantages of using the Nesseth piston pump to move the manure from the barn to the storage area via underground PVC pipe. Call us today for more details and for information where you can see the Nesseth piston pump in use.

**Prevent Fogging Easily -
With "Grayco No-Fog Cloth"**

Large size-17 in. x 18 in. complete with zip-seal storage pouch.

ONLY \$1.19

Economical, Lasts For Years.

*A Necessity In Your Car . . . Wipe windshield and rear window with cloth before driving. One application can last all day long. Inside of your windshield stays crystal clear in rain, sleet, snow or hail. Even in worst weather, windshield won't fog up.

*A Real Convenience In Your Home . . . Kitchen: Simply wipe Cloth on windows and they stay clear, even when the kitchen fills up with steam from cooking and dish washing. Bathroom: Wipe mirror with Cloth once and bathroom windows and mirrors stay clear all day-even after a hot, steamy shower!

*Perfect to keep eyeglasses and goggles fog and mist free

FREE REPLACEMENT GUARANTEE:

Buy with confidence. Your "GRAYCO NO-FOG CLOTH" must perform as advertised, fog preventing action must last for at least one year, or it will be replaced to you free of charge

AGWAY

HEADQUARTERS FOR YOUR MILKER SPECIALISTS

The panel with built-in convenience

Universal full-control milkhouse panel

- Easy to maintain, operate and clean
- Controls switch from "milk" to "wash" in seconds for fast, thorough pipeline cleaning
- Automatic self-drain for complete drainage

Add milking convenience to your stanchion barn

Agway Pipeline System

The Agway Pipeline System lets you milk without ever making a trip to the bulk tank! Simply plug into the pipeline and vacuum lines at each stanchion and the milk is pumped automatically! Your milk stays fresher, cools faster because it gets to the bulk cooler quickly.

Ask Agway to custom design a system for you.

Lower Pouring...
easier cleaning...
faster cooling...

The Girton Diplomat

Lower cooling costs.
Recent tests established cooling electrical needs at 0.4 kilowatt hours per 100 lbs.

Faster cooling.

Entire tank bottom is refrigerated for maximum cooling effect. Surge drum is insulated for extra efficiency.

Keeps it cool.

Foamed polyurethane insulation equals 4½" of corkboard on sides and bottom.

Help when you need it.

Qualified service experts throughout the Northeast are always on call.

A size to fit you.

Available in sizes from 200 to 1000 gallons... with or without automatic washers.

Use well water to cut your cooling costs

PRE-COOLING SYSTEM by Top Line

Uses your well water to pre-cool milk by 20-25° in the line! Saves money, cuts compressor time in half. Simple, effective, economical.

Get pipelines clean... automatically!

Universal deluxe full convenience washer

- Can be programmed to sanitize at your convenience before milking
- Sanitizes in just 30 minutes
- Has 3 large chemical dispensers

See precisely when to remove teat cups!

Universal full view milker

Transparent polysulfone cluster allows you to see milk leaving each teat. You never over-milk because you see milk flow. Large size reduces vacuum fluctuation. Saves time, too.

For the Man Whose BUSINESS is Producing Pork

IF YOUR BUSINESS IS PRODUCING PORK THEN YOU KNOW HOW CRITICAL YOUR DECISIONS ARE WITH REGARD TO YOUR PROFIT AND LOSS.

DECISIONS. PROFIT & LOSS.

Some decisions are based on things you cannot control.

Like the weather. Feeder pig prices. Fat Hog prices. Viruses.

Other decisions are based on things you can control.

Like the type and size of buildings. Breeding programs. Sanitation and disease prevention programs. Feeding programs.

FEEDING PROGRAMS. DECISIONS.

The right choice of a feeding program is critical to your profit and loss, especially today. When hog prices are dropping, the real pork producer knows his hogs performance must go up. He knows he cannot afford to yield to the pressures of lowering the quality of his feeding program and losing efficiency, because his BUSINESS is producing a pound of pork at the lowest possible COST.

If your business is producing pork then you should be considering a MASTER MIX pork production program. Because MASTER MIX has a program to fit your situation.

Laughman is chairman of District 18 of the American Dairy Association

By JOYCE BUPP
York County Reporter

YORK, Pa. - Charles Laughman, Glen Rock R1, was elected to serve as chairman of District 18 of the American Dairy Association during a reorganizational meeting on February 8 at the Billy Budd Inn, York.

Vice-chairman is Paul Keeney York R 11. John Krone, Glen Rock R2, was named secretary. Serving as area director to ADA will be Edwin Zeigler, Seven Valleys R1. Assisting as the alternate director is Nelson Breneman, Spring Grove R1.

The officers will represent independent dairymen within the nine-county district who are supporting the promotional efforts of the Association through voluntary advertising checkoff participation. The 19 ADA districts within New York, New Jersey, and Pennsylvania represent 70 per cent of the milk sold in the United States and 45 member unions.

Representing American Dairy Association at the district meeting was Charles Kier, Industry Relations Representative. Kier announced an adopted budget for 1977 of over four million dollars for designated promotional activities.

Out of each dollar spent by the ADA, 96.1 cents goes toward actual promotional and nutritional activities, directed primarily at mothers of children. The popular, award-winning series of commercials, "Milk Is A Natural," and the animated "Milk Does" spots

account for a bulk of the promotional spending.

The Dairy Association is also heavily involved in nutrition education of consumers, as well as some related work with school children on dental learning materials. "Doctor in the Kitchen" is a syndicated column prepared by the Association and carried in over 1000 newspapers. Media conferences disperse periodic findings on dairy nutrition for nationwide publication.

Producer research is another arm of the industry, with methods being developed to find better ways of testing for antibiotics in milk, purifying whey wastewaters from cheese manufacturing and

devising better ways of testing for cattle diseases without obtaining false readings.

Representing the recently formed Keystone Milk Marketing Council was Joyce Groff, dairy promotion supervisor from the Pennsylvania Department of Agriculture. The KMMC has been granted \$10,000 of ADA's budgeted funds for use by in-state advertising efforts. Ms. Groff reported on the activities of the state dairy princess program which she coordinates.

The American Dairy Association will convene in Syracuse, New York, on March 3 for their annual meeting.

Potatoes up

HARRISBURG - Potatoes in storage in Pennsylvania on February 1 totaled 2,750,000 hundredweight, according to the Pennsylvania Crop Reporting Service. This was 39 per cent of last year's production, and 47 per cent above stocks a year ago.

In the U.S., stocks of potatoes for all uses held in

storage by growers, local dealers and processors in the fall production areas totaled a record high 139.7 million hundredweight. This is 10.6 million hundredweight (eight per cent) above the 129.1 million hundredweight on hand a year ago and 6.5 million hundredweight (five per cent) more than February 1, 1975.

One good Stihl deserves another. And when it comes to spraying, blowing, or dusting anything, the SG-17's got it covered. On top of that, it's lighter and more powerful than anything like it in the field. And it comes complete with all the engineering craftsmanship and know-how that goes into each and every piece of equipment Stihl makes.

So, if you'd like more information about the SG-17 and all of its attachments, or about other Stihl farm tools, ask your dealer.

"What Makes Snacks Snackier?" popular television advertising theme asks the American Dairy Association's poster, carrying out the theme of milk's enhancement of all foods.

'Bargain cow' holds title of 'Top Producing Guernsey'

By JOYCE BUPP

York County Reporter
YORK, Pa. - Behind every successful cow there is a devoted cow lover.

Happy Hill F. Jeanette is a successful cow. Last year she ran the bucket over enough times to win herself the title of "Top Producing Guernsey Cow In Pennsylvania," finishing with a record 21,243 pounds of milk and 1028 pounds of fat in 317 days.

The devoted cowlover who spurred the six-year-old to win the coveted award is Larry L. Amspacher, herdsman for Avalong Farms, York 7.

This prize-winning team of man and animal began when Amspacher purchased the registered Guernsey at a sale in November of 1973. Jeanette was bred by Happy Hill Farms, Ohio, and was sired by Spring Ridge G. Falcon. Her dam, Happy Hill Holly Jean (VG) produced over 11,000 pounds of milk as a three-year-old.

Avalong Farms received the state production plaque at the Pennsylvania Guernsey Breeders Association's annual meeting, held at the Farm Show. And at presentation time, the high-producing cow was again milking 103 pounds of milk

daily with a 5.2 per cent butterfat average, well on her way to setting another record.

Not content with one award-winning cow, Amspacher is pushing the entire herd toward even greater accomplishments. Last year, the 46 cows on test finished with a herd average of 12,653 pounds of milk and 622 pounds of fat, placing them as third high Guernsey herd in Pennsylvania. Well under way to passing their 1976 finish, the herd is maintaining a 1977 rolling herd average of 12,809 pounds of milk with 631 pounds of fat.

Amspacher's deep pride in the high-producing cows becomes evident when he reminisces about bringing Jeanette into the herd.

"I only paid \$360 for her,"

he comments, with a mischievous grin on his face and a twinkle in his eye. "She was one of the biggest bargains we ever got."

Alva R. Long, Whiteford

Road, York, owns Avalong Farms, Inc. The operation includes two dairy herds, direct-to-consumer milk sales, and a dairy bar, restaurant, and banquet facilities.

1976 apple crop down by over 1/3

HARRISBURG, Pa. - Pennsylvania's 1976 commercial apple production is estimated at 360 million pounds, down 35 per cent from 1975's total production of 550 million pounds. The crop is 29 per cent below 1975 total utilized production of 503.6 million pounds.

The 1976 apple crop converts to 8,571,428 boxes of 42 pounds each.

Apples in cold storage on December 31 totaled 101,502,000 pounds, which is a decrease of 41 per cent of 69,141,000 pounds from the same period last year. Indicated disappearance during December amounted to 44,333,000 pounds.

The apples in cold storage December 31 convert to 2,416,714 boxes of 42 pounds each.

Pennsylvania apple production by varieties indicates that Golden Delicious is the leading producer for the first time since records began in 1942, although Golden Delicious production, estimated at 81.0 million pounds, was down 16 per cent from last year.

Pennsylvania retained first place in production of York Imperials at 73.8

million pounds, 40.5 per cent of the U.S. total.

Production of all apple varieties was below the 1975 crop levels. Varieties produced and their respective percentage of total 1976 Pennsylvania production are: Golden Delicious, 22.5 per cent; York Imperials, 20.5 per cent; Red Delicious, 15 per cent; Stayman, 14 per cent; Rome Beauty, 14 per cent; McIntosh, four per cent; Jonathan, 3.9 per cent; Cortland, 1.5 per cent; and all others, 4.6 per cent.

Utilized 1976 production from the nation's commercial apple producers was 6.2 billion pounds, a 12 per cent reduction from last year's record and four per cent below 1974's 6.5 billion pounds. Virtually all of the short 1976 crop was utilized, while in 1975, nearly six per cent of the total grown was lost due to economic abandonment and excess cullage.

Red Delicious, the largest variety in the United States, accounted for 35 per cent of total production. Other leading varieties as a per cent of the U.S. total were: Golden Delicious, 15 per

cent; McIntosh, nine per cent; Rome Beauty, nine per cent; Jonathan, six per cent; and York Imperial, five per cent.

Production declines were registered for all varieties except Gravenstein and Yellow Newton. The greatest percentage decreases were: York Imperial, down 47 per cent; Rhode Island Greening, down 42 per cent; Stayman, down 40 per cent; Rome Beauty, down 34 per cent; and Jonathan, off 29 per cent.

Longwood opens example gardens

KENNETT SQUARE, Pa. — Longwood Gardens will hold a public opening of its 1977 Example Gardens on February 15 between 4:00 and 6:00 p.m. The theme for this year's garden is "A Quiet Spot With a Bench." The usual \$2 admission fee to

the garden will be waived for the occasion, and refreshments will be served in the music room off the main conservatory. The example Garden area is located in the azalea house, near the main conservatory.

The 1977 Example Gardens

demonstrate different ways of developing a secluded, private outdoor area in the home landscape. The architects who designed the four gardens emphasized the use of plant materials rather than architectural structures this year. Large

evergreens, for example, are used in several places rather than fences to create visual barriers between the Example Gardens. There is an important lesson in those evergreens for the home gardener. Besides giving a softer, more natural effect than man-made structures, plant materials are often less expensive (particularly if small plants are pur-

chased and allowed to grow on the site).

A variety of smaller plants under the pines lend texture and color to the 1977 example Gardens. Many are scarce native plants, such as the elegant yellow ladies-slipper orchid and the "insect-eating" pitcher plant of the pine barrens. It may surprise home-owners to know that these plants are not only highly suitable to many

landscape situations, but are also readily available from specialty nurseries for reasonable prices.

Longwood Gardens is located at the junction of U.S. Route 1 and Pa. Route 52, northeast of Kennett Square, Pennsylvania. It is open daily, the grounds from 9:00 a.m. to 5:00 p.m. (6:00 p.m. in summer) and the conservatories from 10:00 a.m. to 5:00 p.m.

GO BIG RED

WINTER CLEARANCE SALE OF MANURE SPREADERS

**Bear claw paddles
assure fine
shredding, even
spreading**

International 500 Series Spreaders

You're sure to find the spreader you need in this big International line-up of 6 high-performance models. The single-beater unit has high-strength spring-steel paddles with staggered cutting "bear claws" to tear and shred packed and frozen chunks thoroughly, then spread material into the pattern you prefer. Extremely simple, yet highly effective.

- Sizes from 148 to 313 cu. ft. capacities (rated heaped boxes).

- A-frames extend back to wheels, prevent box twisting and jerking.
- Corrosion-resistant steel box sides on 4 smaller models guaranteed for the life of the spreader.
- High-quality, high-strength pintle chain used on aprons
- Slurry pans and hydraulic endgates available for liquid-type manures.
- Optional upper beaters and upper spring bars boost spreading efficiency.

What's New . . .

SOLAR HEAT COLLECTOR

Designer Daniel I. Hadley, updating and improving a 40-year-old Federal design for solar energy, has come up with plans for a simplified, low-cost, do-it-yourself solar heat collector that is capable of heating a room approximately 15 feet square. Through test models - some operating continuously for as long as seven years - Hadley said he has "proved

conclusively" that his hot air or hot water solar heat collector will heat a well-insulated room 15 feet square when the sun is shining. He stressed the factor of well-insulated rooms. Hadley added that the unit can be attached to existing heating systems for supplemental supply, or coupled together to warm larger areas.

Hadley said that the plans and specifications are so simplified that almost any handyman - or woman - can build the basic unit from standard materials obtainable at neighborhood

suppliers at a cost of about \$150 to \$200. It can be put together in basement or garage over a week-end, he said.

Hadley is the first to point out the idea is neither new nor patentable. He simple utilized the basic principles of a Department of Agriculture design of 1936, and, through years of testing and implementation, and the use of modern, more durable and efficient materials, evolved a system which "nearly anyone with hammer, drill, saw, and soldering equipment can build."

The hot air collector is a four by-eight-foot panel of thin plastic mounted on a wooden box lined with insulating board and containing a piece of galvanized sheet metal, an ordinary clothes dryer hose and a small fan to carry hot air into the house. The hot water unit utilizes a coil of copper pipe and a small pump. The coils alone hold 10 gallons of hot water - about enough for a shower, shave and shampoo, according to Hadley, who now heads Hadley Solar Energy Co., Wilmington, Del.

**BIG FUEL-SAVING
TURBO-CHARGED
AIR-COOLED DIESEL**

130 PTO HP STRONG

The Deutz D 130 06 uses less fuel than any tractor in its class. And it comes with these outstanding features as standard equipment: hydrostatic power steering, hydraulic brakes, 16 forward and seven reverse gears, synchro-mesh transmission, independent PTO, differential lock, heavy duty swinging draw bar, independent parking brake, Deutz safety cab and four-wheel drive available as optional equipment.

**15 FOOT
POWER HARROW**
KMN Modern Farm Equipment, Inc. recently introduced the new Niemeyer TE-450 15 foot power harrow. This rugged 3-point linkage unit has a 1000 rpm gear box and PTO. Unit weighs 2750 lbs. to insure positive action of the oscillating tines in all types of soil conditions. The TE-450 is a secondary tillage tool ideal for seed bed preparation, stubble in-

corporation, pasture break-up as well as chemical and fertilizer incorporation and moisture control.

A unique feature of the TE-450 is its towing mechanism. A hydraulically controlled transport wheel is lowered into position at one end and the tractor is backed into a 2-point quick hitch at the other end. Unit is transported length-wise and can be changed from working position to transport in less than three minutes.

SPERRY NEW HOLLAND BALER FEATURES GREATER CAPACITY

The Hayliner 315 is a new 14 x 18 medium-duty baler from Sperry New Holland, featuring increased durability and greater baling capacity.

In addition, the Model 315 is designed to produce consistent bale shape that is ideal for mechanical handling. An exclusive articulated tension rail keeps the load stable over the entire length of the bale, providing uniform density. The bale case has been lengthened, permitting bales to be kept under pressure longer, and the twine is centered eight inches apart on the bale.

Also exclusive, the flow-action feeding system has a larger and more gently curved feeder bar for smooth operation and gentle hay handling. The super-sweep pickup is six inches wider, increasing baling capacity of the Model 315.

The pickup is offset from the bale chamber and the tongue is longer, permitting operation with larger tractors.

Contributing to smooth, quiet operation are cushioned hay dogs and needle latch areas, plus Elastomer caps on the feeder bearings. The new power pivot PTO, with its pivoting pedestal, eliminates chatter in the tightest turns and increases life of the driveline.

**TRY A
CLASSIFIED
AD!**

FARROWING PIGS A PROBLEM - STOP LOSSES HOUSE THEM IN A CASTLE

AVAILABLE WITH PIT OR PITLESS

Models come 12 or 24 feet wide (24-foot model shown here), in lengths of 32 or 50 feet. All 24-foot wide buildings have an entry door in each end. See chart on back of this sheet for more specifications.

Built-in ventilation system keeps building dry and provides fresh air for animal health. Unique air flow system pulls air in at roof ridge line, circulates it over the top of the animals, through the pit, and out. Note that design of roof system eliminates the need for any massive bulkheads that could restrict air flow.

E. M. HERR EQUIPMENT, INC. RD1, Willow Street, PA. Lancaster Co.

Farrowing stalls and nursery areas are equipped with aluminum T-slats in the floor, front and rear. Individual slats are 1" across the top and 1" high, with 3/8" spacing between slats.

Each farrowing stall has an adjustable sow feeder and automatic water cup. Nipple waterer is optional in place of water cup. Stall sides are adjustable to size of sow. Nursery feeders are provided for pigs.

Look at a few of the
features we build
into our structures.

Deibert Valley in southern Schuylkill County may be flooded if it is chosen as a site for a seven square-mile water reservoir. As many as 17 farms, including this land owned and rented by Wilbert Moyer, will be submerged if Pennsylvania electric

companies choose the Red Creek as their location for the dam and reservoir. The Red Creek is just barely visible in this scene and passes under a rural road at the dark spot, right.

Seventeen farms may be drowned

By DIETER KRIEG
LANDINGVILLE, Pa. - A dam and water reservoir project being considered near this southern Schuylkill County community has many of the citizens in the area up in arms. To combat the project, farmers and others in the area have formed a coalition known as "Citizens Opposing Red Creek Dam," or CORCD, for short.

A meeting was held here Monday night, with 75 people in attendance. The purpose was to continue to provide area residents with pertinent information and to organize ways by which the proposed dam site can be defeated.

Farmers in the area are concerned about losing their farmlands and homes, while the community as a whole is worried about the economic impact the proposed reservoir might have.

The Delaware River Basin Commission, headquartered in West Trenton, N.J., told Lancaster Farming that the purpose of the proposed stored water (not necessarily at the Red Creek site) is to provide "cooling make-up water" for nuclear electric generating plants. A spokesman for the DRBC noted that if plans aren't made now to meet present and future water requirements, a critical situation could develop by around 1983.

The DRBC spokesman further explained that "a number of electric utility generating stations are being developed and planned in the Delaware River Basin. We have a very dynamic basin, with seven million people within it and millions and millions more in adjacent areas. There's a great demand for water resources."

Electric companies in the eastern Pennsylvania and New Jersey areas are looking for alternate sources of water because of the loss of previously proposed water storage facility at Tocks Island in the Poconos area. Environmental groups and the Department of Environmental Resources (DER) brought that project to a halt, according to Ed Finnegan, secretary for the CORCD. He noted that the Tock Island site was purchased by the government 10-13 years ago and was otherwise approved for a reservoir. The government was reportedly willing to turn the site over to the utilities.

According to the DRBC, water from the considered reservoir at Red Creek will not be directly involved in cooling procedures at power plants. Rather, the stored water is to be released at certain times to control the salinity level of the lower Delaware River. Some concern has been expressed over the lowering of the fresh water content in that area and the inward movement of ocean water to take its place. A reservoir upstream from the Philadelphia area is supposed to help alleviate the problem.

The Red Creek Dam Site is located approximately 100 miles northwest of Philadelphia, with the Schuylkill River being the main artery of flow for the water from the Red Creek reservoir. The Red Creek itself is a tiny stream just a few steps wide. It is not expected to create the reservoir by its own flow once the dam is constructed (if it is constructed). Instead, water will be pumped into it from the Schuylkill

River, into which the Red Creek empties.

Lower Schuylkill Countians don't think much of the possible dam for several reasons, not the least of which is the loss of their lands, and homes and the dampening effect the completed project would have on the economy. The loss of farmlands and homes, for example, would mean the erosion of the tax base in South Manheim Township. Individuals and businesses are likely to feel the resulting consequences. The possible "economic erosion" could filter through the region for years after the project is completed.

The citizens are also concerned about the proposed reservoir not being of the fresh water variety. The water which is supposed to be pumped in from the Schuylkill will admittedly go stagnant, and when the reservoir is drawn down to supply water to the Philadelphia area, 100 miles downstream, the land areas which were previously under water will give off an unpleasant odor.

A study on the Red Creek site states: "The residences overlooking the site would be indirectly affected, in that the vista would be significantly altered, and may be distinctly unpleasant during periods of severe drawdown."

"Drawdown at Red Creek will occur in all years, and in a minimum year will involve a drawdown of 20 feet and 270 acres exposed. The average year drawdown would be 30 feet and 390 acres exposed. This would be approximately 40 per cent of the total reservoir area."

It may seem that water 100 miles away from its

destination will not have much effect on the target area, since it would be "spread pretty thin" all along its path (the Schuylkill River). But DRBC officials say the distance factor makes no difference. Like water carried in a pipeline, it will reach its destination and do the job it's designed for, they say.

It must be pointed out that the Red Creek project is not final. On the other hand, residents in southern Schuylkill County can't afford to wait until a decision is finalized, claiming that by that time they will be sunk for sure. They emphasize that of nine sites originally under consideration, the electric utilities have narrowed their choices down to four. Red Creek is rumored to be in the top two. The DRBC failed to confirm or deny that rumor, saying that their latest update has the narrowing down process down to four sites.

While the DRBC has much to do with the present proceedings and ultimate results, it is the utility companies which are the driving force behind the project. When they lost Tocks Island, they were directed to go elsewhere. The DRBC issued the utilities a directive last October by which they were given 12 months to develop plans for their own reservoir. The DRBC must approve their site selection as well as an environmental impact statement. The concluding phases of the site studies are now in progress, the DRBC told Lancaster Farming.

The Red Creek issue and similar other ones may end up being wasted portions of a study, according to in-

New Idea's Fertilizer Spreaders

For Orchards
or Vineyards

Optional attachments to New Idea's twin-spinner spreader makes it ideal for use in orchards or in vineyards. A side spread attachment eliminates the center portion of the spread pattern for use in orchards. The curtain attachment, adjustable from five to six feet, limits the spread width in vineyards. Without attachments you can spread up to 30-feet wide, or spread just to one side or the other by shutting off one spinner. It's quick and easy for one man to attach or remove from most Category I and II 3-point hitch tractors.

New Idea's Fertilizer Spreaders

Band Spread
or Broadcast

The optional band spreading attachment fits quickly and easily over New Idea's twin-spinner units, and adjusts from 28-inches to 68-inches for side dressing a wide variety of row spacings. Without the attachment, you can broadcast up to 30-feet wide, or just to one side or the other. With other attachments you can spread to both sides with none in the middle (for orchards), or limit the spread to five or six feet (for vineyards). Easy to attach or remove from most Category I and II 3-point hitch tractors, New Idea's Twin-Spinner Spreader is ideal for pelleted, granular and semi-granular fertilizer and most seeds. Built-in tow plate pulls a harrow while spreading or trails a wagon of fertilizer to the field.

We make your job a little easier.

New Idea's Manure Spreaders

Three easy ways to handle
sloppy manure

Hydraulic Endgate. Fingertip control, uses standard 8" single or double acting cylinder. Hand crank available. Fits all New Idea PTO spreaders.

Pan Attachment. Fits any New Idea Single Beater spreader. Lowest cost way to handle semi-liquid manure.

Mechanical Endgate. Fits any New Idea Cylinder/Paddle or Flail spreader. Closes with hand crank, opens from tractor seat. Fits snug for loading and hauling.

All New Idea Spreaders are backed by the famous Warranty on Wood in addition to a Full Year Warranty.

New Idea's Manure Spreaders

The nimble
giant

318-bu. New Idea Spreader
is easy to maneuver... and it gets
big jobs done fast!

There's more to a big spreader than size alone. There's strength. And balance. And high flotation tires. New Idea's got 'em all.

2-Year Extended Warranty The giant 318-bushel model has a rugged Extra Heavy Duty Conveyor Chain (20,000 lbs. tensile strength), backed by a long-term warranty for long-term performance.

Optional Upper Beater Increases load-carrying capacity, does an even better job of shredding and spreading. Built to last—and get those big jobs done—fast!

Exotic disease eradication team formed

HARRISBURG - Pennsylvania's Acting Secretary of Agriculture Kent D. Shelhamer on Monday announced that the Department is ready, willing and able to handle any problems when exotic diseases break out in the Commonwealth's livestock and poultry.

Shelhamer said that

Pennsylvania has been extremely lucky in the past few years to escape the spread of any exotic diseases. The day to day work of the Bureau of Animal Industry and strong preventative regulations have greatly decreased the probability of any such outbreaks, but one could take place at any time.

The Regional Emergency Animal Disease Eradication Organization (READEO) is an example of the kind of program that is available when a problem with foreign or exotic diseases threatens the Commonwealth's livestock or poultry industry. READEO is a team, composed of Department of Agriculture personnel in cooperation with top scientists and experts in the field of animal disease.

Shelhamer said that the READEO makes use of the best qualified individuals available regardless of federal, state or other affiliation.

The READEO was organized to combat the dangers posed to U.S. livestock by diseases such as the hog cholera outbreaks in New Jersey and the New England states last summer.

The READEO's have been tested under fire in several states and proved to be highly effective units in preventing the spread of disease outbreaks and eradicating the disease at the local level. The READEO's were set up on the theory that a preselected and pretrained unit of animal health specialists can eradicate a disease more

rapidly than a group pulled together at the time of the outbreak.

The Bureau of Animal Industry held the first seminar of its kind last month when people from the task force, state and federal government, and the livestock and poultry industry met to outline and discuss the READEO setup in Pennsylvania. The seminar was an attempt to alert as many facets as possible that might become involved in READEO operations.

Shelhamer noted that the Bureau of Animal Industry does not confine its work to emergency situations. In addition, the Bureau regularly handles livestock and poultry testing and licensing and provides laboratory services for the Commonwealth's livestock owners. During the past fiscal year alone, over 800,000 specimens were examined at the Summerdale Laboratory which operates under the Bureau.

A system of computers and video terminals provides fast service for livestock owners, keeping close track of livestock herds to pinpoint problem areas and forestall potential epidemics. Information stored in the

computer pertains to the 50,000 herds of nearly two million cattle, records of all animals and herds that have shown evidence of disease and the records of the 900 registered veterinarians in the Commonwealth.

"The use of the terminals provides an added benefit to our farmers," Shelhamer said. "They provide the dissemination of up-to-the-minute findings of all tuberculosis and brucellosis testing, which creates an easy acquisition of health certificates needed for the sale and showing of the farmers animals."

IH plant toured

SCHNECKSVILLE, Pa. - Twenty-four area farmers and their wives are touring International Harvester's Louisville plant today in Louisville, Kentucky.

Farmers from Lehigh, Carbon, and Northampton Counties are participating in the fly-in to Louisville for the plant tour, the National Tractor Pulling Contest, and the National Farm Machinery Show.

They are among an estimated 650 Northeastern farmers and IH dealers that visited the plant during February 16 - 19.

While touring the plant, farmers and IH dealers saw the assembly of a light line of tractors and cub cadets, plant quality controls, and manufacture of component parts.

"Today's farmers are making a major investment in equipment," says Hal Keeler of Schoeneck International Equipment, Schnecksville, Pa. who is accompanying the area farmers on the tour. "It's thus important to their decision-making to see this equipment and the emphasis that's placed on quality controls."

Jan. milk priced at \$9.42

NEW YORK, N.Y. - Dairy farmers supplying milk plants regulated under the New York-New Jersey marketing orders during January will be paid on the basis of a uniform price of \$9.42 per hundred pounds or 20 cents per quart. Market Administrator Thomas A. Wilson, who announced January's price, also stated that the uniform farm price was \$9.54 per hundredweight in December 1976 and \$10.13 per hundredweight in January 1976. The uniform price is a marketwide weighted average of the value of farm milk used for fluid and manufactured dairy products.

The total amount of milk received from the 19,019

dairy farmers supplying the New York-New Jersey Marketing Area was 761,323,395 pounds during January 1977. This was more than 10 million pounds below last year. The gross value to dairy farmers for milk deliveries was \$73,242,075.12. Wilson explained that this included differentials required to be paid to dairy farmers but not voluntary premiums or deductions authorized by the farmer.

Regulated milk dealers (handlers) utilized 392,021,980 pounds or 51.5 per cent of the total amount of milk for Class I. The Class I milk is used for fluid products such as homogenized, flavored, low-test and skim milks. For

January 1977, handlers paid \$10.66 per hundredweight for the milk used in Class I products compared with \$11.24 a year ago.

The balance of the milk, 48.5 per cent, was used to manufacture Class II products including butter, cheese, ice cream and yogurt. For this milk the handlers paid \$8.22 per hundredweight.

The uniform price is based on milk containing 3.5 per cent butterfat. For January 1977, a differential of 10.4 cents was applied to the price for each one-tenth of one percent that the milk tested above or below the 3.5 per cent standard.

All prices quoted are for milk received within the 201-

NEW METRO HITCH

Metro Hydraulics, Inc. of Minneapolis announces an end to big "category mix-ups". They've designed a 3-point adjustable hitch that matches a tractor in one category... to equipment in another. Converts in four minutes.

The new Metro hitch fits 'em all. It stays right on the tractor, while a simple adjustment is made for a hookup to Category II or III equipment. Pull four bolts, adjust the arms, raise or

210 mile zone from New York City.

lower the top hook. And retighten the bolts.

For more information on Metro tractor hitches and pricing, write: Metro Hydraulics, Inc., Box 20010, Minneapolis, Minn. 55420.

Appetizer Kabobs

You can make a colorful assortment of kabobs for the appetizer tray easily with canned luncheon meat. Simply cut the luncheon meat into 3/4-inch cubes and thread each cube on a wooden pick with a slice of sweet-sour pickle and a canned pineapple chunk that has been rolled in flaked coconut.

ACORN IS ON THE MOVE!

ACORN MONSTER

EERIE POWER!
Acorn's monstrous hydraulic manure pump is the king of the pit. With ram slam power performance difficult to match. Expedites chunky manure and bedding — wet or dry.

STAR FEATURES!

- Pump forces oxygen into remote pits with every stroke. Mulchens manure into rich product with less odor.
- Fresh manure is forced up and into the pit — including valuable nitrogen and phosphorus and fines.
- Eliminates daily hauling and, with proper management, cuts fuel and fertilizer costs.
- Massive piston — 10" dia. x 41" — cuts into the toughest manure — from milking to bulk — with long stroke.
- Rugged spring loader gate valve prevents manure backflow. Unique — less power in the pit.

AMAZING NO-NONSENSE WARRANTY
Only the Acorn Hydraulic Manure Pump is fully backed by a no-duplication, no-claim warranty.

ACORN'S MANURE MONSTER. MAKE IT THE COMING ATTRACTION ON YOUR FARM SOON!

ACORN IN THE TRENCHES

PLUS the "SCRAPER"

BATTLE-PREPARED!
Nothing fights tougher in the trenches than Acorn barn cleaning equipment. Put Acorn in your clean-up platoon and start winning the manure battles.

HEROIC FIGHTERS!

Super 600 Chain Gutter Cleaner — cleans at 23 ft. per minute. Flight tip up feature automatically tightens & cleans chains. 11 ga. galvanized steel box beam elevator. Super-tough transmission.

Liqui-Matic Cable Gutter Cleaner — for small to medium operations — ideal for slurry manure. Lower energy use with 1 to 2 HP motor. Tough paddle train operates at 140 ft. per minute.

Mark II Alley Scraper — rugged alley proven design features — at less cost than other makes. Quick-response controls for total automation. Special tip-up scraper wipes more manure than other designs.

ACORN GUTTER CLEANERS & SCRAPERS — PUT 'EM UNDER YOUR COMMAND. THEY'RE LOYAL FIGHTERS — BACKED BY ACORN'S NO-NONSENSE 1-YEAR WARRANTY.

What's new

TANDEM-AXLE FARM WAGON

Sperry New Holland now offers a heavy-duty, tandem-axle farm wagon, which is designed to accommodate today's large forage boxes and gravity-flow grain boxes.

With an A.S.A.E. load rating of 12 tons, the new Model 238 Conestoga farm wagon is built to take the stresses and strains of large-scale forage and grain hauling. Steel construction of the Model 238, including front and rear spindles and wheel beams, is designed for maximum strength. In

addition, maximum flotation is a feature of the new wagon.

Standard equipment includes a heavy-duty, long, adjustable tongue, 15 x 10-inch wheels and a rear hitch for towing an additional wagon in tandem.

The Sperry New Holland line now includes four Conestoga farm wagons - the light-duty Model 14, with an A.S.A.E. load rating of four tons; the medium-duty Model 230, with a six-ton rating; the heavy-duty Model 234, at eight tons; and the tandem-axle Model 238, with its 12-ton rating.

ULTRASONIC TRANSMITTER REPELS RATS, MICE, OTHER RODENTS

The Sonitron drives away rats and other rodents within up to a 3000 square foot area by emitting 140 decibels of high frequency sound (at 20 KHz) inaudible to humans and cats and dogs, but so painful to rats, mice squirrels, and other rodents, that they will be driven from the area.

One Sonitron unit plugged in to standard 110-115 volt 60 cycle outlet will cover a room about 50 feet by 60 feet. Multiple units are used for larger areas.

The Sonitron is used indoors and outdoors wherever rats, mice or other rodents are a problem.

What's new

STEAMBLASTER

Citation Manufacturing Co., Inc. of Siloam Springs, Ark. recently introduced its new Model 80 Steamblaster. The Company says it is the most compact steamblaster on the market, with capabilities of producing 60 GPH at 175 PSI. This machine was developed for the farm and agriculture industry. It cleans dirty machinery, feed wagons, dairy barns and farrowing houses very effectively and efficiently. The unit comes complete with built-in float tank, fuel tank, chemical metering valve, auxiliary chemical hose and portable gear. The Model 80 Steamblaster is available at a price of \$698, f.o.b. factory.

PATZ

98B Silo Unloader

- 30" drive wheels
 - Adjustable impeller blades
 - Gathering chain with cutters & rakers
 - Positive frost cutter
- Silo unloading - Feed handling - Manure handling

The faces of Mr. and Mrs. Wilbert Moyer mirror the concern they have about possibly having to move to another area. Their Schuylkill County dairy farm is in approximately the center of Deibert Valley, which might be flooded if a dam and

reservoir are built there. Possibilities of that happening are now being studied by an engineering firm, while residents in the area are banding together in opposition.

Seventeen

[Continued from Page 94]

formation from the DRBC. There's a reservoir site in Lehigh County, known as the Trexler reservoir, says the

DRBC, which has received approval of that governing body and is ready for construction. "All the preliminaries have been

taken care of," a spokesman for the agency said, adding that there is a "good chance of it going into construction imminently."

The DRBC spokesman said that the commission has initiated talks with the electric companies to try to

negotiate an agreement by which the utilities could have water from Trexler. It conceivably could provide cooling make-up water as well as local water supply needs, the DRBC spokesman explained.

Two things would have to

happen before the Trexler alternative could become effective: 1. Construction would actually have to begin (DRBC has approved plans and the environmental impact statement); and 2. the utility companies would have to be agreeable to buying water from the Trexler facility. DRBC is of the opinion that they might be since the utilities would then not have to be concerned with building their own reservoir.

Actual selection of the site will be made by the utilities group involved in the project. Studies are being conducted by a New York engineering firm. Approval of the final selection and a review of the environmental impact statement would have to come from the DRBC.

Among the farmers who would lose their lands is Lewis Noecker of Schuylkill Haven R1. The Noecker property has been in the family for six generations, and Noecker said he'd hate to have to lose it now. "We never expected something like this to come around here," the young farmer said, shaking his head.

Wilbert Moyer, also of Schuylkill Haven R1, has a dairy farm in Deibert Valley, which may be under water if and when the reservoir is constructed. His grandfather bought the 128-acre farm in 1913. Aside

from the home farm, he rents two others. Noting that he had over 100 bushels of corn per acre last Fall, he expressed satisfaction with the ground's fertility. Like Noecker, he hates to think of having to relocate because he has lived here all his life and he's used to the lay of the land and has tailored his farming techniques to these properties. He's also worried about not getting as good a farm elsewhere if he must relocate. "But it isn't just the money, it's the idea of relocation," he said. There are 17 or 18 farms involved in the site study, along with homes and trailers.

Moyer, who milks 37 Holsteins, told Lancaster Farming that not all farms in the valley are being farmed, but more have come into production in recent years than there were just a few years ago. Total acreage to be taken up by the considered reservoir would be 1160 acres.

The CORCD have gained momentum in their fight in that statements of support have come from both the Schuylkill and Carbon Counties Extension Services, the local school board, and other groups. The area's Agway unit has indicated it would side with the farmers.

The group's next meeting will be held on Feb. 28 at the Landingville Fire Hall at 7:30 p.m.

All you want to know about the red fox

By Dr. Gerald Storm
Wildlife Researcher

Few who become acquainted with the red fox are able to maintain a neutral attitude about it for very long. Hunters continue to become involved in heated debates about the role that red foxes play in controlling the size of game population. At the same time, others find pleasure in watching a red fox in its prime winter coat hunting mice in a grassy field or swamp. The sight of a male and female running across a snow-covered landscape is a rewarding and exciting experience. Aesthetic values of this species are no less important than its ecological and economic values.

Distribution

The red fox, familiar to many Pennsylvania residents, is widely distributed over much of North America. This mammal is considered a native of the northern and western parts of the continent, and is currently a common resident in eastern United States. Prior to settlement by Europeans, red foxes were believed to be absent in the eastern timbered areas south of the 40th parallel. Between 1650 and 1750, red foxes from England were introduced into New England. Thus the origin of today's eastern red fox is

uncertain. It may be a hybrid from crossings between the introduced and native stock or a descendent of a subspecies originating in the northern plains or southeastern Canada, which then moved south as timbered areas were cleared.

Description

The familiar and typical red fox in Pennsylvania is one with an orange-red coat, black legs, and white-tipped tail. Weights range from 9 lbs. for a mature female to 12 lbs. for an adult male. Other color phases, such as the Silver and Cross, are not commonly seen in this state. The Silver phase mutation probably originated in eastern Canada and again in northwestern Canada or Alaska. These mutations were used by early fox ranchers in developing a variety of color phases including the Amber, Glacier, Golden Glory, Pearl, and Silver.

Another genetic variation, the Samson fox, is a woolly looking animal because it lacks most or all of the long guard hairs and shows only the underfur. In some local fox populations in the more northern latitudes up to 5 percent of the foxes may be the Samson genetic type. In Pennsylvania, however, only 2 or 3 Samson foxes occur per 5,000 foxes, according to one Pennsylvania fur buyer.

Taxonomy

All of the variations mentioned above belong to one species, the red fox. Scientists use the Latin name *Vulpes vulpes* to refer to this species. Another fox common in Pennsylvania is the gray fox, with the long Latin name, *Urocyon cinereoargenteus*. The gray resembles the red generally but is a stockier animal with a coarse grizzly-black body coat and a black-tipped tail. Rusty red hairs occur in a narrow band along the gray fox's side. Many people mistake this rufous stripe as evidence that the animal is a cross between a red fox and a gray fox. At close range these two species can be easily distinguished, however. A close examination of their respective skulls also reveals distinct differences in shape.

It is not likely that the red and gray species interbreed in the wild even though their ranges overlap. There is evidence that the red fox may mate with other species like the Arctic fox and the kit fox. Little is known about the frequency of these hybridizations in wild populations and it is questionable whether hybrids resulting from such matings are fertile.

Reproduction

Except during the

breeding season and while the young are less than 5 months old, the red fox leads a rather solitary life; at least when compared to the more social Timber Wolf. Mating takes place annually during December, January, or February; depending on the latitude and other factors. A pair may stay close to each other during the breeding season and maintain fairly close ties until the young are several weeks old. There is evidence that some males and females occasionally mate with more than one partner during the same breeding season.

An average of 5 to 6 young are born during late winter or early spring, often in an underground den. Dens dug out by other mammals such as woodchucks may be

A UNIQUE STOVE and FIREPLACE combination

The Efficient Way To Wood Heat
Is With The
MORSØ STOVES

Franklin stoves and fireplaces allow most of the heat to escape up the flue including volumes of warm air from your home. However, with the Morsø system, stoves burn highly efficiently. Keeps 75 percent of heat generated right in your home. Burns 8 to 18 hours on one load (depending on size). Mornings are warm. One fire lasts all winter.

- Heats 10,000 Cu Ft Home
- (28 ft x 45 ft area)
- Burns 16 to 18 Hours Each Loading
- Enamel Finish Black or Green
- All Cast Iron With Brick Lining

This Long Green Dividend coupon has the redemption value checked when applied against the purchase price of specified equipment offered by a participating John Deere dealer who sets his own retail prices. If your dealer does not have equipment in stock that is included in the Long Green Dividend Program the machine you want can be ordered from John Deere and the value of the coupon will be deducted from the purchase price. Only one coupon can be applied against the purchase of any given machine. Use of the coupon is limited to products which can be delivered as determined by dealer's orders and machine availability.

NOTE: (1) You must pay any sales tax on the total purchase price—excluding the Long Green Dividend. (2) this coupon is void where prohibited, restricted or taxed. Offer expires June 15, 1977.

SLF

It's the way we give
each field the exact
liquid fertilizer it needs.

With the SLF system, we can prescription mix a complete liquid fertilizer that matches the needs of each individual field and crop.

It means you don't have to settle for what's available. Or what's possible. Because with SLF and Arcadian® liquid, the possibilities are endless.

Allied Chemical designed SLF to deliver the same analysis in every drop. In liquid application equipment that fertilizes accurately and uniformly from start to finish over every acre.

It's made with POLY-N®, the phosphate source that increases the availability of nutrients to the crop. This helps explain why SLF mixed liquid fertilizers have proven more profitable than dry bulk blends in recent field trial comparisons.

Let us prescription mix a complete liquid fertilizer based on a complete soil analysis, and show you how profitable fertilizing the SLF way can be.

The red fox

[Continued from Page 102]

remodeled and used by foxes, although red foxes are capable of digging their own. Young foxes first emerge from dens at about 1 month. By this time the adult female may have moved some or all of the litter to a new den. Separating littermates and distributing them among two or three different dens is common behavior and may increase survival by making it more difficult for a potential predator, including man, to locate the entire family.

By midsummer, pups become more independent from their parents and littermates. The tendency for juveniles to be well distributed within the 2- to 3-square-mile living space (home range) of the adults is readily apparent by July and August. Occasionally, two or more members of a family may be seen together at a den or along a fencerow, but as fall approaches the young-of-the-year are on their own and tend to avoid each other and their parents. This spacing may be ac-

complished through a complex communication system involving scent, but the details of this are not well known.

Dispersal

By late September and early October a significant change occurs in red fox behavior. At this time, many of the young foxes (now adult-sized) leave their familiar home ranges, disperse through unfamiliar areas, and settle in a new environment. This tendency to leave home by the young fox is probably not too different from that of our own teenagers who leave home and seek out new surroundings.

Little is known about the mechanisms involved in the dispersal process. It may be that hormones and agonistic behavior are involved. The distribution process resulting from dispersal may prevent inbreeding and help spread new genes, and it helps regulate and maintain local fox numbers by filling in voids where populations have been reduced either by disease, habitat changes, or intensive trapping and hunting.

Dispersal is quite pronounced and plays a significant role in the life history of red foxes. In some

local areas at least 80 percent of the young males and 37 percent of the young females leave their birthplace and take up a new residence far from other members of their family.

Recently, biologists followed the dispersal of individual foxes with the aid of tiny radios attached to a neck collar on the fox. This work showed that the onset of dispersal was sudden. An animal leaving its home range often traveled in an almost straight line. During dispersal, some individuals moved along a certain course for three to six

consecutive nights. Others traveled during one to seven nights, remained in an area for one to six days, then resumed traveling. It appears many foxes finish the process within a week. The longest recorded dispersal period was 18 days.

Red foxes traveled 10 to 16 kilometers (6 to 10 miles) during a typical night of dispersal. At this rate many of the animals end up 32 to 45 kilometers (20 to 30 miles) from their birthplace. The nightly travel distance during dispersal is much like

The red fox

[Continued from Page 103]

the distance of a resident fox traveling within its home range. The main difference is that the disperser travels in one general direction while the resident moves along a series of travelways within a 2- to 3-square-mile area.

Abundance

With a high proportion of foxes traveling over 20 miles during the dispersal process, the "fall shuffle" in red foxes is indeed spectacular. During the fall, trappers reportedly catch as many as 15 foxes in one or two traps located within a 40-acre area. This kind of trapping success does not mean that the fox density is 15 per 40 acres or even 15 per square mile. Rather it is primarily the result of many foxes moving through a local area. In short, it is a result of dispersal.

Fox numbers vary between localities and from year to year. Censuses conducted to date indicate that more than 2 red foxes per square mile in April is a relatively high density. This species seems well adapted to a variety of habitats but seems to prefer a mixture of farmlands, abandoned fields, and small scattered woodlots. Large and pure forestlands tend to support few red foxes.

Food and Habitat

Kinds of foods eaten by the opportunistic red fox are largely influenced by the availability of acceptable foods. Small rodents, rabbits, birds, berries, and fruits make up the bulk of the diet.

Red foxes and prey like cottontail rabbits and ruffed grouse have shared the same ecosystems for many centuries. The predator-prey systems which have developed over the years are easily modified by many environmental factors, including man-made disturbances to the land. When suitable cover is lost, pheasants, ruffed grouse, or rabbits may be "forced" into fewer and often more exposed areas. It is in these situations that predators are more efficient in taking a

What's New

significant proportion of the prey population. There is no simple answer to remedy these situations. Predator control is expensive and must often be on a long-term basis to be effective. Habitat manipulation to provide acceptable cover for the prey involves social and economic factors which may be insurmountable. However, in the long run proper land-use and habitat management offers the most logical approach toward achieving a variety of species and a variety of wildlife values.

It is essential that the many values inherent in wildlife are recognized by our society. Although the economic value of fox furs may fluctuate from year to year, the level of the aesthetic value is independent of economics and primarily dictated by man's willingness to appreciate and understand all of our natural resources.

TRANSI-SCREENER
"American Screener Corporation announces that several improvements have been added to its popular Transi-Screener grain screener as a part of American Screener's policy to continually update and improve its machinery to comply with government regulations as well as to provide a better product whenever possible. Several hundred Transi-Screeners are now in operation removing fine materials from virtually every grain in capacities from 1250 bushels per hour to 7000 bushels per hour. The 1976 Transi-Screener features dust-tight construction, a new type screen that prevents clogging and agitation paddles that continually turn and stir the grain as it passes over the screens. Along with the improvements, American Screener Corporation now offers a 100 percent craftsmanship and performance guaranty."

Laminated Rafters:

The First Choice for Economical Space True Flexibility and Total Satisfaction...

'meets all our needs perfectly...

Dairyman **AUSTIN BECK** located in York County, Pennsylvania has been pleased with his new 50x180 foot, 100 Cow Free Stall Barn and Milking Parlor constructed of Rigidply Laminated Rafters.

"Our Free Stall Barn has proven to be completely satisfactory for handling cows I could not have built anything else that would have met our needs better."

You get a lot more than a quality farm building with Rigidply Laminated Rafters. First, all of your inside space is useful, with a clear span from floor to ridge. Second, you have maximum resistance to wind and snow—because laminated rafters are far stronger than the wood itself; four times stronger than ordinary nailed rafters! Third, the attractive arches provide all of the roof support, while providing complete freedom for many practical interior arrangements. Fully guaranteed against defects in material and workmanship, the perfect shape and accurate size of every Rigidply Laminated Rafter results in a stronger structure—and a better looking building in which you can take much pride for many years.

Suburban lady returns to basics

By SALLY BAIR

Feature Writer

How many times this Winter have you yearned to warm your hands by the wood stove in the kitchen of your childhood?

For Mrs. Wilbur Forwood, 2838 Harrisburg Pike, Lancaster, the yearning is now a reality and she uses her wood stove not just for handwarming but also for cooking and heating her home for her family.

Faye Forwood's wood burning stove in the kitchen means more than warmth and coziness. To the Forwoods, it represents a return to a simpler life which allows them to depend upon themselves and their own initiative.

For much of the farming community who will read this, independence is not a new idea. But for the great number of suburbanites, dependency upon others is a real way of life.

Faye said, "My husband and I were both raised in the country, and always had the dream to go back. We both had pleasant

memories of our childhoods." Faye grew up in the Safe Harbor area and Wilbur was raised near Elizabethtown. "We had bought our home on Robin Road in the hopes that we would some day get closer to the land - when we could. We looked for a long time."

The home they found was built in 1850 and had a barn and other out-buildings, and 6½ acres of land. "I saw the potential," Faye says with a laugh. "But we re-did things slowly. We had a five-year plan, which included room by room work and painting outside. I lived with dust and falling plaster for a long time."

The barn needed a new roof, and the tobacco shed was torn down and the lumber used to build a chicken house. There was enough lumber to panel the playroom, replace some attic boards, and build stables in the barn.

The decision to make a conscious effort to change their way of living came gradually,

Suburban

[Continued from Page 105]

Faye says. "I became interested in ecology about the time of Earth Day. I did some reading, and felt they had a valid point."

"It's been a gradual, on-going thing. We become more and more aware." Much of the change can be tied in with their move to their small farm six years ago, but Faye says, "The ideas were there on Robin Road, but were not put into practice."

"The whole thing ties in with self-satisfaction - the idea that I can do it myself. I, as a person, am important to my own welfare. We all have a need to feel self-worth. Technology and centralization have taken over, but there is something basic in each of us to be responsible for ourselves. It gives us a reason for being here," she explained.

Faye says her family's life has changed drastically since their move. "The way you look at life changes. For us, especially for me, it means a deeper respect for the land - a closeness to the land."

"We are really an extension of the land. I feel strongly that we must not actively do anything to destroy the land. I must leave it in the same condition or in better condition than I found it." She said this whole idea permeates into everything her family does.

"Our family is definitely closer; we must work together toward a common goal. My husband believes in it as much as I do," she says.

The Forwoods have two children - John, 11, and Mark 6½. She said her sons "feel they have the best of both lives. But the older one realizes he has more responsibility. He's more self-sufficient. He feeds chickens and hauls wood. They think it's pretty nice. They love the land and room to roam in the woods." She says both boys are aware of conservation and will notice smoke-belching factories while driving.

Faye says, "We have cut down on our consumption of electricity and fuel. We spend more time in active work. I work harder than I ever did before. But it is self-directed work - for my own self-sufficiency. I get a great sense of accomplishment. I get a fulfillment because I feel I am personally doing something worthwhile. But I'm not tied to the kitchen or to the house - not as much as people think. I ski once a week."

The Forwoods heat their downstairs with the wood stove in the kitchen and a Franklin stove in the living room which is lighted sometimes. There is a coal system which goes on from about 2:00 a.m. to 6:00 a.m. for supplementary heat.

Faye said her husband spends most of Saturdays cutting, hauling, and chopping wood to keep the wood stove going. "But he genuinely enjoys it. He feels it is a good form of exercise and he gets to be outdoors. He jokes about going out to my gym."

She said she and her family seek friends who are doing similar things and adds, "Some live much more simply than we, but they all have the desire to conserve. We do it not because it's fashionable, but because we feel we don't have an option. It's a necessity."

Faye says honestly that it does frustrate

her to see how some others live. She said, "I'm not saying people should give up everything they have worked for or deprive themselves. But I don't think wearing a sweater in the Winter is a hardship. We need to re-educate ourselves."

She added, "I don't think each one of us must alter life so drastically, but each must do some part."

She said that maybe this Winter's energy crisis is making people more aware of the long-range problem. "I've talked with a lot of people who it's made aware." But she said she feels there are also those to whom it will make no difference when the oil and gas start flowing again. She said, "I feel we need national leadership to make the public aware that it is very real. It will cause our children problems."

Wilbur works for Wyeth Laboratories, and skeptics have questioned Faye about this seeming incompatibility. But she says, "I am not opposed to technology and am not opposed to modern advances. What I'm asking for is moderation - a lesser technology. What we need is a simpler present - a hundred years ago was not the good old days."

The Forwoods have raised three steers, which Faye said, "were delicious." They are not currently raising one for several reasons. "We were getting more meat than we needed and didn't really save money. We have found someone who feeds steers the way we want them to be fed and we buy meat from him." But, she said an important reason for not raising their own was, "We couldn't stand to see them be killed - they really became pets."

They raise chickens - 22 of them at the present, which provide eggs for them and about four or five dozen to sell weekly. They also raised broilers and she said, "We know what they're fed. We feel it's very important to have food as much as possible in the natural state. We feel having chickens is another step toward being self-sufficient." Faye says she had never cleaned a chicken, but one day she and her husband prepared 13. "After the first two, you just know how to do it."

"I grow all my own vegetables - last year we had 24 different kinds. We have early Spring, Summer and Fall crops, and I farm as much organically as possible." Last year she estimates they farmed about 85 per cent organically, but gave in to the potato beetles. "Our goal is to be 100 per cent organic. You can do a lot with interplanting with aromatic flowers and mixing up your own sprays." For some of her gardening information Faye said, she reads the organic gardening magazine published by Rodale Press. She and her husband are now investigating the possibility of having a solar greenhouse.

She said she freezes the majority of their vegetables and stores the rest in a cold cellar. She home cans fruits which they pick themselves, and this year they will be planting their own fruit trees. In the past, she said, they have traded produce for fruit from a friend's trees.

Faye says she is a very careful shopper

for the family food. "It probably takes me longer than anyone. I feel very strongly that artificial colorings don't have to be in food. I would like to see Madison Avenue put their money into promoting natural foods."

Baking is another thing Faye does for herself. She said she purchased flour in 25-50 pound lots direct from the mill, and uses a lot of whole wheat flour. "I know what I'm getting," she explains.

Not every family can or would like to completely change the way they presently live. Nevertheless, Faye said she feels that if everyone makes a small sacrifice we won't all have to make a large one someday.

So she shared some simple ways to conserve in any home. "We try not to use a lot of paper products, and I always buy white paper products." She explained that dyes are released in streams, and "I don't think it's a necessity to have colored tissue." She said they use paper products for picnics, but at home she gives her children and her friends one plastic cup each for the day.

"Everything in our home is recycled. All the newspaper is used to start a fire in the stove. The wood ashes, which are a good source of potash and provides nutrients for the soils are put on the garden. I also try not to use a lot of plastic products because they won't decompose. We use paper disposable cups and I buy only returnable bottles."

A clothes dryer uses a lot of energy, and Faye says, "I have one but I never use it in the summertime - I hang out the clothes. In the Winter I use a collapsible rack - I use the dryer very infrequently. The sun is free - it doesn't cost a thing."

Faye said that using a dishwasher once a day uses no more water than washing dishes three times daily. But it's the drying cycle which uses up the kilowatts. So she suggests that a dishwasher be opened and the dishes be allowed to air dry.

Doing complete meals in the oven is another way to save on fuel.

Faye does most of her own sewing and loves to read. She said, "January and February are my months to settle in and find myself." She also quilts and crochets and she said she enjoys outdoor things. "Skiing is my passion." The family enjoys hiking, bicycling, and tent camping.

Faye said, "I enjoy Lancaster County, but now is the time to sit back and call a halt to development of industry. It all starts with a deep respect for the land. When you have this, you try to do everything you can for future generations. You can use it, but don't abuse it. It's like going to a state park, and leaving it in the same condition so people can enjoy it later."

"It also means having a respect for life - and everything else falls into place."

It can sometimes seem to rain frogs because their lightweight embryos can be carried into the air by winds.

- 220 335 535 550 Sprayers
- 308 398 Auger Elevators
- 15 kW 25 kW Alternators

\$200 Dividend

- 737 1508 Rotary Cutters
- 700 750 Grnder/Mixers
- 428 Flight Elevator
- 40 kW 55 kW Alternators

This Long Green Dividend coupon has the redemption value checked when applied against the purchase price of specified equipment offered by a participating John Deere dealer, who sets his own retail prices. If your dealer does not have equipment in stock that is included in the Long Green Dividend Program, the machine you want can be ordered from John Deere and the value of the coupon will be deducted from the purchase price. Only one coupon can be applied against the purchase of any given machine. Use of the coupon is limited to products which can be delivered as determined by dealer's orders and machine availability.

NOTE (1) You must pay any sales tax on the total purchase price—excluding the Long Green Dividend, (2) this coupon is void where prohibited, restricted, or taxed. Offer expires June 15, 1977.

Survey results to be publicized

WASHINGTON, D.C. - The Agriculture Council of America will hold a news conference to present the results of its nationwide consumer survey on food prices and other food-related issues, announced ACA Chairman Dale Hendricks recently. The news conference will be held on February 18 at 10:00 a.m. E.S.T. at the ACA office. Hendricks and Aileen Gorman, Executive Director of the National Consumers Congress will serve as spokespersons.

The survey is part of ACA's comprehensive effort to define specific ways farmers and consumers can work together for mutual benefit. Teams of farmers and farm wives representing ACA passed out 20,000 questionnaires in face-to-face meetings with consumers in the supermarkets and shopping centers of 15 major U.S. metropolitan centers. Nearly 2500 of these were filled out and returned to ACA.

"The preliminary results look very encouraging to us (a sample of questionnaires from each city have been tabulated). They indicate pretty strongly that consumers seem not only willing but anxious to work with the farmer to solve food problems in the years ahead," said Hendricks, a dairy producer from Bloomfield, Iowa.

"Besides the price of food the consumer is concerned about quality, nutrition and marketing costs," Hendricks added. "And, the consumer feels that he and the farmers deserve more input in the decision-making process that affects them."

Content for the questionnaire came from a November 4-5 conference of 40 prominent farm and consumer leaders searching for potential areas of agreement. Then the national tour was launched to test these potential areas of agreement with rank and file consumers as well as special audiences like public officials, labor spokesmen, university students and consumer co-ops.

As a result of the survey and the overall project, several concrete steps have been taken to provide for joint farmer-consumer action to improve the food system. An independent Farmer-Consumer Roundtable has been established to coordinate activities on an on-going basis. Several major issue areas have been identified by the Committee for consideration including: nutrition and safety, the family farm, and food prices and food marketing.

The Roundtable is working on setting up a national farmer-consumer conference to include all interested farm and consumer groups and those involved in the packaging, processing

and retailing of food. The Conference tentatively scheduled for late March will examine the results of the survey and attempt to develop specific recommendations on how farmers and consumers can support each other.

The Agriculture Council of

America, a non-political and non-legislative organization founded in 1973, is made up of individual farmers, farm and commodity organizations and companies that supply the farmers. Its purpose is to improve communications between farmers and urban consumers.

What's new

DIGITAL INDICATOR FOR BIG DUTCHMAN ELECTRONIC FEED SCALE

A new automatic digital indicator has been added to the Big Dutchman electronic feed scale. The company says the new digital unit (model 400) is fully interchangeable with the model 500 analog (dial type) indicator which Big Dutchman introduced to the poultry industry in 1975.

The weighing system provides accurate control for restricted or "limited" poultry feeding programs. The unit consists of four weigh-bars, which are installed under the legs of the bulk feed bin, and the digital indicator which may be located inside the poultry house or at the bin site. The new digital indicator displays the weight of the feed in the bin continuously, even while loading or unloading. The scale may be pre-set to control the number of pounds of feed that will be discharged from the bin each

day. Used in conjunction with timers on automatic feeders, the scale can control a program of two or three feedings per day, and will shut off the bin delivery when the pre-selected amount of feed has been distributed. The scale is also an accurate monitoring system to measure feed consumption, and to serve as an early warning when birds go off feed. It also provides constant information on the amount of feed remaining in the bin, and may be used to check and verify the weight of incoming feed deliveries.

Q. Is there a life insurance policy for which I can pay premiums during my peak earning years, and then stop paying premiums when I retire without losing my lifetime coverage?

A. Yes, there is. It's called a "limited payment life policy." It provides lifetime protection, but premiums end after a period such as 10, 20, or 30 years. Because the premium-paying period is limited, the premium rate is necessarily higher than for the straight life policy. The higher premium, however, builds cash values faster than a straight life policy for the same amount. In all other respects, it is similar to the straight life policy.

Four hundred years ago the people in England ate with large, long-handled spoons similar to the ones we now use for stirring.

SOUTHERN LANCASTER COUNTY

HERD DISPERSAL

At The

New Holland Sales Stables, Inc.

Friday Night, February 25

7:00 P.M.

Approximately 130 head of high grade Holstein dairy
cows.

This herd consists of many cows just fresh, a lot of
close springers and many bred for base milk.

Cows are of good size with the kind of dairy quality and
udders any farmer has to like. All home raised and
sired by top bulls with many years of top artificial
breeding used. Special mention of five red and white
Holsteins.

Farmers - this is a good herd with the top cow milking
at 100 pounds per day. Many producing from 60-75
pounds per day. If you need good cows, make your
plans to be at this sale.

30 day TB and blood test. Pregnancy checked

YORKSHIRES

Do you need a boar that will produce fast growing pigs, low feed conversion, but yet will give you plenty of lean red meat?

Try a YORKSHIRE BOAR from our herd. The herd with the big winners. The last two years we have had the superior boar over all breeds at the New York State Fair.

We also have bred Gilts and Open Gilts both for the purebred and commercial breeder. Delivery available.
